TELEPHONE: CENTRAL 3617
TELEGRAMS: "CHEMICUS,
CANNON, LONDON" (2 Words)

PUBLISHED WEEKLY AT 42 CANNON ST., LONDON, E.C.4.

No. 2287.

NOVEMBER 24, 1923.

SUBSCRIPTION, WITH
DIARY 20/- PER ANN. VOL.
SINGLE COPIES 1/-

Vol. XCIX.

A Full Range of PACKED DRUGS

(*Own Name*)

for the Pharmacist.

Reap the benefit of our experience and exceptional facilities for manufacturing and packing. The products are notable examples of pharmaceutical excellence, and are packed in a variety of elegant and distinctive styles. Special attention is paid to designing and printing the labels and to inserting the customer's own name and address in an artistic manner. Each package has had that finishing touch which is appreciated so much by the public and reflects credit on the retailer.

THE PRICES ARE RIGHT.

Special Quotations and Samples on request.

Full List of these Preparations in Section 4 of Price List.

WRIGHT'S PAINTING BOOKS

With a Window Showcard

advertising 426 Prizes. Each painting must have an outside wrapper from Wright's Coal Tar Soap attached.

This Competition is now being advertised in the public press.

Secure supplies early as the number is limited.

Wright, Layman & Umney, Ltd., Southwark, London, S.E.1

Who wrote this?

Men talk as if victory were something fortunate. Work is victory. Wherever work is done, victory is obtained. There is no chance and no blanks.

The first four correct replies on a P.C. will receive free and carriage paid a generous supply of this new line.

Nothing depends on luck in the-business-building policy of

"THE WIGGLESWORTH WAY"

OUR NEW LINE

Thermal Wintergreen Cream

is a sound Pharmaceutical and Commercial proposition from the greaseless base of the Product to the "Copy" which is selling many Tubes already.

The low retail price, your usual "Packed goods" profit, the growing demand of the Public for Wintergreen all foretell another "Winner."

YOURS FOR ASKING. *A sample tube, all details as to formula, price and profit together with Photograph of Display.*

Be the first to have it in your District.

'CRISTOLAX'

This
addition
means
increased
turnover
for YOU

THE growing popularity of this efficient and delightful lubricant and food digestive has resulted in many doctors, pharmacists as well as many members of the general public urging us to issue the product in a larger size than the present 2/- bottle.

We have had pleasure in meeting the expressed need and have also taken the opportunity of effecting a marked advantage in the selling price. For example the new size will contain double the quantity of two 2/- bottles. The price is fixed at 3/6 minimum retail, thus showing a clear saving of sixpence to purchasers of the larger sized bottle.

We are satisfied that this price advantage will be appreciated by users of "Cristolax" and will doubtless do much to stimulate the present excellent and rapidly increasing demand.

May we suggest that you make the most of this good selling point to your customers and thereby reap a distinct benefit by way of increased turnover.

SIZES & PRICES.

2/- Min. Retail	18/- per doz.

FAIRY DYES

Mean Greater Turnover for You—and Absolute Satisfaction for Your Customers.

THERE is no more attractive line on the market to-day—there is no better seller—and no article has made larger strides in popular favour.

FAIRY DYES

are now sold in glass tubes, encased in smart, clean-looking "safety-first" cartons. They are retailed at 2d. each, made in 25 popular shades and colours, and are extensively advertised in the right publications.

You can rely upon Fairy Dyes—for prompt delivery in any quantities—for fresh stocks—for quick, easy-to-handle, clean turnover, and as tried favourites your customers are always satisfied. See that you are supplied without delay.

MACHINERY for the MANUFACTURE OF
CONTAINERS

VICKERS LIMITED are specially engaged at their Erith Works, Kent, in the design and manufacture of the most up-to-date plant for making all kinds of pilferproof shipping containers.

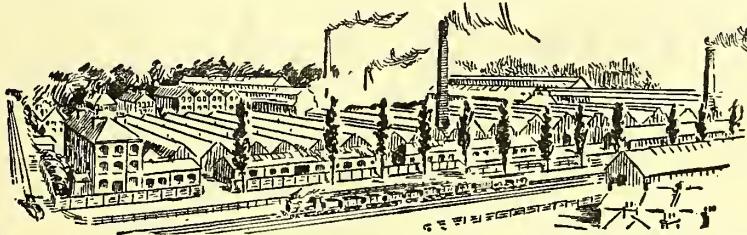

This form of container is lighter and stronger than a wood case—also more convenient as it can be stored in the flat and made up as required. It will also be found to be cheaper. Vickers Limited are in the position to give free advice as to plant and CAN NOW SUPPLY THE MACHINERY.

SUCCESS

depends entirely upon SALES. Sales depend entirely on DEMAND. Demand depends entirely on DESIRE. Desire is brought about by that which is pleasing to the eye.

When buying printed matter remember that "Good Printing" is "Cheaper than Poor Printing," and it is good printing that catches the eye and starts the ball rolling.

LUTON FABRIC DYES

AURORAL COLD-WATER DYES

Another Whitaker Product which is in great demand. It is the finest cold-water dye in the world for dyeing delicate and costly fabrics. Good results always obtained.

LUTON FABRIC DYES

A splendid hot-water dye for all materials—easy to use, perfect results assured, 24 Beautiful Colours.

EVERY one of the advertisements surrounding this border has been designed and written with the object of creating sales for "Luton" Straw Hat Dyes. Therefore they are advertisements designed and written to help you—to bring sales to your establishment—for they must be taken in a personal sense as far as your own district is concerned.

LUTON

Straw Hat Dyes

OVER 40 COLOURS

"ENTIRELY BRITISH—BRITISH ENTERPRISE—
BRITISH LABOUR—BRITISH CAPITAL."

These famous hat dyes make a dual appeal to every lady i.e., on the score of economy and on fashionable grounds, for with "Luton" Straw Hat Dyes it is possible to make a many seasons' old hat extremely modish, and what is equally important, the hat will, in appearance, be just like new.

"Luton" Hat Dyes are permanent, no matter what shade is chosen. Supplied in either Dull or Glossy Series.

"Luton" Straw Hat Dyes are easy to sell, they afford a good margin of profit, and what is equally important, they please the customer. A special non-inflammable series is supplied for export.

ALL CASES AND CONTAINERS FREE.

LIVERPOOL VIRUS ADVERTISING RINGS THE BELL!

THE response to the advertising of the "Mice" Virus which commenced in April has been shown by an almost immediate increase in the sales by chemists in all parts of the country.

"Mice" Virus like the "Rat" is now put up in neat, compact display outers, which take up but little space on your counter.

Be assured that these gaily coloured caskets *sell the goods*. Send your order now while the Mice are migrating from the fields to the houses and the Press is proclaiming the merits of "Liverpool Virus" for their destruction.

IN DISPLAY OUTERS OF $\frac{1}{2}$ DOZ.

For MICE [1/6] 12/- doz.
For RATS [2/6] 20/- doz.

Jose Serrano Wines

Britain's most popular wine is Port. It suits the national taste, and peculiarly enough the English climate helps the wine to mature in a way which is unequalled in any other part of the World. "José Serrano" is *vintage* growth ripened and matured in the wood to bring out its fullness and colour. By bottling and laying down at the moment of maturity, its rich fruitiness and flavour are enhanced and its character determined. *Such is the care* which centres around "José Serrano"—and which makes it the most popular Port handled by the Chemist.

The demand which exists for a Port to retail at 4/6, has induced us to offer "Rodrigo" Port, a fine old Tawny Port which is unequalled at the price.

1-3 doz. 6 doz. 1 gross.

"José Serrano" Full Bodied Port

In bottles, 6 to gallon **60/- 59/- 58/-** doz.

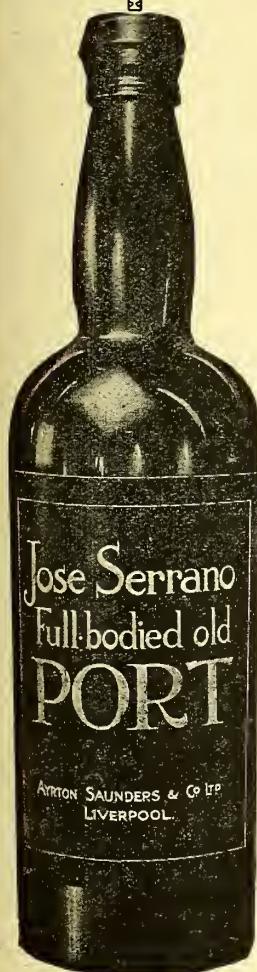

"Rodrigo" Fine Old Port

In bottles, 6 to gallon **42/- 41/- 40/-** ,,

"José Serrano" Sherry

In bottles, 6 to gallon **59/- 58/- 57/-** ,,

39% PROFIT

Chemists who will give a 10 days' Glaxo Window Display can buy on terms which show 28 per cent. to 39 per cent. profit on outlay (from 20 per cent. and 2½ per cent. to 20 per cent. and 10 per cent. on turnover).

Glaxo

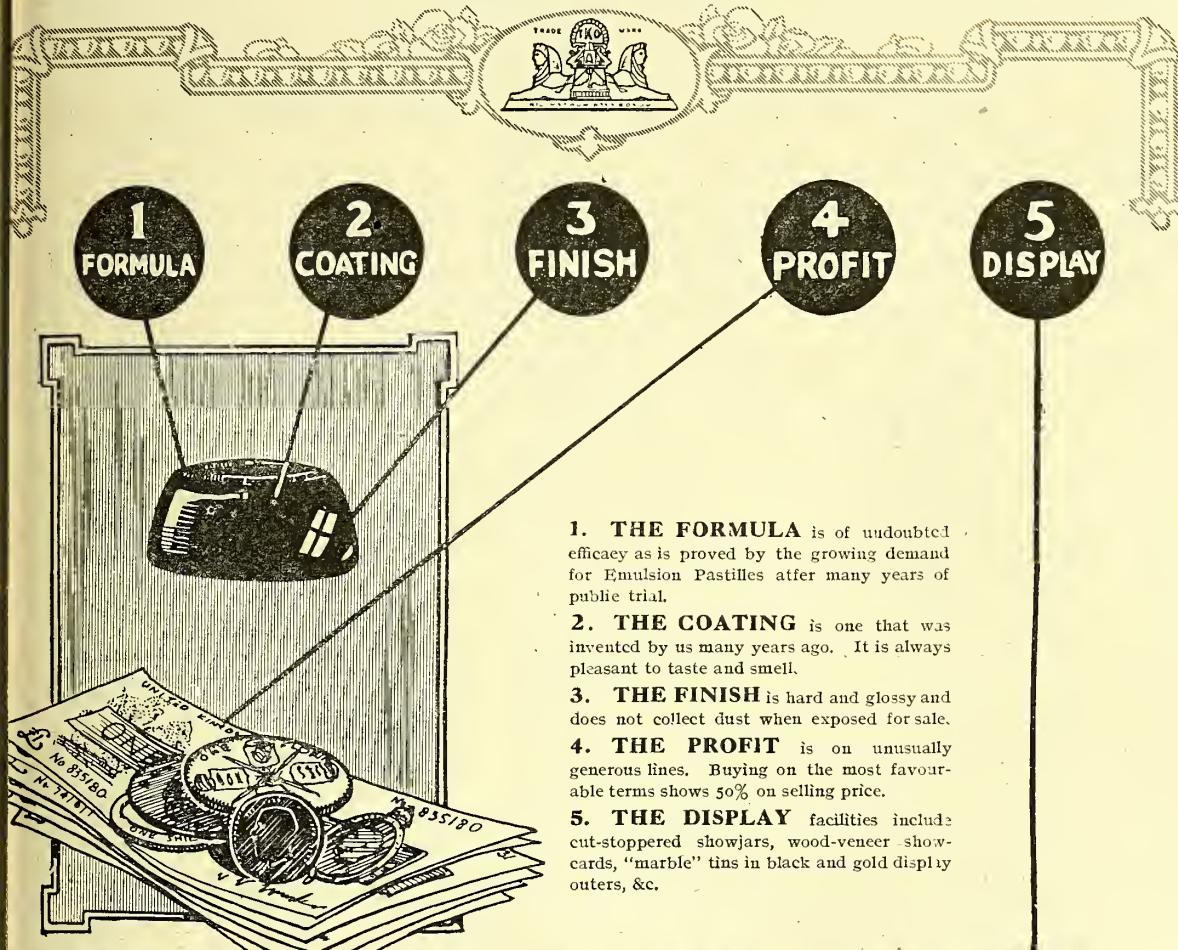

Special Display Terms

Net prices per dozen tins, after deducting discount and Special Display terms, are as follows :—

Retail Price	£3 orders	£6 orders	£12 orders
	PER DOZEN	PER DOZEN	PER DOZEN
1/6 Glaxo	14/1	13/8	13/-
2/6 „	23/5	22/10	21/7
4/6 „	42/2	41/-	38/11
7/6 „	70/2	68/5	64/10

Orders for Glaxo on these special terms can be executed by any of the Official Glaxo Distributors, to whom they will be passed, if desired, by

THE SALES MANAGER
GLAXO HOUSE, 56 OSNABURGH STREET
LONDON, N.W.1

1. THE FORMULA is of undoubted efficacy as is proved by the growing demand for Emulsion Pastilles after many years of public trial.

2. THE COATING is one that was invented by us many years ago. It is always pleasant to taste and smell.

3. THE FINISH is hard and glossy and does not collect dust when exposed for sale.

4. THE PROFIT is on unusually generous lines. Buying on the most favourable terms shows 50% on selling price.

5. THE DISPLAY facilities include cut-stoppered showjars, wood-veneer showcards, "marble" tins in black and gold display outers, &c.

EMULSION ANTISEPTIC THROAT PASTILLES

EMULSION Throat Pastilles (Kerfoot) have never been advertised direct to the public and rarely to the trade, yet the demand for them has been continually increasing for many years. And this is not surprising when one remembers their medicinal efficacy, their hard glossy finish (reminiscent of the highly polished lustre of good coach-work), their effective display matter and generous profit.

PRICES : In Bulk 3/- per lb. Reduction on 14 lb. and 28 lb. orders. Packed in "Marble" Tins, 9d. size, 5/6 dozen. 1/4 size, 1/- dozen. Bonus on orders for one gross tins.

NURSE HARVEY'S MIXTURE

A safe, simple, and reliable remedy for Children's Ailments is advertised so extensively in the daily and weekly Press as to bring mothers to the retailer without effort on his part.

The selling has been done before the mother reaches the chemist, and, having supplied her, it is only common sense to claim she will buy other family necessaries from him. Moreover, the retailer has a profitable return on a quick turnover.

For Direct Terms apply to—

MALT EXTRACT Season

HAVE WE HAD YOUR ORDER YET?

FOUR months of heavy Malt Extract trade are still available—you can make a good share *yours* by showing one of our handsome, well-labelled packs along with the display matter we send.

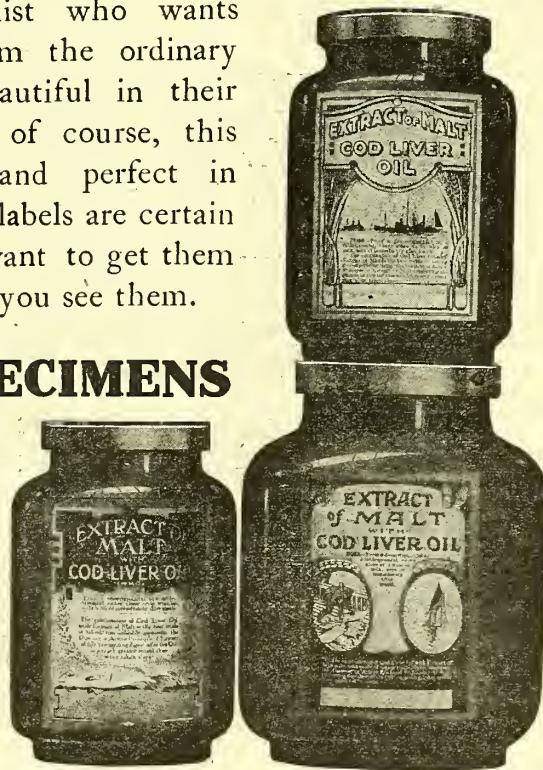

And now to late buyers we have an extra inducement to offer—we have just had two extra specially handsome designs prepared exclusively for the chemist who wants something well away from the ordinary in own-name labels. Beautiful in their bright colouring (which, of course, this block cannot suggest), and perfect in lettering and design, these labels are certain to please you—you will want to get them in your window as soon as you see them.

SEND FOR SPECIMENS

and at the same time indicate your season's Malt and Oil requirements, when back by return will come the sample labels, along with a price which you will find it difficult indeed to beat.

SUTTON'S

CALVES FEET JELLY

When the doctor orders Calves Feet Jelly he has in mind a product fresh from the makers. This standard of absolute freshness is possible only where the preparation of Calves Feet Jelly is regular and constant.

In order to meet normal demand, it has always been Sutton's practice to prepare fresh supplies every week. Hence the reputation of Sutton's Calves Feet Jelly (made from genuine feet), as an article of highest purity, full food value, great palatability and absolute freshness.

PLAIN AND IN USUAL FLAVOURS

200 YEARS

*Continual demand
for the Original!*

Sell your customers the Eau de Cologne that has been used by every ROYAL COURT in EUROPE, viz. the "GENUINE & ORIGINAL."

For over 200 years it has been used and its superiority realised by all classes, so much so that over 50,000 dozen alone were sold annually in this country without a penny being spent on Advertising.

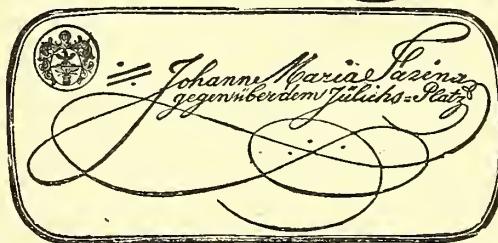

To-day it is again coming into its own, as the first and best Eau de Cologne.

SPECIAL XMAS OFFER:

Remember, the "GENUINE AND ORIGINAL" was manufactured by JOHANN MARIA FARINA IN 1709, and bears the Label reprinted here:
(No other can be the Genuine or Original.)

A limited supply is now available for the Christmas Trade, and prices, with particulars of special terms showing a handsome profit, will be readily forwarded on application to the Sole Agents.

THERE are some lines that you stock that only have a Season's trade, and most lines that you stock show you far less than 100% profit. Would it not be profitable to give serious thought to a line that sells all the year round—a line that is wanted by everyone and shows a 100% profit to you? **THIS LINE IS "LITTO."** "LITTO," as you may know, is a preparation that is unexcelled for the treatment of all hair troubles. There are several varieties of "LITTO," which have been specially prepared to be of the utmost benefit in the treatment of one or other of the hair disorders that are so prevalent.

"LITTO" Sebacoid stops hair from falling and promotes a new growth. "LITTO" Standard, a daily dressing, keeps the hair in condition. "LITTO" Special for excessive greasiness. "LITTO" Fixo controls the hair, and "LITTO" Alopecoid is the recognised remedy for that troublesome complaint Alopecia, and is guaranteed to fulfil the claims made for it.

Many Chemists are doing a big "LITTO" business. If you are not one of these, let us help you to build it up.

A GREAT TOILET COMFORT. "POUDRE DE SANTÉ."

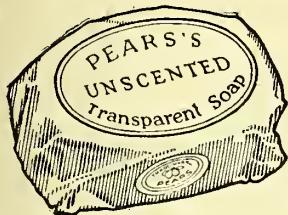

IN the way of toilet powders POUDRE DE SANTÉ is "off the beaten track," and has not one single drawback. It is effective, convenient, absolutely harmless, pleasant to use, and neither injures nor discolors the underwear. It prevents all tendency to chafing, and completely obviates all the unpleasantness of

PERSPIRATION

and being a perfect deodorant corrects instantly all body odours. The preparation sells at sight wherever shown, and is a fine well worth taking up. The retail prices are 1/3 trial size, 2/9, 3/9, 4/9, less 33% to 40% discount according to quantities, and carriage paid on large or small orders. Liberal terms to export buyers. Agents wanted for home and abroad.

Pertinent PARS

for
PHARMACISTS

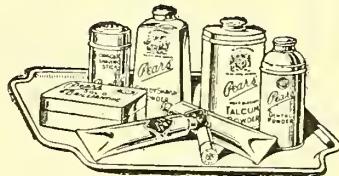

Modern manufacturing is on so large a scale that it is impossible to stock everything and difficult to know what to accept and what to refuse.

Plenty of manufacturers do little or nothing to help the Pharmacist after he has given his order. This is bad policy.

Select your stock from among those manufacturers who, like the makers of Pears' Unscented Transparent Soap, study your interest, and do all in their power to help you clear the goods they sell you.

Compounded UP TO A STANDARD

(*The Highest Possible*)

Never DOWN TO A PRICE

these lines are as near perfection in their respective fields as it is humanly possible to get them, regardless of cost or selling price. Your customer requires no persuasion after he has once given our preparations a trial. He then KNOWS they are just what he wants and is interested in no others. In other words—after you make the first sale these goods go on selling themselves.

ALKIA SALTRATES

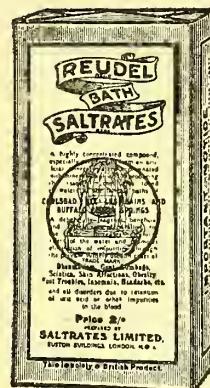

The most efficient Saline on the market and the best value for the money. Pleasant tasting and always satisfies the user. Widely advertised for Rheumatism, Gout, Sciatica, or any Liver, Kidney, Stomach, Intestinal or Blood Disorders, Catarrhal Affections, etc.

Sells at 3/3 (P.A.T.A.).

REUDEL BATH SALTRATES

The best selling and most fragrant, refreshing, beneficial and all-round satisfactory preparation for the bath — especially recommended for Corns and all Foot Troubles, Rheumatic Pains, etc.

Sells at 2/- and 3/3 (P.A.T.A.).

SHOPFITTING & EQUIPMENT IN ALL ITS VARIOUS ASPECTS.

CHEMISTS and PERFUMIERS requiring new premises or contemplating structural alterations or buying sundry fittings are invited to place before us their enquiries, on receipt of which we will be pleased to submit a sensible estimate for the best possible workmanship in competition. The nature and extent of the enquiry is of little consequence, an equal service and grade of workmanship being allowed for in all prices.

We are in the position to guarantee this service, whether the enquiry be for a Sign or a range of Shopfronts, owing to the efficiency of our world-wide Organisation, which is based on the soundest of business principles—the satisfied customer—repeat orders—value for money. Write for Catalogues of Sage Equipment and Production.

We specialise in Showcases and Display Fittings in endless varieties for the better display of all goods and proprietary articles.

**WRIGHT'S
St Andrew
Gas-Steam
RADIATORS**

*Send for our
free
BOOKLET*

With this Valve, Perfect Heating now becomes CHEAPEST HEATING

No Heating System has the SIMPLICITY and ECONOMY of Wright's "St. Andrew" Gas-Steam Radiators. Shops and Stores all over the country find that, once they have these Radiators, their Heating troubles vanish. These Radiators have a Patent Economy Valve which, as soon as the Shop becomes comfortably warm, cuts down the gas supply automatically, keeping it at just the small amount necessary to maintain the right temperature. These Radiators are as simple as a Gas Fire, lit up in a moment and turned off when not needed.

Moreover, any number of Radiators may be used at one time. Nothing can get out of order, and they are in every way the ideal system of Heating for present-day requirements of economical working.

*With the "St. Andrew" there is no trouble,
as with other Radiators, in frosty weather.*

Ideas

We invite contributions to this section.

Many liquids, when contained in bottles, are best kept inverted, but on the shelves of the pharmacy an inverted shop-round would certainly call for explanation. It would necessitate a new form of bottle which should be artistic and easily manipulated. This might take the form of the wineglass foot, but with a pyramid base. For such things as liq. plumbi, acet. and hydrocyan dil., etc., the shape might be very acceptable.—X. Y. (1/11).

* * * *

Many large advertisers do not appear to realise the advertising possibilities of envelope enclosures. This method of advertising costs nothing at all for distribution, and is an improvement on the large circular crammed with printed matter. A well-planned enclosure slip, cut just to fit an envelope, containing a short, crisp statement, effectively presented, will seldom fail to gain attention. These should also be enclosed in every letter and parcel sent out.—H. E. K. (10/9).

English and Welsh News

The Editor would be obliged if subscribers will send him marked copies of newspapers containing items of interest for insertion in this or other news sections.

Proprietary Articles Trade Association

In accordance with recent custom, the names of four members of the Retail Section of the Council of the P.A.T.A., who are to retire this year have been chosen by ballot. The four retiring members are: Mr. N. N. Armitage, Dr. A. J. Barnes, Mr. A. R. Keith, and Mr. J. Milner. These are eligible for nomination and re-election, and members of the Retail Section are invited to nominate candidates for the four vacancies. These should be received by the secretary at 18 Tavistock Square, London, W.C.1, not later than December 3.

Institute of Chemists-Opticians

A general meeting of the Institute of Chemists-Opticians was held at Oakley House, Bloomsbury Street, London, W., on November 15, Mr. S. W. Harrison in the chair. It was pointed out that, since the Institute was formed in 1906, upwards of 700 chemists have taken its certificate. There is to be a new syllabus for future examinations, beginning in 1924, and post-graduate lectures are being arranged for members. Student-associates could join as such, and obtain free tuition with a view of becoming members. It was the general opinion of the members that the Government should bring in an Optical Bill on the lines of the Dental Bill, in the interests of the public. The following officers were elected:—President, Mr. S. V. Brook (Clapham); Vice-President, Mr. S. W. Harrison (Chiswick); Secretary, Mr. J. J. Laws (South Kensington). The following members were elected to the Council:—Mr. G. W. Brook (Clapham), Miss E. G. Laws (Shepherds Bush), Mr. W. T. Stoyle (Acton), and Mr. A. C. Roskrow (Bedford Park). The next general meeting will be held at the Institute at 2.30 p.m. on November 29, when all chemists who practise optics, or intend to do so, will receive a cordial welcome.

Poisonings

The following cases of fatal poisoning, among others, have been recorded since our last report:—

At Goole, Percy May, ship's steward, opened what he believed to be a bottle of Belgian beer in his cabin. The contents, however, proved to be a fluid used in deck cleaning and containing sulphuric and carbolic acids. May died in hospital.

An inquest was held at Evesham, recently, on the body of Mr. Basil Guy Gerrard Alabone, King's Road, Bengeworth, a director of Alabone & Co., Ltd., chemists, Port Street, Evesham. Evidence given by the widow and others showed that Mr. Alabone had been worried about business and had been medically attended: death was due to a poison of the "cyanide group." It was found to be a case of suicide during insanity, and the coroner expressed sympathy with Mr. Alabone's family.

Birmingham

Birmingham and Midland Eye Hospital celebrates its centenary this year. The head dispenser and radiographer is Mr. W. E. Meggeson, chemist and druggist.

The Students' Association of the Birmingham School of Pharmacy proposes to hold a whist-drive and fancy dress dance carnival at the Imperial Hotel on December 5.

Among the subscribers to the Lord Mayor's fund for the unemployed are Cadbury Brothers, Ltd., £1,000; Mr. and Mrs. Barrow Cadbury, £250; Alderman W. A. Cadbury, £200; other members of the family, £250; Southall Brothers & Barclay, Ltd., £100; Alderman F. C. Clayton, Ph.C., £50.

At a lecture on the "Sense Organs of Plants," by Professor R. H. Yapp, in the Midland Institute, on November 15, the Lord Mayor, who presided, referred to the extensive botanical collections in the city natural history museum. Upwards of 20,000 specimens have

C C

now been mounted, named, classified and made available for use by the public and students.

Liverpool

Heaths, Ltd., have recently acquired the old-established business of Mr. J. M. Davidson, London Road.

"Don't just hope for the best; let us supply you and then you will have it," runs a window-bill of an enterprising chemist and druggist.

Complaints are voiced on all sides at the disturbance of business owing to the General Election. By sudden changes the weather does something to vary the demands on the drug trade.

Heavy penalties were inflicted by the Liverpool stipendiary on November 15 on seven men found guilty of unauthorised possession and handling of cocaine. Frederick Walker (34), a seaman, was sentenced to four months' imprisonment and fined £50 on a charge of bringing 13 oz. of cocaine from Hamburg. A similar sentence was imposed on Abraham Taylor (38), pedlar, and Nicholas Jakomis (31), a Greek seaman, for attempting to dispose of the drug; another Greek, Elias Liasides (28), in view of a previous conviction, was sentenced to twelve months' imprisonment, and Victor Jarvis (23), general dealer, John Larkin (26), dock labourer, and Mark Lazarus (30), unemployed cinema operator, were each sentenced to three months' imprisonment with hard labour for being concerned in the traffic.

Manchester

As will be seen from the "Personalities" column in this issue, Sir William Veno has been elected Mayor of Altringham.

The Manchester and Salford formulary for Insurance dispensing has recently been received by every chemist on the panel. On the first page is the note:—

The contents of this formulary have been submitted to, and approved by, a Conference representative of the Manchester and Salford Local Medical and Panel Committees and the Manchester and Salford Pharmaceutical Committees. The booklet contains eighty-three formulas and a list of twenty-seven "Tariff pills," which are of 4-gr. strength, except pil. ferri (5 gr.) and pil. quin. sulph. (1 gr. and 2 gr.); all the other pills are B.P.C. In the preface many useful hints are given, and it is explained that "any criticisms or suggestions for improvement that may be sent in by users of this formulary will be welcomed and duly considered by the Manchester and Salford Panel and Pharmaceutical Committees, and revision can be undertaken as may become necessary." The new formulary should secure more uniformity in the prescribing and dispensing in Manchester and Salford. It does not come into force before December 1.

Portsmouth

Business, if not exactly brisk, is hopeful, and travellers report good sales in winter lines, luxuries excepted.

Mr. A. B. Sparrow has again had a success in a window-dressing competition arranged by the British Association of Display Men, the window-dresser, Miss M. Tee, taking the third prize.

The pharmacists' football team played their initial match at Botley, recently, beating their opponents, Southampton chemists, by three goals to nil. The scorers were Messrs. Nightingale, Parsons and Ramage.

Great interest continues to be taken in the meetings of the local Association. Notwithstanding fine weather and outdoor attractions, a large gathering heard Dr. Meluish's lecture on "Foods." The lecture itself was neither too deep nor too dry, and a pleasing feature was the number of students from the Municipal College who had accepted Mr. Atterbury's invitation to attend.

At a special meeting of Portsmouth Town Council, on November 20, it was decided to confer the freedom of the borough on the ex-Mayor, Alderman F. G. Foster, J.P., chemist and druggist, in appreciation of his services during the past thirty years. Alderman Foster's efforts have been mainly directed towards raising the

standard of education, he having been chairman of the education committee since its inception. A notice is down to elect him and his daughter, Miss Doris Foster (ex-Mayoress), to honorary rank in the governing body of the Royal Portsmouth Hospital. This is appropriate appreciation of the fact that Alderman Foster has, by his efforts, put practically every local charity on a good financial footing.

Sheffield

Mr. Glover, Bridgehouses, has arranged two tasteful window-displays, depicting the preparations of D. & W. Gibbs, Ltd., and Icilma products.

Mr. G. T. C. Dyson, chemist and druggist, son of Mr. W. H. Dyson, chemist and druggist, Westbar Green, has opened a pharmacy in Barrow Road, Wincobank.

Mr. J. T. Appleton has been elected to the Medical Benefit and Finance Subcommittees of the Insurance Committee, and to the Prescription Subcommittee of the North-East Midland Pricing Bureau.

Mr. C. H. Bradwell, chemist and druggist, has commenced business in Shoreham Street. Mr. Bradwell, who was apprenticed with Mr. George Squire, Ph.C., Haymarket, was for some time on the staff of Burroughs Wellcome & Co.

Miscellaneous

PHARMACY HOCKEY LEAGUE.—In a match between Burroughs Wellcome & Co. and the "Square," played at Edgware on November 17, the former maintained their unbeaten record by winning by three goals to nil.

WINDOW-DRESSING AWARDS.—At the recent Aldershot shopping week window-dressing competition, the first prize in the class open to chemists was awarded to Boots, Ltd., the second to Timothy White Co., Ltd., and the third to Allen & Lloyd, Ltd.

IN THE COURTS.—At Westminster Police Court, London, on November 19, Josephine Scott, described as independent, was fined £11 11s. 9d., with £1 1s. costs, for knowingly concealing fourteen bottles of eau de Cologne at Victoria Station on arriving from France.

SALE OF POISONOUS SUBSTANCES BY OILMEN.—At a recent Council-meeting of the Metropolitan Grocers', Provision Dealers' and Oilmen's Association, the attention of oilmen was called to the necessity of carefully observing the provisions of the Poisons and Pharmacy Act by selling Section 5 poisons in poison-bottles duly labelled.

SUPPLY OF CALF LYMPH.—In reply to questions in the House of Commons on November 15, the Minister of Health stated that there is no difficulty in obtaining from reputable firms supplies of glycerinated calf lymph of reliable quality. The suggestion that supplies of Government lymph should be procurable at a reasonable charge by private medical practitioners would involve a large and costly extension of the present Government supply for which at present there is no need.

BOTANICAL SOCIETY FORMED.—A botanical society has been formed in connection with Sunderland Technical College. The majority of the members are pharmaceutical students, although this is not a condition of membership. The officials are: President, Mr. V. A. Mundella, M.A. (Principal of the College); Vice-Presidents, Messrs. W. J. Atkinson, W. Hird, W. Hood, and Miss H. C. M. Winch, Ph.C.; Secretary, Mr. E. N. Browne. Any old students of the college are eligible for membership, and can obtain particulars from the secretary.

SPORTS CLUB FOR CHEMISTS.—The recently formed Milton Hall Sports Club, Loughborough Park, Brixton, London, S.W., has four pharmacists on its committee, Messrs. Langford Moore, Neville Curtis (Menley & James, Ltd.), G. Barratt (President, South-Western (London) Pharmacists' Association), and Dan Davies (President, "U.C.A.L."). An invitation is extended to chemists and their assistants to join the tennis and bowling sections, for which there will be six courts and two greens. Further particulars may be obtained from Mr. G. Barratt, 261 Coldharbour Lane, Brixton, or Mr. Dan Davies, 324 Coldharbour Lane, Brixton.

Irish News

Brevities

It is proposed to establish in Coleraine a district nursing and child welfare centre at a cost of £6,000.

Negotiations between the Chemists' and Druggists' Society of Ireland and the Ulster Retail Drug Trade Association, regarding the registered druggist status, have not yet been completed. Proposals have been submitted to the druggists as to the examination, and further joint committee meetings have been held. No scheme for the new pharmaceutical society for Northern Ireland can be submitted to the Government until some agreement has been arrived at.

Dublin

Hayes, Conyngham & Robinson, Ltd., have purchased the prescription books of the Junior Army and Navy Stores, D'Olier Street, Dublin.

Mr. James McQuirk, 17 Eustace Street, Dublin, has been appointed sole resident representative for Ireland for Solport Brothers, Ltd., 184-190 Goswell Road, London, E.C.

The Minister for Finance, replying to Mr. Johnson (co. Dublin) in the Dail Eirann, said that patent medicines duty had never been levied in Ireland. Patent medicines were not liable to duty in the Saorstat, and there was no information available as to the annual value or quantity of patent medicines sold in the Saorstat.

In the Chancery Division, Dublin Law Courts, on November 19, in the matter of the estate of Thomas Drummond Lambert, deceased, veterinary surgeon, late of Dublin, Mr. Walker applied, on behalf of Mr. Wm H. Lambert, to whom a grant of administration intestate of the deceased had been made, for an order that he be at liberty to advertise for offers for the sale of the goodwill and trade-name of Reducine, and to take the necessary steps to have the registrations of the name kept in force in the United Kingdom and foreign countries. Counsel stated that the deceased, in addition to his profession as veterinary surgeon, had carried on a business for the manufacture and sale of Reducine, which was a prescription of his own invention for the treatment of horses. It was necessary for the purposes of administration that all the property of the deceased should be realised. The registration of the trade-name was for a limited period; and these periods had come to an end in certain countries, and in others were coming to an end. The Master of the Rolls said it was quite proper to sell this, and he should say that the best way to sell it would be by advertisement, by inviting tenders. Mr. Sharpe (solicitor): We are in communication with a gentleman in the United States for sale there, and I told him that the matter would be brought before the Court. The Master of the Rolls made an order giving liberty to sell Reducine out of Court and to advertise it, inviting tenders either in one lot or several lots, as it might be advised, and giving liberty also to the administrator to have the registration of the trade-name re-registered or extended as he might be advised.

Brevities

Kilwinning Co-operative Society, Ltd., will shortly open a drug department in Main Street.

The recent colder weather has materially assisted the sales of extract of malt preparations and skin creams.

Mr. R. S. Ramsay, chemist and druggist, Cardenden, has been elected bard of the Auchterderran Burns Club.

Glasgow

The fittings and stock of the Glasgow School of Pharmacy, India Street, were sold by auction on November 13.

Mr. H. G. Gray, chemist and druggist, 246 Crown Road, Partick, Glasgow, has taken over the business of Messrs. Keith & Lee, chemists, 1067 Cathcart Road.

British Empire Exhibition

THE details that we have given in recent issues concerning arrangements for an exhibit at the British Empire Exhibition (1924) illustrative of recent progress in chemistry may now be supplemented by a list of the sections and the convenors. A committee of the Royal Society is dealing with an exhibit illustrating, so far as space permits, researches in various branches of pure science other than chemistry; and great care has been taken to avoid overlapping. The space at the disposal of the committees is limited; but anyone who is able and willing to assist in the chemistry exhibit should communicate with Dr. Levinstein, at 166 Piccadilly, London, W.1, or any of the convenors of sections. The names and subjects are as follows:—

Dr. E. F. Armstrong, Greenback, Latchford, Warrington	Catalysis : Hydrogenisation of Fat. Bio-chemistry
Dr. J. L. Baker, Dial Cottage, Cookham Road, Maidenhead	General Inorganic Chemistry
Professor E. C. Baly, The University, Liverpool	Hydrogen-ion Concentration
Mr. A. Chaston Chapman, 8 Duke Street, Aldgate, London, E.C.3	Cellulose
Mr. C. F. Cross, 4 New Court, Lincoln's Inn, London, W.C.2	General Physical Chemistry
Professor F. G. Donnan, University College, Gower Street, London, W.C.1	Terpenes
Professor G. G. Henderson, The University, Glasgow	Organic Chemistry Alkaloids
Dr. T. A. Henry, Wellcome Chemical Research Laboratory, 6 King Street, London, E.C.1	Plant Colouring Matters
Professor I. M. Heilbron, The University, Liverpool	Coal Tar Colouring Matter
Dr. J. T. Hewitt, Manor House, Sutton, Heston, Hounslow	Chemical Engineering
Professor J. W. Hinchley, Institution of Chemical Engineers, Abbey House, Victoria Street, London, S.W.1	Sugars
Principal J. W. Irvine, University House, St. Andrews	Valency Theories and Theories of Chemical Combination
Dr. Arthur Lapworth, The University, Manchester	Colloids
Professor J. W. McBain, The University, Bristol	Crystallography and Crystal Structure
Sir Henry Miers, Birch Heys, Cromwell Range, Fallowfield, Manchester	Plastics
Dr. W. R. Ormandy, 18 Belsize Grove, Belsize Park, London, N.W.3	Alkaloids
Professor F. L. Pyman, College of Technology, Manchester	Historical
Mr. R. B. Pilcher, Institute of Chemistry, 30 Russell Square, London, W.C.1	Agricultural Chemistry
Sir John Russell, Rothamsted Experimental Station, Harpenden	Photography
Dr. T. Slater Price, British Photographic Research Association, 30 Russell Square, London, W.C.1	Flame, Fuel and Explosion Waves
Professor A. Smithells, 68 Lissenden Mansions, Highgate Road, London, N.W.8	Apparatus
Commander R. E. Stokes-Rees, Institution of Petroleum Technologists, 5 John Street, Adelphi, London, W.C.1	General Organic Chemistry

GERMAN PRICES RISING IN ITALY.—In a commercial report on the Milan chemical and drug markets, issued by the Mutua Farmaceutica Italiana, the following remarks appear: "The usual intermittent increases in prices for the Bayer products are now issued every fortnight, and judiciously alternate so as to raise in turn the price for this or that article to an almost impossible level. The same applies to the Meister Lucius products, which have become almost unobtainable, and also to Merck's products, the prices of which change and advance methodically from day to day."

Legal Reports

Committal Order Refused.—In the Mayor's and City of London Court, on November 16, T. H. Ford, Ltd., surgical dressings manufacturers, 6 Well Street, E.C., applied to have Mr. M. Cox, 64 Boundary Read, Walthamstow, E., described as a chemist, committed for non-payment of £6 2s. due for goods supplied. The defendant said he could not pay the amount; he had no means. Business was an absolute failure. He did not wish to evade payment of the debt; he was living by the help of his friends. Plaintiffs' representative said that the defendant had offered half the amount, but they would not accept it. Judge Shewell Cooper said that on the evidence before him he could not order the defendant to pay anything. The plaintiffs might reconsider the offer. He hoped that the defendant would do his best to pay the debt. Defendant: Certainly I shall.

Misrepresentation Claim Abandoned.—In the King's Bench Division of the High Court, London, on November 21, the Lord Chief Justice and a special jury heard an action by the Milton Manufacturing Co., Ltd., Bunhill Row, London, E.C., against Mr. William Dick Forbes, Pinner's Hall, E.C. The plaintiffs sued the defendant for the sum of £6,800, which represented the balance of the price of 12,500 £1 preference shares in the company, with interest. Mr. Forbes counterclaimed for a rescission of the agreement to purchase the shares, alleging that he purchased them because of misrepresentations made by Mr. D. M. Rogers, managing director of the plaintiff company. Those representations were that £100,000 would be spent in advertising, and that the market for the disinfectant in America was wonderful, and justified the building of a factory there. The defendant alleged that the company had had losses in America, and no factory had been built there. Mr. Forbes gave evidence in support of his allegations. In cross-examination, he agreed that the directors of the company took up 27,000 shares out of the 100,000, and the people who under-wrote most of the 73,000 had paid up. He also agreed that it was necessary that the company should have money with which to advertise and push their goods in America. It was a fact that delay had occurred through the difficulty of getting the American authorities to accept the labels on the bottles, while the agents there owed the company a huge sum on contracts. At this stage the defendant submitted to judgment on the claim and counterclaim. The Lord Chief Justice, in entering judgment accordingly, with costs, said that the defendant gave his evidence with candour, but would have had some difficulty in succeeding.

Dangerous Drugs Act Fine.—At Manchester City Police Court, on November 16, Hough, Hoseason & Co., Ltd., manufacturing chemists, Bridge Street, were summoned for having supplied morphine sulphate hypodermic tablets to Harry Fulford Peterson without taking reasonable precautions to satisfy themselves that he was licensed or authorised to be in possession of the drugs, contrary to the Dangerous Drugs Act, 1920, and for failing to make entries of the transactions in the registers required by the Dangerous Drugs and Poisons (Amendment) Act and the Pharmacy Act. Mr. F. Webster, assistant solicitor to the Manchester Corporation, prosecuting, said that Peterson was now serving a sentence of twelve months' imprisonment at Liverpool for being in unauthorised possession of the drugs. Mr. A. E. Jalland, barrister, defending, admitted that his clients had been imposed upon by Peterson, who not only represented himself to be a doctor, but actually used the name of a doctor who was known by repute to them and whose name appeared in the Medical Directory. Peterson was a hospital attendant. The prescriptions were properly made out and signed. Peterson, who had a good deal of medical knowledge, conversed freely with the staff of the defendants upon medical matters, and showed an intelligent interest in instruments used in the profession. The drugs ordered by him were in such quantities as any ordinary medical man might require. The chairman said that Messrs. Hough,

Hoseason & Co. had been duped by a clever man, but the Bench were not satisfied that they had taken all reasonable precautions to assure themselves that Peterson was a properly authorised person. A fine of £50 was imposed for supplying, together with fines of 20s. each on two summonses for failure to make entries, and £2 2s. costs.

Goods Supplied without Authority.—At Lambeth County Court, on November 16, Boots Cash Chemists (Southern), Ltd., Nottingham, brought an action against George Stannard, gentleman, Chesnut Road, West Norwood, claiming £14 9s. 6d. for toilet requisites supplied to his adopted daughter. Mr. R. Horner Hargreaves, for the plaintiffs, said the goods were supplied on the order of the defendant's adopted daughter. Goods had been supplied to him for the last three or four years, which were ordered by this young lady, and they had always been paid for by defendant without demur. Mr. Frederick Charles Mills, chemist and druggist, manager of plaintiffs' branch shop at West Norwood, said he had known defendant more than three years. His adopted daughter had repeatedly ordered goods. The bills were sent to defendant, and he came into the shop to pay for them. This particular order was given in the usual way by Miss Stannard. Mr. Lawson Walton, for defendant, said the fact was that Mrs. Stannard and their adopted daughter went to New York a few days after the goods were ordered, and it was not till after they had been away some time that he received the bill. His adopted daughter had written him a letter from France before her departure for New York, saying that "I had to have a few necessaries, so I got them. My mother knows nothing about it." Judge Parry: Face cream and powder are not necessities. Mr. Walton: There was no authority given to the young lady to run up a bill to this amount. His honour, after examining the old bills, said that defendant never had a bill for a large sum like this before. The items were chiefly for household use. Mr. Mills added that the order was given a few days before Christmas, and he did not think Miss Stannard wanted the articles all for her own use. She might be taking them as presents. Mr. Stannard, giving evidence, said that he gave Miss Stannard no authority to order any goods. She took the bill with her to France, and till then he knew nothing about it. Mr. George William Chambers, an assistant at the shop, said that defendant's adopted daughter had repeatedly ordered goods; next day defendant came in and paid the bill. With regard to this transaction, he thought it was a rather large order, but it was given close to Christmas. Judge Parry said he had come to the conclusion that the goods were ordered without the defendant's authority, and were practically obtained by misrepresentation. Plaintiffs would not have supplied the goods if they thought she had not her father's permission to order them. He gave judgment for defendant, but without costs.

RECEIVING ORDER AND ADJUDICATION
AUSTIN, J., 436 Cleethorpe Road, Great Grimsby, chemist.

A HANDSOME GIFT.—Consols of the value of £3,400 have been presented to Pershore Cottage Hospital by Miss Allen, Cheltenham, daughter of the late Mr. Francis Allen, at one time in business in Pershore as a chemist.

A PRESENTATION of a framed photograph of twenty-five employees of Mander Brothers, colour manufacturers, Wolverhampton, each with forty years' service or more, has been made to Sir Charles Mander.

New Companies and Company News

P.C. means Private Company and R.O. Registered Office

RENDELL & ROBERTS, LTD. (P.C.)—Capital £500. Objects : To take over the St. Mark's Pharmacy at 523 King's Road, Chelsea, S.W. The first directors are : Evelyn D. C. Rendell, chemist and druggist, and Emma J. Roberts, dispenser. R.O. : 523 King's Road, Chelsea, London, S.W.

BELLAMY & WAKEFIELD, LTD. (P.C.)—Capital £3,000. Objects : To take over the business of manufacturing, wholesale and retail chemists, druggists and drysalters, carried on at 1 Easy Row, Birmingham, as "Bellamy & Wakefield," and to adopt an agreement with F. A. Thomas. The directors are : F. A. V. Thomas, chemist, and Mrs. B. J. Thomas, and F. H. Alcock.

SENIOR, CROZIER & CO., LTD. (P.C.)—Capital £5,000. Objects : To take over the business of wholesale and retail chemists and druggists carried on at Union Works, Union Street, Stratford, E., as "Senior, Crozier & Co.," and to carry on the same and the business of dentists, opticians, etc. The first director is F. W. Fitzgerald. R.O. : Union Works, Union Street, Stratford, London, E.

JOHN J. CLARK & CO., LTD. (P.C.)—Capital £1,500. Objects : To take over the pharmacy of F. S. Hankinson at 1 St. Thomas's Street, London Bridge, S.E.1, and to carry on the business of wholesale and retail chemists and druggists, dentists, dealers in photographic supplies, etc. The first directors are : F. S. Hankinson, chemist, and J. J. Clark, chemist. R.O. : 18 Southwark Street, London, S.E.1.

SANAPHOS, LTD. (P.C.)—Capital £2,000. Objects : To acquire the trade-mark, patent or licence known as "Sanaphos," to adopt an indenture with the British Milk Products Co., Ltd., and M. Cohen, and to carry on the business of manufacturers of foods, medicinal preparations, casein and other products derivable from milk, etc. Solicitors : C. Butcher & Simon Burns, 32 Gresham Street, London, E.C.2.

L. B. BAYNARD, LTD. (P.C.)—Capital £1,100. Objects : To acquire the drug business carried on at 133 Western Road, Hove, and to carry on the business of chemists, druggists, patent medicine proprietors and vendors, stationers, wine and spirit merchants, dealers in photographic materials, etc. The first directors are : L. B. and Mrs. Hannah J. Baynard, and L. D. Franklin, chemist and druggist. R.O. : 133 Western Road, Hove.

POTTS' INFANTS' FRIEND, LTD. (P.C.)—Capital £1,000. Objects : To take over the business of manufacturers of medicines and preparations carried on by Chas. Potts, Ltd., together with the recipes and information relating to the processes of manufacturing and the right to manufacture and deal in the medical preparations known as "Potts' Infants' Friend." The directors are : R. C. S. Potts, A. R. Brailsford and F. Fisk. R.O. : 166 Bath Street, Ilkeston.

PARK'S DRUG STORES, LTD., announce the payment on November 30 of an interim dividend of 2½ per cent., less income tax, on ordinary shares, for the half year ended August 31.

POULENC FRÈRES.—The balance-sheet of the well-known French chemical firm, Etablissements Poulenç Frères, which manufactures a large number of extensively used pharmaceutical products, closes with a surplus of 6,128,014 francs, an increase of no less than 3,914,843 francs over the profit realised in the preceding year. The Board, in presenting the balance-sheet, stated that sales had increased by 30 per cent., and that they could congratulate themselves on their excellent position, particularly in view of the present general economic situation, which promised to be maintained. Also, it was stated, the firm had no reason to fear the reappearance of Germany in the world's chemical markets. A sum of over 500,000 francs was set aside for research work.

Pharmaceutical Society of Great Britain

Brighton.—The Brighton and Hove Branch of the Pharmaceutical Society held a meeting recently, at which an interesting lantern lecture was given by Mr. Percival Padwick, Redhill, entitled *Off the beaten track with a camera*. The lecturer had experienced many happy adventures in his tramps over the North Downs and Weald, and at the same time secured a charming collection of photographs. Most of the audience were surprised to learn that charcoal and lime burnings are still carried on under primitive conditions, in isolated districts. Many of the slides possessed high technical merit, and included some of the rare orchids on the Downs. The President of the Branch, Mr. Edgar Jones, was in the chair. A hearty vote of thanks was accorded Mr. Padwick, and Mr. Burgess expressed the indebtedness of the audience to Mr. and Mrs. Henry Mackie for refreshments.

Cardiff.—The annual meeting of the Cardiff, Penarth and Barry Branch of the Pharmaceutical Society was held on November 13, Mr. Leo Joseph, J.P., in the chair. The secretary (Mr. Hague) presented the annual report and balance sheet, the balance in hand being £3 4s. 6d. The report was unanimously adopted. The following officers were elected : *Chairman*, Mr. Leo Joseph; *Vice-Chairman*, Mr. J. Blake Benjamin; *Treasurer*, Mr. D. Brims; *Secretary*, Mr. S. W. Hague. The following were elected additional members to the Committee : Messrs. A. S. Johnson, S. H. Willis, and S. B. Eason. Mr. Hague reported on the R.P.U. Conference in London. A discussion was introduced on inclusive subscriptions to the R.P.U. and local branch of the Society. It was unanimously agreed that there should be a uniform subscription of £2 2s. per annum, and that 5s. per member shall be refunded to the local branches for local organisation. "The two-guinea subscription to cover a shop consisting of two assistants and the proprietor, and further that in case of a greater number of assistants being employed, the sum of 5s. shall be paid for each employee over and above the uniform fixed subscription." The law relating to "known, admitted and approved remedies" was discussed, and it was agreed that no representation be made to alter it. Mr. S. W. Hague was appointed delegate at the South Wales Group Executive at Cardiff.

Nottingham.—The first meeting of the season of the Nottingham and District Branch of the Pharmaceutical Society was held at the Flying Horse Hotel, Nottingham, on November 14, the chairman (Mr. Spencer H. Platin) presiding. Mr. Frank Browne addressed the meeting on *The New Edition of the Codex and its Uses in Pharmacy*. Mr. Browne pointed out that although the British Pharmacopœia included about 400 drugs and chemicals, the Codex described no fewer than 1,100. It was necessary for the 700 unofficial drugs and chemicals to be defined in some standard work : that work was the B.P.C. The Codex was not a dry-as-dust work of reference, but a "live" book with a human appeal. The notes for the guidance of dispensers were of real value. The instructions for making official preparations were in some instances simplified (e.g., for making lin. terebinth), greatly facilitating the work of the dispenser. Pharmacists were recommended, for the sake of cheapness, to order branded drugs by their B.P.C. names ; for instance, barbitone instead of veronal. A vote of thanks was given to the lecturer.

Redhill.—A meeting of the Reigate and Redhill Pharmacists' Association and Pharmaceutical Society Branch was held on November 14, when a paper was read by Mr. E. C. Cripps, London, on *The Future of Pharmacy—A Dream*. Mr. H. Oram (President of the Association and Branch) was in the chair. Mr. Cripps depicted pharmacy a thousand years hence, and indicated the various stages in its history and the causes which would lead to its eventual downfall as a profession. Mr. Cripps's quotations from present-day literature went to show to what extremes it is possible for the imagination and aspirations of an enthusiast to carry him.

Importation of German Goods

By the Order given below the German Government have intimated their intention to default in reimbursing their nationals the 26 per cent. German Reparation Levy charged on all German imports into this country. The tax was collected from the British importer, who, in turn, paid the German exporter only 74 per cent. of his invoice value in cash and sent the British Customs receipt for the 26 per cent. to make up the balance. The German exporter then handed the Customs receipt to his Government, which paid him the amount stated thereon. Now that the German Government have defaulted, their exporters will, it is expected, refuse to ship any more goods unless they receive payment to the full invoice value from the British importer. As it is likely that the British Government will continue to demand this levy on imports, the British importer will have to pay the 26 per cent. over and above the full invoice value. As a result, imports from Germany are likely to drop off, but those chemicals that have to come in will be quoted at much higher prices. This Reparation Levy will act as a further tariff against German goods. It will be paid by British firms and will be credited to the Reparation account of the German Government. This unhappy position has already affected the industrial and pharmaceutical spot markets, in the former prices are already hardening, and in the latter, the recent abnormal advance in values is likely to be quickly followed by further appreciations.

ORDINANCE

Suspending the payments for refunding the Reparation Dues levied by the English Government.

On the basis of Article 48 of the constitution of the Reich, I decree the following for the restoration of public security and order within the confines of the Reich:—

(1) All payments mentioned in the table of payments appended to Article IX of the London Ultimatum of May 5, 1921 (Reichsgesetzblatt, 1921, page 761) in respect of the refunding of the Reparation Dues levied by the English Government on the basis of the German Reparation Recovery Act, 1921, are suspended. No claim whatsoever can be admitted against the German Reich on account of the suspension of these payments.

(2) The decision contained in Article 1 does not apply to Reparation Dues in respect of contracts which were already concluded when this Ordinance came into force, provided that the said contracts are submitted within a period of two weeks from the coming into force of the Ordinance to the Friedensvertrag-Abrechnungsstelle, G.m.b.H., Berlinerstrasse 17, Charlottenburg, accompanied by sworn copy of the contract; the G. R. receipts issued by the British Government must be presented to the F.A.S.T. not later than March 31, 1924.

(3) In so far as the Reparation Due is admitted, payment will be made at the option of the Reich in cash in the currency obtaining at the time, in stable loan or in other bonds of the Reich.

The decree, which is signed by the President of the Reich, the Chancellor, the Ministers of Finance and of Industries, becomes effective from November 17.

In commenting on this decision, the "Frankfurter Zeitung" states that "this decree marks a further step by the Government in its policy on reparations, which is intended to demonstrate clearly and impressively to our opponents Germany's momentary incapacity to pay reparations. This has been recognised in England, and, consequently, the news of this step has been received with calm. Over there it is expected that German exports to England will decrease in the same ratio as the revenue from the levy, and to many competing English industrialists and employers this is an extremely attractive outlook. On the other hand, the very serious repercussion this step will have on Germany's economic life is very apparent. Only existing contracts, which must be registered within a period of two weeks, are permitted to continue in operation until the end of March. On all new sales to England the Reich will no longer reimburse the 26 per cent. levy. This means, apart from a few rare instances where the exporter can himself bear this charge of 26 per cent., the practical cessation of the direct export of German goods to England on an extensive scale."

Associations' Winter Session

Ealing.—The monthly meeting of the Ealing Pharmacists' Association was held on November 13, Mr. H. A. Irwin in the chair. The chairman expressed regret that Mr. T. Marns was unable to be present through illness, and hoped that he would soon make a complete recovery. In introducing Mr. Thos. H. Lewis, editor of "Sales Management and Retail Selling," Mr. Irwin pointed out that the interests of the lecturer had been closely connected with pharmaceutical matters. Mr. Lewis then delivered his address on *If I were a Retail Chemist*. The chairman invited members to ask any questions arising from his address. Most of the members took part in the discussion that followed.

Edinburgh.—A meeting of the Edinburgh Chemists' Assistants' and Apprentices' Association was held at 36 York Place, on November 14, Miss M. Grant Boag, President, in the chair. Mr. Knott, secretary, submitted a report on the summer session. In the course of an address on *The Business Side of Pharmacy*, Miss Grant Boag considered apprentices start with exaggerated ideas which experience modifies. To earn a living business habits and principles are indispensable, as pharmacists are both professional men and traders. Apprentices should be chosen from those possessing a higher-grade education, and they must not be regarded as a source of cheap labour. A pharmacist not willing to teach the scientific as well as the commercial side of pharmacy should not engage an apprentice. The pharmacy must be adapted to modern business conditions for success. Every pharmacist should have specialties of his own goods, which should be ticketed, and windows should be attractive, especially to women. Following a vote of thanks, Mr. J. Rutherford Hill presented the prizes, awarded under the Association's prize scheme, as follows:—*Cumming Pharmacy Prize*: (1) Charles Drummond (Powell & Co.); (2) Agnes Donald (Mr. Wyllie). *Fraser Prize*: Margaret Combe (Boots, Ltd.). *Botanical Prize*: Alister Brown (Mr. Thomson, Dalry Road).

Eastbourne.—The Eastbourne Pharmacists' Association met on November 13, when the President (Mr. H. C. Browne) reported on the recent Retail Pharmacists' Union Conference. It was decided to hold the annual dinner in January. Arrangements for Mr. C. H. Hampshire's lecture on "Modern Views on Antiseptics" were approved. Invitations will be extended to members of the local branch of the Pharmaceutical Society, doctors, dentists, and nurses.

Glasgow.—A lecture was given to the Literary and Scientific Section of the Glasgow Pharmacy Club, on November 15, by Mr. F. J. Sandeman, who took for his subject *Efficiency in Retail Salesmanship*. There was a good attendance. The President occupied the chair.

Belfast.—At a meeting of the Ulster Retail Drug Trade Association, on November 14, Dr. Stanley White (Parke, Davis & Co.) gave a lecture on *Standardisation*. Mr. James Guiler, in the unavoidable absence, through illness, of the President (Mr. Andrew Wilson), introduced the chairman, Dr. V. G. L. Fielden, L.P.S.I. The lecturer dealt with the following subsections: The history of standardisation, showing the progressive accuracy of method; the limits of the chemical method; the need for physiological standardisation; the standardisation of the heart tonics, digitalis, strophanthus and squill, ergot, cannabis indica and the ductless gland products, notably adrenalin and pituitrin; the determination of the potency of serum; the Rideal-Walker method of testing germicides; the estimation of vitamin content of foods and extracts. Mr. J. C. Culbert proposed a vote of thanks to Dr. White for the instructive lecture, and Mr. S. Suffern seconded. Dr. Fielden said that instead of a vote of thanks being proposed to him as chairman, he wanted to propose a vote of thanks to the President and Committee for giving him the opportunity of presiding. For the benefit of the younger craft he compared the standardised preparation of tincture of digitalis as used to-day to the time when he served his apprenticeship to pharmacy.

Festivities

Pharmacist Masons' Ladies' Evening

THE Manchester Pharmaceutical Masonic Association held a "Ladies' Evening" at the Victoria Hotel, Manchester, on November 14. This comprised dinner, whist drive, and a short dance. The guests were received by the Chairman (Bro. A. Newton) and Mrs. Newton. The Vice-Chairman, Wor. Bro. A. H. Lyons, was in charge of the "West," and Wor. Bro. H. Thompson, the Immediate Past Chairman, had charge of the "South." After the loyal toast, the toast of "Our Chairman" was given. To the toast of "The Ladies," Mrs. Newton responded. Bro. Middleton (Allen & Hanburys, Ltd.) proposed the health of "Our Visitors," to which Bro. Hoyland replied. A novel whist drive, conducted by Bro. Bennett and Bro. Woodhead, followed the dinner. Prize-winners were:—*Ladies*: Mrs. Nidd, Mrs. Derbyshire, and Mrs. Rushton; *Gentlemen*: Bro. Hoyland and Bro. Gloyne.

Chemists' and Druggists' "At Home"

MR. FRED STOREY (President of the Chemists' and Druggists' Society of Ireland) and Mrs. Storey were "at home" on November 14 to the members of the Society and their lady friends. A large number responded to the invitation, and the function was one of the most pleasant ever held under the auspices of the Society. The guests were received by the host and hostess, and subsequently an enjoyable whist tournament was entered upon, the winners being: *Ladies*, Mrs. J. W. Storey and Mrs. Moffet; *Gentlemen*, Mr. Davis and Mr. Balmer. During the evening Mr. Samuel Gibson, J.F., proposed a vote of thanks to Mr. and Mrs. Storey, and Mr. W. E. Wilson, in seconding, said they were deeply conscious of Mr. Storey's great services to the trade. Mr. Storey, replying, said he had represented the Society that week at the annual dinner of the Dublin and Provincial Retail Druggists' Association, and had been most kindly received there with Mr. McDonald, who represented the pharmacists, and the most friendly feelings towards the Northern chemists and druggists had been expressed.

Dinner at Kendal

THE first annual dinner of the Lancaster and Kendal Branch of the Pharmaceutical Society was held at the Fleece Hotel, Kendal, on November 14, Mr. Robertson (Lancaster), the retiring President, in the chair, and supported by a number of ladies. After dinner Mr. Robertson proposed "The Pharmaceutical Society of Great Britain." Coupling with it the name of Mr. Antcliffe, he was sure, after hearing Mr. Antcliffe earlier on in the evening, that the members of the Council gave a great deal of their time for the benefit of the members. The toast was received with musical honours. Mr. Antcliffe said he was somewhat embarrassed in having to reply to a "Musical Chairman," but he felt, in replying for the Society, he was replying for a chartered body who for the last eighty years had carried out their duty to the State in the fullest possible manner; he was not so certain that the State had carried out their duty to the chemist, but he was pleased to say the relationship with the various departments of the State was most cordial, and he thought the time had arrived when a member of the Society should secure a seat in the House of Commons. The toast of "The Ladies" was honoured, and a special musical toast was given to Mr. Shattock, the retiring secretary. A fine musical programme was given, in which the chairman took part.

Brighton Chemists' Dinner

THE annual dinner of the Brighton Pharmacists' Association was held on November 14. The Mayor of Brighton (Mr. H. Milner Black, Ph.C.) was present in an official capacity. The President of the Association, Mr. Edgar Jones, presided over a company numbering upwards of 100, which included Mr. E. T. Neathercoat (President of the Pharmaceutical Society), Mr. H. R. Browne (President of the Eastbourne Pharmacists' Association), and representatives of wholesale houses. The

toast of "The Pharmaceutical Society of Great Britain" was given by the President (Mr. Edgar Jones). Their Council, he said, was a democratic body, but whatever criticism they might make, there were no two opinions regarding the gentleman who occupied the presidential chair. The toast was received with musical honours. Mr. Neathercoat thanked the company on behalf of his wife and himself. They were meeting during an important period, and the work of the Council particularly as regarded recent activities was bearing fruit. The speaker referred to the activities taking place in Brighton. He congratulated those concerned with the Brighton Technical College and the members of that Association for the success they had had in providing the opportunity of training in pharmacy. He asked the members to maintain their loyalty, for during the eighty-five years of their existence the Society had done work of inestimable value. "The Mayor, Mayoress and Corporation of Brighton" was proposed by Mr. John Plowright, who said they as an association were particularly gratified when one of their calling and a member should have been called upon to occupy the position of chief citizen. Pharmacy had had a very fair representation on the Council for a number of years. He mentioned Councillor Savage, who had just retired after thirty-one years' service (applause), and those services were to be recognised by a suitable presentation. The Mayor suitably replied. Councillor Yates proposed "The Ladies and Visitors," Mr. G. Wigglesworth and Mr. H. R. Browne replying. "The President of the Brighton and Hove Association of Pharmacy" was proposed by Mr. F. W. Burgess and received with musical honours. Mr. Jones made a short response, acknowledging the work of the dinner committee, Messrs. Flatman, Mackie and Plowright. A musical entertainment followed.

Leeds Chemists' Dinner

THE annual dinner of the Leeds Chemists' Association was held at the Hotel Metropole on November 14, Mr. H. C. Roberts (President) in the chair. The principal guests were Mr. F. Pilkington Sargeant (Vice-President of the Pharmaceutical Society of Great Britain), Mr. Leopold Joseph, J.P., Cardiff (chairman of the 'Retail Pharmacists' Union), and Mr. H. B. Hammond, of the Sheffield Pharmaceutical and Chemical Society. Mr. H. Gillegan, who proposed the toast of "The Pharmaceutical Society," announced that the Leeds University was anxious to co-operate with the Association, and had arranged for a lecture to be given on some subject of mutual interest, to which all members of the Association would be welcomed. He then went on to point out the importance of the adequate training and supervision of apprentices. Mr. Pilkington Sargeant responding, said he agreed with Mr. Gillegan on the last-named question raised, but the trouble arises in the administration department. It would be difficult to inspect all the shops in the country. The right way to go to work is by registration. From the beginning to the end of the life of the pharmacist the Society should take a parental interest in him. Regarding the question of reciprocity, Mr. Sargeant said there has undoubtedly been an increase in the amount of reciprocity between pharmacists of Great Britain and those of the colonies. He looked forward, he said, to the time when there will be in London, a great Pharmaceutical Institution financed by the Society of Great Britain and assisted by the societies of the colonies. He would like to see a great research department and a great library, when perhaps there might be an Imperial Pharmacopoeia on the lines of the Pharmaceutical Codex. It is a golden opportunity for some philanthropist to start something that would be for the advantage of pharmacy. The Preliminary examination, he thought, is now too wide, and he hoped that the Society will narrow it by bringing the requirements nearer to the standard of the Matriculation. Referring to the National Health Insurance Act. Mr. Sargeant said: In the event of the trade being in any way threatened, the Retail Pharmacists' Union will have the full support of the organisation of the Pharmaceutical Society. If, on the other hand, there should be any

threat of injurious legislation, the Society feels quite sure that, in its action in the House of Commons, it will be supported by the R.P.U. All legislation that involves technical matters results in inequitable measures unless founded on sound, technical advice. That has been proved by the Dangerous Drugs Act. There is no safe way of dispensing prescriptions containing dangerous drugs unless the chemist knows either the doctor or the patient. "The Retail Pharmacists' Union" was proposed by Mr. M. E. Murray (chairman of the Leeds section of the R.P.U.), Mr. Leopold Joseph responding. There have been one or two unfriendly criticisms, he said. At times the Union, it has been said, indulges in somnolence, but any person with experience of commercial life and work knows that they cannot always be in the limelight. It is not always a sign of somnolence, it is often the sign of progress in its undertakings. He also made brief reference to the dispute between the panel practitioners and the Ministry of Health. As a result of this controversy, he said, it is probable that everything one day will be in the melting pot, and it is likely that our own profession will be affected. The R.P.U. will not be behindhand in proffering assistance for the improvement of the Act in any direction where improvement is needed. A good deal of capital has been made out of a few errors that have been made recently in the dispensing of medicines. Neither the Pharmaceutical Society nor the R.P.U. will in any circumstances countenance any deliberate or wilful act of wrongful dispensing. Such cases are happily extremely rare. Even the analysts themselves vary in a greater degree in their findings. If experts cannot agree, who is to decide? Mr. J. Lancaster proposed the health of "The Visitors." Responding, Mr. H. B. Hammond said he looked forward to the time when there will be reciprocity and co-operation between local associations. The London associations are closely bound together. There is in London a considerable anti-provincial feeling. It is up to the provinces to counteract that, and it can be done by the interchange of delegates, and many of our problems would be satisfactorily dealt with. London ducks are supposed to be swans, but when they come North they turn out to be drakes. After all, the provinces are the backbone of the Pharmaceutical Society. Mr. Roberts replied to the toast of "The Chairman," which was proposed by Mr. Leopold Joseph.

Bradford Association Dinner

THE eighteenth annual dinner of the Bradford and District Pharmacists' Association took place at the Parade Café, Bradford, on November 14, and was a most successful gathering. The President (Mr. J. W. Thorpe) was in the chair, and among those supporting him were Mr. F. G. Hines, York; Mr. H. Richardson, Principal of the Bradford Technical College; and Mr. S. N. Pickard, J.P., one of the founders of the Association. Apologies for absence were received from Mr. E. T. Neathercoat (President of the Pharmaceutical Society), the Lord Mayor of Bradford (Alderman H. M. Trotter), the four Members of Parliament for Bradford, and other friends. A telegram of good wishes had been sent from the Bradford Association to the Leeds chemists, and the chairman read to the assembly a wire from Leeds in similar terms. Proposing "The Pharmaceutical Society," Mr. F. W. Appleyard drew attention to the happy arrangement of classical quotations on the toast list, and expressed his thanks for a ready-made text: "For the future is of more consequence than the past." Mr. F. G. Hines, in responding, said he had read in a recent newspaper article of Bradford's forward position in the world of education. As a member of an educational body like the Pharmaceutical Council, that aspect appealed to him strongly, and he wished to congratulate Bradford on what was stated as a fact—that Bradford had a higher proportion of boys and girls receiving secondary education than any other city. He felt that the future of pharmacy rests very largely on the educational policy of the Society. The prime function of the chemist is the dispensing of medicines,

and the policy of the Society must be directed to securing one legal standard of dispensing. Therefore it behoves chemists to see that no charge can be laid against them, and that their own house is in order. He would say emphatically that it is not fair to judge pharmaceutical dispensing by the high mathematical standard of the analytical laboratory. He believed that much of the apparent laxity in dispensing standards is attributable directly to the false economy, the atmosphere of cheapness, surrounding the whole dispensing practice under National Health Insurance. Chemists are still handicapped also by obnoxious Regulations under the Dangerous Drugs Act, a legacy of the war. The penalties inflicted on certain South Wales chemists some little time ago—chemists whose action had brought to justice a man and his wretched drug habits—were outside the pale of English justice. (Hear, hear.) The Council had taken the matter up with the Home Office, and it is up to chemists generally to help in trying to infuse into the officials responsible for the administration of the law a little more common sense. The Council is always glad to have a square deal with any Government Department—activities of which harass the chemist.

POSITION OF THE TECHNICAL COLLEGE.

Proposing "The Visitors," Mr. A. T. Bailes referred to the presence of Mr. Pickard and of Mr. Richardson. They were all sorry that their efforts, in conjunction with Principal Richardson, to secure for the Bradford Technical College full recognition for Part II of the Pharmaceutical Society's curriculum, as well as for Part I, had not been successful, but they hoped this would yet be brought about. Mr. S. N. Pickard, responding, said he was proud of the Association, of which he had been a founder and from which he had gone as a missionary to help in the forming of the Dewsbury Association before he went to the Pelsbury district himself. In a brief reference to the recent widespread newspaper publicity about inaccuracies in dispensing in the Dewsbury district, Mr. Pickard said he was not one of the chemists concerned, but he thought the newspapers might have been fair enough to give equal publicity to both sides. They had not told the public that, of the nine prescriptions concerned, eight had absolutely satisfied the medical officer of health. Principal H. Richardson, proposing a toast to the Bradford Association, thanked the Bradford chemists for their help in the effort to secure recognition for the College. He thought the Association had reason to be proud not only of its present activities, but of such members as the late Mr. West. It was regrettable that changes which the Pharmaceutical Society thought desirable in regard to the examination of students should have deprived Bradford, if only for a time, of its position in the forefront of pharmaceutical education. It was not for him to say to the Pharmaceutical Council—which he presumed knew its own business best—what should or should not be done; but he was prepared to say they have in Bradford an institution the adequacy of whose facilities for Part II training have never been questioned. At that institution they are allowed to begin the training of pharmacists, but not to finish it. Though for the moment their efforts to get recognition were not successful, he felt confident that with such an energetic chemists' association the time was not far distant when Bradford would again be in the forefront. (Applause.) Mr. Thorpe, responding on behalf of the association, said he felt sure that the sympathies of Mr. Richardson which have been experienced hitherto would be continued, and they all hoped with Mr. Richardson that recognition would ultimately be secured for Part II training at the College. The chemists had worked very hard in this matter, and they felt it was really wrong that their students should be put to the unnecessary expense of leaving home to finish a training for which there are facilities on their own doorstep in an institution second to none in the country. (Applause.) Bradford chemists were thoroughly loyal to the Society, but in this matter they felt they had a very just claim. (Applause.)

Parliamentary Election

Parliament Prorogued

THE second session of the thirty-second Parliament of the United Kingdom, which was opened on February 13, ended on November 16, when Parliament was prorogued until December 20.

Election Dates

Nomination day is November 26, and polling will take place on December 6. The results will be declared on December 6 and 7. The main question before the electors is the desirability of incorporating measures of protection of British industries by means of import tariffs in the next Budget. The Government desire by this means to introduce protection for manufacturers, but to except certain food products. The Liberal and Labour parties claim that Free Trade is still the most suitable policy for this country.

Report on Army Pharmacists

A circular letter has been sent by Sir William Glynn-Jones, secretary of the Pharmaceutical Society, to the secretary of each branch of the Society, asking that every candidate for election be approached with a view of ascertaining whether he or she will support an application to Parliament for the publication of the report on the employment of pharmacists in the Army presented by the Committee of 1920 to the Army Council early in 1922.

Early Closing Association Manifesto

Captain Larking, secretary of the Early Closing Association, has issued the following statement:—

This Association realises that little will be gained by bringing extraneous matters into this election, which is clearly one of "Protection" *versus* "Free Trade" *plus* "Levy on Capital." We have, therefore, decided not to issue any questionnaires to candidates as at previous elections, but to wait until the new Parliament is elected, then to appeal to every member to support this Association's parliamentary programme, viz.: (1) Permanent compulsory early closing of shops; (2) permanent six months' period to the Summer Time Act; and (3) restrictions on Sunday trading. This will be followed up by our usual spade and propaganda work throughout the country.

British Perfume Industry Survey

In a lengthy and closely reasoned letter appearing in "The Daily Telegraph" of November 19, E. Rimmel, Ltd., perfumery manufacturers, London and Paris, discuss the outlook for British perfumery in the prevailing conditions. Messrs. Rimmel write:—"To our immense regret, we learn that within the last two months the proprietors of two of the oldest houses in the trade (both being established in the eighteenth century) have had to dispose of their businesses. To our certain knowledge there are many other perfumery houses of considerable age rapidly approaching the same condition of affairs. . . . We can, in fact, import here our own soaps from France and retail them to the public at prices which do not even represent our prime cost of the very same articles manufactured here in England! On the other hand, if we send those same British-made high-costed soaps to France a duty of 28.80 francs per 100 kilos on perfumed toilet soap and 120 francs per 100 kilos on transparent soap, added to the selling prices, renders those prices utterly prohibitive. . . . Our greatest and fiercest competitors in the trade are the French. They do not generally take the risk of quoting their prices in francs to this country, owing to the shifting nature of the exchange, but in sterling. They thus have been making such profits out of their British trade that one of the two leading French houses has been able this week to reduce its prices by no less than 40 per cent., notwithstanding the fact that the prices of raw materials have not fallen! . . . One disability British manufacturers are suffering from is the cost of production, caused principally by the immense taxation and rates they have to pay. The taxation is to pay for the war and our debts; our competitors are not attempting either—hence their costs of production are less."

Notes on Candidates

Several of the candidates referred to in the following paragraphs (all of whom have points of contact with the drug trade) contested Parliamentary divisions at the election of November 15, 1922, and for that reason we are referring to them rather less fully than on that occasion (*C. & D.*, II, 1922, pp. 631 and 653). We have adopted the customary abbreviations: U. for Unionist, L. for Liberal, and Lab. for Labour.

SIR ROBERT BIRD, Bt., M.P., son of the late Sir Alfred Bird, chairman of Alfred Bird & Sons, Ltd., manufacturing chemists, Deritend, Birmingham, is again standing for West Wolverhampton (U.), in which constituency he succeeded his father early in 1922.

MAJOR W. A. BOWDLER, M.P. (L.), of Bowdler & Bickerdike, manufacturing chemists, Church, Accrington, is engaged in a contest for his seat for the Holderness Division of the East Riding of Yorkshire. Major Bowdler was on active service during the war, and was wounded at the Battle of the Somme.

MR. W. C. BRIDGEMAN, M.P. (U.), Home Secretary, is being opposed in the Oswestry Division of Shropshire.

SIR HARRY BRITTAIN, M.P. (U.) for the Acton division of Middlesex, offers himself for re-election. Sir Harry was called to the Bar in the late 'nineties. He has made his influence felt in journalism, politics, and municipal life, and has always taken a friendly interest in the House of Commons in matters affecting the drug trade.

MR. E. BROTHERTON-RATCLIFFE, a director of Brotherton-Ratcliffe & Co., Ltd., chemical manufacturers and exporters, Winchester House, Old Broad Street, London, E.C.2, is contesting (L.) South Islington against the sitting member, Mr. C. S. Garland, B.Sc.

SIR JOHN BRUNNER, Bt., M.P. (Brunner, Mond & Co., Ltd.), is again contesting Southport (L.). Sir John married a daughter of the late Mr. Octavius Vaughan Morgan, a director of the Morgan Crucible Co., Ltd., and predecessor of Mr. John Burns in the parliamentary representation of Battersea.

MRS. GEORGE CADBURY, O.B.E., is a candidate (L.) for the King's Norton division of Birmingham, in opposition to the present member, Sir Herbert Austin (U.). Mrs. Cadbury has represented the King's Norton ward on the Birmingham City Council since 1919.

MAJOR A. G. CHURCH, general secretary of the National Union of Scientific Workers, is a candidate (Lab.) for East Leyton.

MR. G. FOSTER CLARK (Foster Clark (1920), Ltd., essence and cordial manufacturers, Maidstone) is again seeking election (L.) for the constituency in which the works of his company are situated.

MR. GEORGE CHRISTOPHER CLAYTON, C.B.E., Ph.D., M.P. (U.), a director of The United Alkali Co., Ltd., is seeking re-election for the Widnes division of Lancashire.

SIR WILLIAM EDGE, M.P. (L.), chairman of W. Edge & Sons, dye manufacturers, Bolton, is again seeking the suffrages of his constituents in the borough.

MR. W. MARSHALL FREEMAN, barrister-at-law and pharmacist, is again a candidate (U.) in the Ilkeston division of Derbyshire. Mr. Marshall Freeman matriculated in the University of London in 1885, qualified as a chemist and druggist in 1890, and passed his final Bar examination in 1904. He was at one time associated with his father in business. Municipal and political affairs have claimed much of Mr. Marshall Freeman's attention since the early 'nineties, and he has also taken a prominent part in educational matters in Birmingham. During the war he rendered important service as a civil liabilities commissioner, and more recently he has presided with distinction over the Complaints Tribunal of the Central Committee appointed by the Board of Trade under the Profiteering Act.

MR. C. S. GARLAND, B.Sc., M.P. (U.), chairman of the Joint Industrial Council of the gas-mantle industry, is appealing to his constituents in South Islington, where he is being opposed by Mr. E. Brotherton-Ratcliffe.

SIR SYDNEY H. H. HENN, K.B.E., M.P. (U.), chairman of Lankshear, Wickstead & Co., Ltd., tartaric-acid

manufacturers, London, E.C.2, and a director of Forster's Glass Co., Ltd., the Isleworth Rubber Co., Ltd., and other companies, is being opposed at Blackburn, for which constituency he was returned last year.

MR. P. C. HOFFMAN, organising secretary of the Shop Assistants' Union, is standing (Lab.) for South-East Essex.

LIEUTENANT-COLONEL J. KNOCKELLS HORLICK, second son of the late Sir James Horlick, Bt., is a candidate (U.) for the city of Gloucester.

CAPTAIN AUSTIN U. M. HUDSON, M.P. (U.), is engaged in a three-cornered fight in his constituency of East Islington. Captain Hudson is the son of the late Mr. Leopold Elliot Hudson, F.R.C.S., and grandson of the late Mr. Septimus Vaughan Morgan, one of the founders of THE CHEMIST AND DRUGGIST, "The Ironmonger," and the Morgan Crucible Works at Battersea. He joined the Royal Berkshire Regiment in France in 1916 at the age of nineteen. After being invalided with trench fever, and wounded, he joined the Guards Machine Gun Regiment, and was again at the front in 1918. He resigned his commission in 1920 to join Morgan Brothers (Publishers), is a director. Captain

Hudson is being opposed by Mr. A. S. Comyns Carr, a barrister (L.), and Miss Ethel Bentham, L.R.C.P. (Lab.).

SIR WILLIAM JOYNSON-HICKS, M.P. (U.), the Minister of Health, is being opposed in his constituency, the Twickenham division of Middlesex, by Mr. S. Sherman (Lab.).

MR. J. D. KILEY (L.), who lost his seat for the Whitechapel division of Stepney at the last general election, seeks re-election. Mr. Kiley took an active part in the House of Commons debates on the Safeguarding of Industries Act.

SIR PHILIP LLOYD-GREAME, M.P. (U.), President of the Board of Trade, is standing again for the Hendon division of Middlesex.

SIR ALFRED MOND, Bt., M.P. (L.), is again seeking the suffrages of his constituents at West Swansea. Sir Alfred was Minister of Health in 1921.

SIR MAX MUSPRATT, Bt. (L.), chairman of The United Alkali Co., Ltd., Liverpool, is standing for the Exchange division of the city, in which his company has long had its headquarters. Sir Max, whose father, Dr. E. K. Muspratt, died not long ago at the venerable age of eighty-nine, was elected to the Liverpool City Council in 1904, and became Mayor in 1916. He sat for the Exchange division for some time in Parliament from 1910 onwards. During the war he was appointed, with two other experts, to supervise on behalf of the Government the production and distribution of raw material used in the manufacture of explosives.

MR. N. SARGANT (W. Sargent & Sons, produce merchants, London, E.C.) is again standing as a candidate (L.) for North Islington. There is also a Labour candidate, Mr. G. Bennet, in the field, and a Unionist

candidate is to be selected, the old member, Sir Newton Moore, having decided to retire. Last November Mr. Sargent was third at the poll.

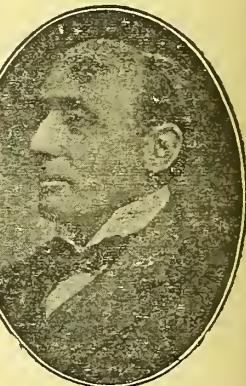

COLONEL K. P. VAUGHAN MORGAN, M.P. (U.), a director of The Morgan Crucible Co., Ltd., seeks re-election for East Fulham.

MR. H. H. LESSER, who was junior counsel for the defence in the "test case" (Jenkin v. the Pharmaceutical Society of Great Britain) in 1920, is again standing (Lab.) for Central Leeds.

SIR WILLIAM WHITLA, M.D., L.P.S.I., has intimated that he will not be a candidate for the representation of Queen's University, Belfast, in Parliament, which he has held since the University was enfranchised. The Unionist candidate will be Colonel Thomas Sinclair, M.D.

SIR RICHARD WINFREY, M.P. (L.), Ph.C., is standing for the Gainsborough division of Lindsey, at present represented by Major J. E. Molson (U.). Sir Richard is a Lincolnshire man, and was apprenticed at Stamford. He passed the Major examination in 1880, and was subsequently with John Bell & Co., Oxford Street, London, W. From pharmacy Sir Richard found his way into journalism and agriculture, his services as an expert in the last-named sphere receiving recognition in 1916 by his appointment as Parliamentary Secretary to the Board of Agriculture. He is an ex-Mayor of Peterborough. During his seventeen years as member for South-Western Norfolk Sir Richard has never lost his interest in pharmacy, both in Parliament and outside it.

SIR LAMING WORTHINGTON EVANS, M.P. (U.), Postmaster General, who is the son of a London solicitor, has been Unionist member for Colchester since 1910, and while the National Insurance Act was going through Parliament proved himself completely *au fait* with the details of that measure. Sir Laming's father was legal adviser on trade matters to THE CHEMIST AND DRUGGIST more than fifty years ago. Sir Laming is being opposed by Captain R. L. Reiss (Lab.).

SIR R. WINFREY, M.P.

CAPT. A. U. M. HUDSON, M.P.

Ltd., of which company he is a director. Captain Hudson is being opposed by Mr. A. S. Comyns Carr, a barrister (L.), and Miss Ethel Bentham, L.R.C.P. (Lab.).

SIR WILLIAM JOYNSON-HICKS, M.P. (U.), the Minister of Health, is being opposed in his constituency, the Twickenham division of Middlesex, by Mr. S. Sherman (Lab.).

MR. J. D. KILEY (L.), who lost his seat for the Whitechapel division of Stepney at the last general election, seeks re-election. Mr. Kiley took an active part in the House of Commons debates on the Safeguarding of Industries Act.

SIR PHILIP LLOYD-GREAME, M.P. (U.), President of the Board of Trade, is standing again for the Hendon division of Middlesex.

SIR ALFRED MOND, Bt., M.P. (L.), is again seeking the suffrages of his constituents at West Swansea. Sir Alfred was Minister of Health in 1921.

SIR MAX MUSPRATT, Bt. (L.), chairman of The United Alkali Co., Ltd., Liverpool, is standing for the Exchange division of the city, in which his company has long had its headquarters. Sir Max, whose father, Dr. E. K. Muspratt, died not long ago at the venerable age of eighty-nine, was elected to the Liverpool City Council in 1904, and became Mayor in 1916. He sat for the Exchange division for some time in Parliament from 1910 onwards. During the war he was appointed, with two other experts, to supervise on behalf of the Government the production and distribution of raw material used in the manufacture of explosives.

MR. N. SARGANT (W. Sargent & Sons, produce merchants, London, E.C.) is again standing as a candidate (L.) for North Islington. There is also a Labour candidate, Mr. G. Bennet, in the field, and a Unionist

SIR M. MUSPRATT, Bt.

Coming Events

This section is reserved for advance notices of meetings or other events. These should be received by Wednesday of the week before the meetings, etc., occur.

Tuesday, November 27

Ealing Pharmacists' Association, Acton Baths, at 7.45 p.m. Whist drive. Tickets (3s. each) from Mr. Arnold Roberts, Market Place, Acton, W.3.
Glasgow Pharmacy Club (Rambling Section).—Visit to University. Meet at University Car Terminus at 3 p.m. Leader, Miss Horne.

Wednesday, November 28

Edinburgh Chemists', Assistants', and Apprentices' Association, Windsor House, Hillside Crescent, at 8 p.m. Whist drive and dance. Tickets (5s. each) from members of the Committee.

Newcastle-on-Tyne Chemists' Association.—Lecture on "Liquid Air," by Mr. Mills.

Manchester and Salford Chemists' Assistants' Association, Clarion Café, Market Street, Manchester, at 7.45 p.m. Whist drive. Tickets (2s. each) from members of the Committee.

West Kent Pharmacists' Association, Royal Bell Hotel, Bromley, at 6.30 p.m. Annual dinner. Tickets (10s. each) from W. J. Dalby.

Thursday, November 29

National Association of Women Pharmacists, Hotel Russell, London, W.C., at 8.30 p.m. Mr. Darrell Steel (Anglo-American Oil Co.) on "Viscosity of Liquid Paraffin."

Pharmaceutical Botany

XXXII. Grasses of Wheat

GRASSES cover more space on the earth's surface than any other kind of plant. As food for man and beast they also surpass all other vegetation in economic importance. Three—barley, oats, and wheat—are of sufficient importance in medicine to be included in the pharmaceutical syllabus. The grasses are easily recognised by their hollow, jointed stems, with two rows of alternating sheathing leaves bearing a characteristic membranous outgrowth (ligule) at the base of the leaf-blade. The closely allied sedges are weeds, often grass-like in habit, but generally possessing solid triangular stems and leaves without ligules. The flowers of both grasses and sedges are small, and being on a short axis without stalks (sessile) form a spikelet.

FIG. 105.

The latter term is a diminutive for spike. (Compare Fig. 86.) The inflorescence of wheat is a compound spike, i.e., spike of spikelets. The structure of the spikelet (itself composed of several flowers), is well illustrated by wheat, the numerous cultivated varieties of which are regarded for the most part as forms of the common wheat, *Triticum vulgare*, Villars. When a flower is borne on the axil of a leaf, the latter is called a floral leaf or bract. Bracts may resemble the ordinary foliage leaves, but frequently they are reduced to scale-like leaves or even tooth-like structures. The compound spike of wheat has two rows of spikelets. Each spikelet (Fig. A) consists of a short axis bearing a double row of overlapping alternating bracts. The two lowest bracts, which are empty

owing to non-development of the flower-buds in their axils, are termed glumes. The next three or more bracts above the glumes contain flowers, and are accordingly termed flowering glumes. In wheat the glumes are broadly ovate, with a blunt tip ending in a sharp point (mucronate). The flower-stalk in many Monocotyledons often bears a single little bract (bracteole) opposite the true bract. (In Dicotyledons there are commonly two bracteoles.) In grasses this is represented by a thin scale with inflexed margins, termed palea, opposite the flowering glume. The flowering glume (bract) may be also distinguished as the outer palea, and the palea itself as the inner palea (the latter, foreshortened, and the structure of the flower is shown in Fig. B). We have already noted that in Monocotyledons the parts of the flowers are usually arranged in threes. The grasses show a departure from this by suppression of parts—a common feature in compressed inflorescences owing to functions which would ordinarily be fulfilled by the suppressed parts being exercised by other organs. In the grasses the glumes and paleæ adequately protect the essential parts of the flower (stamens and carpels), which normally would be done by the perianth. Accordingly the latter is reduced to two minute scales (lodicules) lying at the base of the ovary. These are retained because they still have useful work to do in exposing the mature stamens through becoming swollen and pressing the flowering glume downwards. The flower proper consists of three stamens with hinged (versatile) anthers on slender stalks (filaments) and a superior ovary with one cavity (monocarpellary), but two brush-like stigmas. The floral diagram (Fig. C) indicates the relationships of the parts of the grass-flower to its paleæ, and also, by dots, its missing members. The

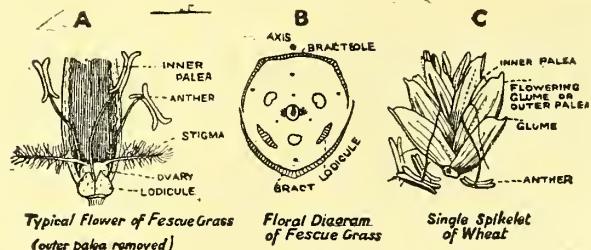

FIG. 106.

floral formula is K.O.C2.A3+O.G₁. The ovary should be three-chambered, but by abortion two of these three chambers have been lost, a fold on the posterior side (nearest the axis, i.e., farthest away from the observer), indicating its monocarpellary condition. Note, however, that only one of the theoretically three stigmas has been lost, that for which there is no room, being opposite the bract. It is an advantage to have a stigma projecting from each side of the flower, so that two have been retained. The flowers of bamboos, which belong to this family, have more lax inflorescences and are much less reduced, possessing three lodicules, six stamens and three stigmas. It is this adaptation to circumstances which moulds parts of even closely allied plants to such diverse degrees. In a grass-flower all the energy is used to produce a single fertile seed so that only one erect ovule is produced in the ovary. The flowers themselves are admirably adapted for wind-pollination. In any particular flower the stigmas mature first and protrude from each side to catch on their feathery tips pollen blown from the anthers of older flowers. Later the filaments of the stamens elongate and hang over the edge of the glumes, the swinging of anthers aiding the emptying of the pollen grains. This insures cross-pollination. Wind-pollination is a wasteful method, but in grasses the arrangement is so effective that three stamens suffice to provide all the pollen necessary. In the pines hundreds of stamens are produced to one ovary. Cultivated cereals are commonly self-pollinated, so that risk of not being pollinated is almost non-existent. The couch grass (*Triticum repens*) is another member of the same genus as wheat. It is a pestilent weed owing to its creeping rhizome, which, when dried, is used in medicine.

Personalities

COUNCILLOR W. J. GREGORY, chemist and druggist, Weymouth, has been appointed a member of the borough education committee.

COUNCILLOR C. GERRING, chemist and druggist, New Romney, has been appointed a representative trustee of Southlands Hospital Charity.

COUNCILLOR C. A. CRITCHLEY, Ph.C., Blackburn, has recently been confined to his room as the result of an accident, fortunately not of a serious nature.

MISS D. E. FOSTER, late manager of the packed-goods department of Evans, Gadd & Co., Ltd., Exeter, has joined the advertising staff of Burroughs Wellcome & Co., London, E.C.

MR. D. S. PRIESTLEY, chemist and druggist, Bradford, who has been ill for some time, has been under successful treatment at Manchester and has returned home much improved in health.

ALDERMAN J. R. BIRKETT, J.P., chemist and druggist, Morecambe, was, on November 7, entertained to a complimentary dinner in recognition of his services as Mayor of the borough on nine occasions.

COUNCILLOR H. J. MARTIN, chemist and druggist, Christchurch (member of the Executive of the Retail Pharmacists' Union), has been appointed a member of a deputation to the Minister of Health in connection with the local housing scheme.

MR. H. MILNER BLACK, Ph.C., F.I.O., who, as mentioned in our issue of November 17, has taken office as

Mayor of Brighton for the ensuing year, was born in London, and served his apprenticeship to a son of the late Mr. Henry Deane, Clapham, S.W. After passing the Major examination in 1887, he had five years' experience in Australia and two years in the United States. In 1896 he purchased the business of Mr. E. Wyborn, in Brighton, and removed it to St. James's Street, where he developed an extensive optical connection. Mr. Black has been a member of the Brighton Town Council since 1902 (except for a short interval), and has done

MR. H. MILNER BLACK

much useful work on its education committee.

MR. G. B. WRIGHT, chemist and druggist, Hebden Bridge, who is retiring (see next column) after thirty years in business in that town, has been presented by the Mytholmroyd Tennis Club, of which he has been President for three years, with an oak clock.

To the list of Mayors given in our issue of November 17 must be added the names of Dr. W. H. Martindale, Ph.C., Mayor of Winchelsea, Mr. S. D. Gill, chemist and druggist, Mayor of West Bromwich, and Sir William Veno (chairman of the Veno Drug Co., Ltd., Manchester), Mayor of Altrincham.

At a meeting of the Hatton Lodge of Freemasons, 3041, on November 15, Mr. W. A. Cooke, chemist and druggist, Wellingborough, was installed W.M. Mr. Cooke invested Mr. R. H. Robinson, chemist and druggist, of the same town, as S.W., and Mr. Ralph Palmer, chemist and druggist, Earls Barton, as I.G.

MR. L. H. HARTLAND-SWANN, C.B.E., chairman of International Icilma Trading Co., Ltd., of Vinolia, Ltd., and of Blondeau & Cie, Ltd., has joined the board of Lever Bros., Ltd., and has been appointed a managing director. Mr. Hartland-Swann will devote his attention chiefly to the toilet companies associated with Lever Bros., Ltd.

IN consequence of the shortness of time available to canvass properly the large and scattered Cannock Division of Staffordshire, Mr. H. S. Abrahamson has withdrawn his name from the list of candidates at the forthcoming general election. Mr. Abrahamson, however, purposes contesting a division at the earliest opportunity.

MR. H. TURNER WIDGERY, of the advertising staff of Burroughs Wellcome & Co., London, E.C., and son of the late Mr. John Widgery, chemist and druggist, Uxbridge Road, London, W.12, has been elected to represent the Regent Advertising Club on the general committee of the forthcoming International Advertising Convention, to be held at Wembley in July, 1924. Mr. Widgery is a member of the executive committee of the club, particulars of which may be obtained by writing to him at 85 Furness Road, N.W.10.

DR. INGLIS CLARK, F.R.S.E., Ph.C. (Duncan, Flockhart & Co., manufacturing chemists, Edinburgh), gave an interesting lecture, profusely illustrated by natural-colour photographs, on "North Africa," in the Kingsway Hall, London, W.C., on November 19. Before conducting his audience from Algiers to Tunis, Dr. Clark dispelled several popular illusions regarding climate, travelling facilities, and so forth. Among the places visited by Dr. and Mrs. Clark were the old Roman town of Constantine, reached from Algiers by the Grande and the Petite Kabylie, thence via Lambese and Timgad to Biskra. Several pictures of the old and new parts of the town and the Garden of Allah were shown, and though these and the ones which had preceded them had been much appreciated, the wonderful sunset effects and another by moonlight earned the greatest applause. It was at Biskra that Dr. Clark, at considerable risk to himself and by means of much bribery, visited a harem, comprising five wives and twenty-seven children, but not kept in such palatial surroundings as are invariably associated in the European's mind with these institutions. Owing to the bad light and hurried visit it was impossible to take photographs. The next halt was at Touggourt, of which the pictures of the underground streets were striking, then across the desert, the night being spent under canvas, to Temacine. The arrival of the Timbuctoo Citroen Expedition coincided with Dr. Clark's visit, and the photographs taken in this district included some of the cars. The journey was then continued to Bona, Beja, Tunis, Susa, Kairouan and El Djem. The country and its inhabitants are admirable subjects, provided the "necessary consideration" is available, for colour photography, and Dr. Clark has made excellent use of his opportunities. The lecture was interspersed with snatches of ancient history and personal experiences of the land of Islam that must have aroused a feeling of envy in many of his listeners.

Business Changes

TAYLOR'S DRUG CO., LTD., have acquired the business of Mr. Peter Hitchon, 11 Burnley Road, Padiham, near Burnley.

WANDS, LTD., chemists, Leicester, have acquired the business of the late Mr. W. W. Whittle, 215 Charnwood Street.

MR. E. HENCHLEY, chemist and druggist, Boscombe, Bournemouth, will shortly open a pharmacy in Southbourne Grove, Southbourne.

HEBDEN BRIDGE CO-OPERATIVE SOCIETY, LTD., are taking over, as from December 1, the business of Mr. G. B. Wright, chemist and druggist, Albert Street (see previous column).

CORONER ON PANEL PRACTITIONERS.—In the course of a recent inquest Dr. F. J. Waldo, coroner for the City of London and Southwark, said that he had heard of cases in which panel doctors had not opened their surgeries at all on Sundays, the consequence being that parents could not get their doctors when their children were taken ill. Panel doctors with big practices were supposed to have partners or to make arrangements for other doctors to take their place when they went away.

Births

Notices for insertion in this column must be properly authenticated

PEEBLES.—At 735 Hawthorne Street, Springburn, Glasgow, on October 30, the wife of William Peebles, chemist and druggist, of a daughter.

RULE.—At 1 Broadgate, Botley, Hants, on November 14, the wife of G. G. Rule, M.P.S., of a son.

Marriages

BROWNIE-MCNAIR.—At St. Margaret's U.F. Church, Fairlie, recently, Archie McNicol Brownlie, chemist and druggist; Skelmorlie and Largs, to Georgina Hay McNair, chemist and druggist, youngest daughter of Mr. C. H. McNair, Laurel Bank, Fairlie.

NESS-MILNE.—At St. Andrew's Scots Kirk, Colombo, on October 10, James Fraser Ness, chemist and druggist, late of Kirkcaldy, to Elizabeth Grant Milne, Aberdeen.

Deaths

ALABONE.—At 6 King's Road, Bengeworth, on November 9, Mr. Basil Guy Gerrard Alabone (Alabone & Co., Ltd., chemists, Port Street, Evesham), aged thirty-eight. (See p. 707.)

BANNER.—At the residence of his daughter, "Red Gables," College Road North, Blundellsands, Liverpool, on November 18, Mr. Edward Richard Banner, chemist and druggist, aged seventy-nine. Mr. Banner, who had been in business in Byrom Street for many years, was a Freeman of the city of Liverpool.

DERRICK.—At Bristol, on November 19, Mr. E. W. Derrick, a director of R. J. Reuter Company, Ltd., druggists' sundriesmen, 69 Carter Lane, London, E.C.4, aged sixty. Mr. Derrick became Mr. R. J. Reuter's representative in 1894, and for the next few years covered the whole of Great Britain and Ireland. From 1900 onwards he practically confined himself to a Scottish ground, and at the beginning of the present year he took up an indoor position at his own request. Mr. Reuter's business was recently converted into a limited company, Mr. Derrick and Mr. H. E. Cooper joining the founder on the directorate. Of a quiet and retiring disposition, Mr. Derrick will be missed by all who learned to value his sterling qualities. He leaves a widow.

LE POIDEVIN.—In the Alexander Nursing Home, Guernsey, recently, Mr. John Rougier Le Poidevin, chemist, 59 Bath Street, St. Helier, Jersey, aged seventy-eight. Mr. Le Poidevin, who was born in Guernsey, carried on business in St. Helier for more than fifty years. Of a genial temperament, he was highly esteemed in the island. A widow and a grown-up family survive him.

PRESTON.—The funeral of the late Mr. Job Preston, chemist and druggist, Sheffield, whose death was recorded in our issue of November 17 (p. 685), took place at Crookes Cemetery on November 15. The family mourners present included Mr. Ernest Preston, Ph.C., Mr. Christopher Preston, Ph.C., and Mr. Philip G. Preston (sons); and the Sheffield Pharmaceutical and Chemical Society was represented by Mr. H. B. Hammond (President), Mr. H. Greenfield (secretary), Mr. J. Austen and Mr. H. G. Williams.

RAMSAY.—At 18 Bridge Street, Montrose, on November 16, Elisabeth Arnott, widow of the late Mr. James Ramsay, chemist and druggist, aged ninety-six.

ROBERTSON.—At "Bellevue," Ferry Road, Edinburgh, on November 19, Mr. George Robertson, chemist and druggist, 62 Inverleith Row. Mr. Robertson passed the Qualifying examination in 1884.

STEVENSON.—At Mount Pleasant, Hose, on November 3, Mr. John Joseph Stevenson, retired chemist and druggist, aged seventy-two. Mr. Stevenson founded a business in Pelham Street, Nottingham, in 1882, and after carrying it on for thirty-four years took Mr. W. M. Watson,

chemist and druggist, into partnership. In 1921 Mr. Stevenson retired, and Mr. Watson became the sole proprietor.

YOUNG.—The funeral of the late Mr. John Rymer Young, J.P., Ph.C., Warrington, whose death was recorded in our issue of November 17 (p. 685), took place at the Manchester Crematorium on November 16. A large and representative body of pharmacists attended to pay their tribute of respect to a colleague who was loved both as a man and as an old member of the Manchester Pharmaceutical Association. Among those present, besides family mourners, were : Mr. D. Dickson (President of the Manchester Pharmaceutical Association), Mr. A. J. Pidd (treasurer), Mr. T. Miller (secretary); Mr. W. Kirkby, M.Sc., Mr. T. E. Eastwood, Mr. J. Cleworth, and Mr. E. H. Simmons (Past Presidents of the Manchester Pharmaceutical Association); Mr. A. C. Vallance; Mr. A. L. Blain; Mr. Blackburn; Mr. Burgess; Mr. A. W. Ashcroft and Mr. J. L. Hirst (Liverpool).

Recent Patents

Abstracts of specifications of recently-granted patents for inventions. The complete specification (less, each including postage) of British patents can be obtained from the Patent Office, 25 Southampton Buildings, London, W.C.2, on quoting the name of the patentee and the number of the patent.

Cleaning Composition.—A preparation obtained by emulsifying paraffin oil, soap and water, for removing grease and dirt from the hands without the use of water. (H. D. Golding and The United Alkali Co., Ltd. 205,599.)

Distance Finder.—A distance finder for photographic cameras consisting of a frame provided with an aperture divided by an inclined bar so as to present an angular aperture, whereby the field of view gradually decreases in pitch as the sides converge, enabling the distance of an object of approximately known height to be determined. (G. E. Cole. 205,650.)

Dialkylbarbituric Acids.—A process for the manufacture of new unsymmetrical C.C.-dialkylated derivatives of barbituric acid, e.g., isobutylethylbarbituric acid, isobutylpropylbarbituric acid, etc., based on alkylising a mono-alkylbarbituric acid, or on the direct condensation of urea, or of its generators, with a dialkylmalonic derivative. (E. Layraud. 191,008.)

FRANCE

Acetone from Acetylene.—A mixture of acetylene and steam, heated to 350° to 450° C., is exposed to the action of thorio-potassium carbonate as catalyst, resulting in the direct production of acetone. (Société Elektrizitätswerk Lonza. B.F. 561,377.)

Removal of Tattoo Marks.—A process for removing tattoo marks, or marks caused by particles of coal penetrating into the skin, consisting in the application of acetic ointment, in the form of a plaster, followed by the use of a solution of rose water 100, hydrochloric acid 1, sea salt 10, tannin 30 grams, for rubbing the part. (M. Cheyre. B.F. 561,421.)

GERMANY

Silicates for Intravenous Injection.—A process for preparing a neutral solution of sodium silicate for intravenous injection, consisting in adding 25 c.c. of a 10 per cent. alcoholic solution of iodine to 300 c.c. of a 1 per cent. solution of sodium silicate; the excess of alkali is bound by the formation of sodium iodate and sodium iodide. (Dr. A. Kuhn. D.R.P. 384,587.)

Soluble Guaiacol Preparations.—A process for the preparation of highly concentrated stable solutions of guaiacolates, for hypodermic administration, based on the use of *p*-amidobenzoyl-diethylamino-ethanol hydrochloride. For instance, 50 grams of guaiacol cacodylate, 5 grams of guaiacol and 50 grams of the above-mentioned compound are dissolved in 1,000 c.c. of water; filter, fill in ampoules and sterilise. (Dr. Rex Chemische Fabrik und Drogen Grosshandels A.G. D.R.P. 384,688.)

Trade Notes

THE SOUTH AFRICAN agents for Bender's Food, Ltd., are Hill & Everett, 159 Longmarket Street, Cape Town. The postal address is P.O. Box 573, Cape Town.

JOSÉ SERRANO WINES.—Ayrton, Saunders & Co., Ltd., Liverpool, advertise the José Serrano wines in this issue. A folder is issued dealing with the various wines, stating the conditions of sale and other particulars.

SHOPFITTING.—Fredk. Sage & Co., Ltd., 58-62 Gray's Inn Road, London, W.C.1, show in their advertisement specimens of their work in shopfitting and equipment. The company claim to be the largest shopfitting organisation in the world.

WRIGHT'S COAL-TAR SOAP.—Wright, Layman & Umney, Ltd., Southwark, London, S.E.1, are offering during November and December a window-show bonus of Wright's coal-tar soap, and are including fifty copies of Wright's painting book with each order.

LIVERPOOL VIRUS.—Evans Sons Lescher & Webb, Ltd., Liverpool, state that the sales of Liverpool virus have increased in all parts of the country. It is possible that the new method of packing the virus, illustrated in the company's advertisement, has contributed to bring this about.

NORVIC BANDAGES.—Grout & Co., Ltd., Great Yarmouth, have issued a new showcard in colours, advertising the Norvic crêpe bandages. On the left-hand side is a picture of a popular actress wearing a Norvic, and on the other side of the card is a space for a 3-in. bandage. The showcard is obtainable on application.

VANILLA BEAN AGENCY.—E. Guillevic & Co., 19 St. Dunstan's Hill, London, E.C., have recently been appointed sole representatives in the United Kingdom for Derode & Dammann, 8 Boulevard Sébastopol, Paris, importers and dealers of vanilla beans. Derode & Dammann have branch houses at Havre, Marseilles and Madagascar.

NEW FORM OF LEMON JUICE.—Wilson & Mansfield, 41 Eastcheap, London, E.C., are offering a form of Sicilian raw lemon juice, made by a special process, to meet the requirements of manufacturers of cloudy lemon squash. The special point of this juice is that it contains a large proportion of thick pulp, in which the fruit cells remain intact. The juice is preserved.

SALICIN PROPAGANDA.—The St. Amaund Manufacturing Co., Ltd., Carnwath Road, Fulham, London, S.W.6, are sending to medical men literature regarding the therapeutics of salicin. These take the form of well-produced folder and booklet containing well-documented information on the therapeutics of salicin. Samples of salicin tablets are also sent, but supplies of the drug and its preparations are obtainable only through the wholesale houses.

INSURANCE ECONOMY.—At this time of the year both wholesaler and retailer think over the problem of reducing "overhead" charges, which, if left alone, tend to get out of hand. In regard to insurances of all kinds, Lloyds' policies offer a means of economy, with the fullest security, untrammelled with a multiplicity of conditions and exceptions. Benton, Churchill & Co., 147 Leadenhall Street, London, E.C., offer to send a representative to discuss insurance economy with any C. & D. subscriber who is interested in reducing his insurance premiums.

MAW'S PRICE LIST.—S. Maw, Son & Sons, Ltd., Aldersgate Street, London, E.C., have sent us a copy of their price list for 1923. This is a substantial book of 637 pages, and recalls the pre-war catalogue, upon which, however, it is an improvement in several respects. The frontispiece is an engraving of George Maw, who founded the business in 1807, and then follows the eight sections of the work, of which the first, devoted to druggists' sundries, occupies the greatest bulk. A convenient thumb index enables the reader to turn easily to the different sections, and here and there are coloured insets referring to special manufactures. The book is copiously illus-

trated, and the pricing of the items is now possible through the greater stabilisation of trade that has now taken place. The list resumes its position as the standard reference book on druggists' sundries.

"SOLOID" ALUMINIUM SULPHIDE.—Primarily in connection with the method of water analysis described by Dr. Thresh in his book on that subject, Burroughs Wellcome & Co. have introduced "Soloid" aluminium sulphide 0.1 gm. for the preparation of sulphuretted hydrogen solution. This replaces the zinc sulphide and oxalic acid previously used for this purpose. A good H₂S solution may be prepared expeditiously by allowing one "Soloid" aluminium sulphide to remain for two or three minutes in 10 c.c. of water. The product quickly disintegrates and the water becomes saturated with the gas. The usual cumbersome apparatus is dispensed with. The convenience of the method will be obvious to those who occasionally require small quantities of sulphuretted hydrogen. "Soloid" aluminium sulphide 0.1 gm. is issued in packages of twenty-five.

SHALIMAR MANICURE OUTFITS.—Dubarry et Cie, 81 Brompton Road, London, S.W., send for our inspection one of the Shalimar manicure outfits which they advertise in this issue.

The outfit sell at 3s. 6d., 5s., 7s. 6d., and 15s. each, and are excellent value for the money considering the range of contents and high-class packing. The 7s. 6d. outfit, for example, contains bottles of Lotion Shalimar and Cutidel, Nacrayon, savon Shalimar, Glin t a cuticle cream, crème Shalimar, nail polishing stone, emery boards, and orange sticks. As Christmas presents the outfit should take the public fancy, and the fact that they are British made is an additional recommendation. The illustration conveys an idea of the style of packing, but loses its force because we cannot reproduce the colour scheme of the outfit. The outer box is covered with blue leatherette and is attractively decorated. A leaflet of directions is enclosed with each outfit, in which the art of manicure is taught.

Observations and Reflections

By Xrayser II.

A Comparison of Local Reports

of Insurance Act dispensing reveals several interesting and some curious facts. I notice that in many districts schemes for testing dispensing are being considered, but in none is there any indication what the scheme is. Surely it is desirable that the same scheme should obtain all over the country, and all panel chemists' work be submitted to the same tests by the same authority. A central testing bureau should present no more difficulties than a central pricing bureau, and there is more to be said for it. The difference in the cost of prescriptions in different areas is rather surprising. The average recently seems to have been something like ninepence per script, but there are differences of more than a penny per script between some areas and others. These differences are equally remarkable if only ingredient prices are considered. Apparently it is chiefly due to variation in these that the total cost varies as it does, but as the reports are not all in the same form comparison here is not easy. The reported average cost per insured person (this refers only to last week's reports) varied in different areas from 32.9d. to 27.5d. For these differences the prescribers are, of course, responsible.

"Arithmetical Legerdemain"

is a very happy description of the process of calculation required for an understanding of the terms allowed us for Insurance dispensing, and I confess that a severe headache is the chief result of my own endeavour, even with the help of your articles, to apportion the items by which the total amount of the fee is made up. The subject, indeed, almost ceases to be interesting, and tends to become merely exasperating to one not naturally expert in dealing with figures, and I feel in regard to it much as Mr. F. E. Grant, of Trinidad, must have done towards the Government analyst's evidence in the Glauber's salt case. There is, in fact, a singular correspondence between the method of the said analyst and the Departmental Committee whose calculations you criticise. They both "grind exceeding small." The considerations they bring to bear upon their respective tasks are so exquisitely fine as almost to pass out of sight. "The world's coarse thumb" (to use Browning's metaphor) fails to "plumb" them, and the poor chemist who has to submit to these authorities does so with a confused sense of injustice similar to that of Dr. Jessopp's poor parishioner who, under the stroke of a sudden bereavement, complained that "that owd Providence had always been agen him." By throwing a little light upon the subject you do, however, relieve our minds to some extent. When the cause of a disease is known there is some hope of a remedy.

The Scottish Panel Chemists,

as might have been expected, are beforehand with us in negotiating for the "penny fee" for 1924—at least, I have seen no intimation of anything having yet been done in the matter by our representatives. It is high time they bestirred themselves. If all reports are true, the doctors expect an increase in their grant as a result of the pending inquiry, and it is quite possible that, as the little girl said when she saw the pudding being rapidly served, there will be "none left for Annie" unless we put in our claim betimes. Sir William Glyn-Jones said the other week that the doctors' case was virtually ours, but that is not very obvious. The Government actuary says that no further contribution can be got from the approved societies' funds; the Ministry of Health declines to commit itself to any increase in the Government grant; and if the funds available are to be divided between the doctors and us it is clear that an increased allowance to them means a diminution of ours. Thackeray's

advice, "If you want a thing, ask for it," seems highly pertinent; and I would add, "Ask for it at once, before the possibility of getting it is gone."

The Doctors

have chosen well, and have shown a confidence in the justice of their case which goes far to justify their action throughout. It could, indeed, be wished that they had gained their point, as substantially they have (a court of inquiry, though not exactly equivalent to a court of arbitration, offering them at least an equal chance of a satisfactory settlement), without the threat of a strike or the other tactics of a trade union; but the methods of the Government to secure "economy" (so-called) in all departments of state service without regard to other considerations may be urged in excuse of some lapse from the professional standard of conduct. After all, there is a commercial side even to the healing art, and it is not their fault that circumstances forced this to the front. Their decision to abide by the result of an inquiry is of immense importance to us, and we must hope that its significance will be immediately apparent to our leaders, whether of the Pharmaceutical Society or the Retail Pharmacists' Union. It is certain that not our rate of pay only but the whole question of our part in the medical service of the country will come under review, and our case ought to be—indeed, must be—presented by our natural and statutory protectors. We ought to appear not as a body of tradesmen merely but as members, though in a subordinate position, of the same profession as the doctors themselves.

The Interesting Question,

"Does the Pharmaceutical Society justify its existence?" is, I see, to be debated by the Liverpool Pharmacy Club next week. May I suggest as a pendant to this another question for some subsequent meeting of the club? "Is the Retail Pharmacists' Union a necessary evil?" Of the two I venture to think it the more debatable—not that a good deal may not be said on both sides of the former question, but it is rather more of a *chose jugée* than the other, and some candid friends of the Society may feel a certain difficulty in speaking their full minds about their *alma mater*, now so venerable an old lady. The R.P.U., on the contrary, presents no such difficulty—it is young and vigorous, and should welcome a few hard knocks honestly given; besides which, the question relating to it really is more debatable on its own merits. And if a mere "rag" is intended, what a splendid opportunity it affords!

In Reply to "Speedy"

(C. & D., November 17, p. 704), the training of apprentices in the way in which it ought to be done is now no more worth while in the country than in the town, and has not been for a good while past. Moreover, it is, I should say, more difficult to get them, the level of education in country places being considerably lower than in towns. The consequence is likely to be that the errand lad will to a great extent take the place in the shop formerly occupied by the apprentice. This again means a large increase in the number of non-qualified drug-store keepers, which (once more) is the direct result, seen and foretold years ago, of the Society's educational policy. In many country places where a pharmacist has hitherto managed to pick up a decent though precarious living, a non-qualified man would do equally well from a monetary point of view; and these errand-lads, therefore, are not embarking on a "no-thoroughfare" occupation. I am not complaining, but merely stating a fact. It is quite right that we should "move upward, working out the beast," but he won't die. He will survive to bite our heels as we climb the ladder of pharmaceutical progress.

"RAISE FOXES," "a most profitable diversion for professional men," figures as an advertisement in the "Journal of the American Medical Association."

The Sugar Outlook

COMMENTING on the rally in sugar and indications of a revival of confidence under a generally improved demand in the chief consuming countries and the stronger market conditions in Cuba and Java, we suggested in our issue of September 5 the possibility of firmer markets in the near future. Since then the recovery in prices made further progress amounting to 3s. 6d. per cwt. in British cubes, 4s. in American granulated, and well over that amount for

near-at-hand Java sugar, while quotations in white sugar futures gained 3s. 6d. to as much as 5s. 6d. per cwt., according to position. Near positions were particularly affected, and went to a considerable premium at prices ranging up to about 27s. 6d. a few weeks ago. This was precisely in line with the forecast made in our columns at the date mentioned above, when the rapid improvement in the Java situation had not as yet been fully realised in the open market. The trend of prices has wavered to some extent over the latter part of October, and the feeling was recently a little uncertain and nervous, due to the variable reports relating to the new Cuban and Continental beet crops. This partly explains the lull in the general demand and the caution recommended to trade buyers in certain quarters, to say nothing of the bold forecast that had been made that prices must decline within the next few months. Views, however, among trade experts are now bullish as to the course of the market over that somewhat critical period, not only because of crop uncertainties but also due to the law of supply and demand. The fact must not be altogether lost sight of that the market is not confronted with any large supplies of actual sugar, and that owing to the premiums exacted on near-at-hand parcels, invisible or trade stocks are practically everywhere almost down to a minimum. Hence the view is held in some quarters that some increase in the world's production should be readily absorbed by an eventual adequate replenishment of stocks. In the subdued and perplexing state of the market at the moment, it is obvious that a rush of buying would be ill-advised, but the fact remains that the progress of the world's consumption has been more satisfactory within the last month or two, as indicated by the official returns in the case of this country, which for September at over 135,000 tons compared favourably with the same month last year. The official home figures for the nine months work out as follows, with comparison for two years previous :—

	1921	1922	1923
	Tons	Tons	Tons
U.K. imports, Jan.-Sept.	1,030,227	1,454,295	1,229,591
U.K. consumption,			
Jan.-Sept.	1,042,557	1,208,120	1,119,988
U.K. stocks, Sept. 30 ...	288,550	264,400	259,300

The total stocks in bond as given above, at about 259,000 tons, indicate, as compared with two months previous a shrinkage of about 48,000 tons, and they are well under those at the same date last year and two years ago, while barely equal to two months' needs at the rate of consumption shown for September. Market events in sugar depend largely on Cuban prospects and the European beet production. Mr. Licht's reduced estimate of the latter at 5,105,000 tons would mean a prospective excess of about 553,000 tons compared with the last campaign, but judging from more recent estimates by a French technical authority based on the reduced weight of the roots (though yielding a better percentage of saccharine), crop results so far would show that recent expert forecasts will have to be lowered still further, especially for France, whose production would be about 100,000 tons less than had been expected. This, together with a revision in the case of Belgium and Czechoslovakia, would already represent a deficit from early estimates of about 180,000 tons, to say nothing of the considerably reduced forecast of the German crop down to about 1½ million tons. While it is as yet too early to get any very reliable forecast, there seems, nevertheless, indication that the total European out-turn will prove to have been appreciably overestimated. Out

of the Czecho-Slovakian crop of say 900,000 tons, half a million tons should become available for export, but while a large portion of this sugar is expected to be taken by this country and France, it is now reported that considerable quantities have already been contracted for shipment to Northern European ports, including Russia. The delay in the European beet sugar production, which is gradually coming back to its own, is admittedly greater than had generally been anticipated, partly because of the serious internal conditions in Germany, where the sowings this season were reduced by about 5 per cent. Under impoverished economic conditions, this year's German crop, however, may prove sufficient to meet domestic needs, apart perhaps from certain importations for the manufacture of confectionery, etc., for exportation. Recently it was estimated by a foreign authority that, exclusive of Russia, Continental Europe was capable of absorbing this season something like 6½ million tons of raw sugar, and should therefore require importations from other parts of the world of 1,675,000 tons. As regards Java sugar, there is no doubt that the takings for the Eastern markets, including Japan, have been considerably larger of late, and that offers from that source will be limited for some time to come. Willett & Grey's estimate of the new Cuban crop is given as 3,700,000 tons (which is 100,000 tons less than the top estimate reported recently from another quarter), against a total of 3,602,910 tons produced in the last campaign and including the increased yield looked for by the same authority in Porto Rico, Hawaiian, the Philippines, and also in the U.S.A. beet crop of 750,000 tons against 615,936 tons last crop; this would give an excess from these sources combined of 364,000 tons. Willett & Grey's estimate of the total world's production of cane and beet sugar for this season is computed at 18,957,000 tons, or an increase of close on 1,000,000 tons compared to the previous campaign, but it is quite on the cards that in the light of the latest reports referred to, of reduced estimates of the Continental beet crops, Willett & Grey's figures will eventually be further revised. There is a wide discrepancy in the Cuban crop forecasts, which vary down to 3,400,000 tons. There is, in our opinion, not much to be apprehended in the way of pressure of new Continental sugar, and as invisible stocks in America and on this side are apparently low, the trade demand can hardly be expected to remain in abeyance for very long. The price of white sugar for spring delivery at about 26s. per cwt. is relatively high compared with this time last year, but the outlook is healthy, and does not suggest excessive supplies.

Insurance Dispensing Terms

VI. Dispensing Fees

In previous articles we have dealt with ingredient prices and with establishment charges. We now propose to consider the third portion of the total cost of the prescription—the dispensing fee. These dispensing fees actually constitute the Insurance chemist's personal remuneration, and it is therefore worth while to examine them in some detail. The drug tariffs of 1913, 1914 and 1915 allowed a certain percentage profit to be added to the cost price of all drugs in order to cover the chemist's establishment expenses, and for this reason those preparations which were supplied from stock, and therefore involved no expenditure of professional skill in handing them to the patient, carried no dispensing fee. This arrangement, however, was condemned by the Departmental Committee, which decided that a separate flat-rate figure of cost was

to be added to the value of each prescription in order to cover the establishment cost portion of the chemist's expenses. In addition to this, every prescription for a medicament was to be given a dispensing fee proper, which varied according to the character of the prescription and the class of preparation prescribed. It is useful, in this connection, to recall the provisions of the 1915 tariff, which were as follows:—

In dispensing medicines for insured persons a dispensing fee may be charged, as a rule, in the case of most preparations ordered for internal or external use. There is, however, an exception to this rule where certain solid preparations *included in the list* are ordered uncompounded, i.e., without admixture with any other drug or preparation. The following are the preparations *included in the list* on which no dispensing fee is to be charged where they are ordered uncompounded: Capsules, confections, lozenges, ointments, pastes, pills, plasters, powders (bulk), suppositories, tablets.

This exception to the rule does not apply in the case of other solid preparations than those named above, nor in the case of capsules, lozenges, ointments, pastes, pills, plasters, powders, suppositories and tablets which are *not included in the list*; where such preparations are ordered, whether compounded or uncompounded, a dispensing fee is also to be charged. A dispensing fee is also to be charged in the case of all simple and compound powders *included in the list*, where one or more quantities are ordered to be weighed separately.

Dispensing fees are chargeable on (a) all liquid preparations prescribed for internal or external use as medicines, *whether or not they are included by name in the list*; (b) all solid preparations prescribed for internal or external use as medicines, *except* such capsules, confections, lozenges, ointments, pastes, pills, plasters, powders (bulk), suppositories and tablets as are *included in the list* and ordered uncompounded.

The dispensing fees payable in 1915 are shown in the second column of the table printed below:—

Classification of Medicaments in Commercial Tariff, 1916	Dispensing Fees (in Pence) in 1915 Tariff	Dispensing Fees (in Pence) in 1916 Tariff (without establishment allowance of 0.8d.)	Mr. Harrison's Index Figures (or average number of minutes)	Average Number of Minutes in Dispensing Test carried out by Departmental Committee
Mixtures, liniments, lotions, and all similar liquid medicaments.. .	2	2.0	5	7
Ointments, pastes, confections ..	3	2.8	7	6 to 10
Emulsions ..	4	3.2	8	10
Powders up to 6 ..	2	2.4	6	12
Powders over 6 and up to 12 ..	3	3.6	9	—
Cachets up to 6 ..	3	3.6	9	—
Cachets over 6 and up to 12 ..	4	4.8	12	—
Pills up to 24 ..	4	4.8	12	23
Pills over 24 and up to 48 ..	5	6.0	15	—
Plasters ..	6	6.0	15	30
Blisters ..	4	3.2	8	11
Suppositories, Bougies,				
Ampoules, up to 6 ..	3 & 4	6.0	15	30 to 40
Lozenges, to 6 ..				
Pessaries, Capsules,				
Pastilles ditto, over 6 and up to 12 ..	—	7.2	18	—
Granules ..	3 & 4	9.6	24	51
Tablets up to 12 ..	3	8.0	20	60
Tablets over 12 and up to 24 ..	4	8.8	22	—

With reference to these fees the report of the Departmental Committee states:—

The scale in the (1915) tariff is graded partly according to the class of medicament which is dispensed and in some instances by reference to other considerations. (19)

The present (1915) scale appears to have departed from any strict principle of grading by reference to the time and

skill involved in the particular dispensing operation, and to represent a series of flat rates compiled presumably after consideration of the relative frequency of the various kinds of operations to be performed by the chemist in the ordinary run of his Insurance dispensing. (34)

For these reasons, therefore, a revision of the dispensing-scale was undertaken. The establishment allowance in the 1916 tariff was the equivalent of the percentage profit on drugs included in the 1915 tariff, so that the dispensing fees proper of the 1916 tariff were intended to replace the dispensing fees given in the 1915 tariff. A comparison of the figures in the second and third columns of the table in question shows that, figure for figure, the 1916 fees were, in some cases, apparently rather more favourable to the chemist than the 1915 fees. It must be remembered, however, that a large number of preparations included in the commercial tariff of 1916 carried a reduced dispensing fee, and therefore the actual gain to the chemist was smaller than a comparison of the figures would lead one to believe. It is very desirable to ascertain the basis on which the revised fees for 1916 were calculated. The chief witness examined by the Departmental Committee on the subject of dispensing was the late Lieutenant-Colonel (then Mr.) E. F. Harrison, B.Sc., F.I.C., Ph.C., whose evidence occupied the whole of the tenth day of the Committee's sitting (July 1, 1915). The two members of the Departmental Committee who examined this witness at some length were Mr. S. P. Vivian, then assistant secretary to the Insurance Commissioners, and now Registrar General, and Mr. W. J. Uggle Woolcock, then secretary and registrar of the Pharmaceutical Society. A subcommittee had been appointed to conduct a dispensing test in order to ascertain the actual time taken to dispense the various classes of medicaments for which it was desired to calculate an appropriate dispensing fee. The subcommittee, consisting of Dr. Alfred Cox (secretary of the British Medical Association), Mr. Woolcock, and Dr. Adams (secretary of the Departmental Committee), selected certain prescriptions which were dispensed in one of the dispensing laboratories of the Pharmaceutical Society by two of the Society's demonstrators in pharmaceuticals. (Examples of these prescriptions are given on page 726; the time taken in dispensing the prescriptions is given on the left of each prescription, and notes on each class of preparation are appended.) The arrangement of the Society's dispensary is comparable with that of a pharmacy; but in a pharmacy dealing with the prescriptions of only a limited number of doctors a convenient arrangement of bottles containing frequently prescribed drugs would no doubt be made and a slight saving in time taken in fetching bottles from different parts of the pharmacy would be effected. On the other hand, the dispensers engaged in this investigation were experts, and in so far as the more difficult operations of pharmacy were involved were undoubtedly able to perform them more expeditiously than the average pharmacist. The times indicated cover the period actually occupied from the completion of reading the prescription to the placing of the wrapped, finished article on the counter in front of the dispenser. No allowance was made for time taken in receiving the prescription or dealing with it after the article had been finished. In order to understand clearly the method adopted for calculating the dispensing fees, it is necessary to consider in some detail the evidence given on the tenth day of the committee's sitting. Colonel Harrison had been furnished with the results of the dispensing test, and had been asked to give evidence on these points. The time basis was evidently considered to be the

most suitable for the calculation of fees, as the following extracts will show:—

Mr. Vivian: It seems to me that we ought to base the scale as much on skill as time.

Mr. Harrison: I do not think you can distinguish degrees of skill. (Question 4640)

Mr. Harrison: If a man is qualified to dispense, I think it should be demanded of him that he should dispense any likely things, and therefore, whatever he dispensed, his time should be paid for at the same rate. (Q. 4641)

Mr. Harrison: The time basis is a very convenient and fair one to furnish an idea of the ratios in which the medicament classes should stand to one another, and I do not quite see how any other could be arrived at. (Q. 4644)

Mr. Woolcock: I am going on the time because I do not feel that I can combine both time and skill in one figure. (Q. 4734)

Mr. Woolcock: Are you basing it (the calculation of an index figure for emulsions) on the difficulty of making (i.e., skill required) or on the average time?

Mr. Harrison: I am basing it on the average time according to my general experience. (Q. 4737)

The foregoing extracts would certainly give one the impression that the Committee had agreed to discard the element of skill in favour of the element of time as a basis of their calculations. This impression is strengthened when we find that at a later stage of the day's inquiry Colonel Harrison, in response to a suggestion from Mr. Woolcock, compiled a set of index figures based on the average time taken to dispense different classes of medicaments. These figures, as we shall endeavour to show, appear to be the actual basis adopted by the Committee for the calculation of the dispensing fees which they finally agreed upon. Yet with this impression in one's mind it is somewhat difficult to understand the following statement included in Paragraph 42 of the Departmental Committee's Report: 'Each dispensing fee has been determined with careful regard to the relative claims of each class of prescription upon a dispenser's time and skill; see Minutes of Evidence.—Tenth Day.'

Progressive Shellac Deliveries

We have on several occasions drawn attention to the remarkable progressive rate of the London shellac deliveries from year to year, and also to the increased quantities that have been diverted from Calcutta direct to other countries, apart from the lion's share usually absorbed by the United States. There has not been wanting evidence of the distinctly increased world's consumption; and the fact that supply and demand during more recent years has been running more closely together, undoubtedly explains the highly inflated level of values compared to pre-war times. Reserve stocks here, which were again reduced last month by 3,504 cases to 9,895 cases, are comparatively small, due to the exceedingly heavy deliveries of 6,421 cases, or only slightly under the returns for August last. It is hardly likely that such outgoings will be reached for the current month, seeing that the returns so far are poor compared with last month; on the other hand, incomings look like continuing very limited, so that it is doubtful whether the present strong statistical position will deteriorate to any notable extent by the end of this month. The slackening spot trade demand since last month after the marked activity in October is not really surprising, and may possibly lead to concessions on the part of holders, provided c.i.f. costs for new shipments remain at about 300s., as for a while past. The fact has to be noted at the same time that last month's shipments from Calcutta at 26,576 cwt. were roughly one-third less than for the previous

month, although considerably in excess of the very low returns for the same month last year. With stocks here barely equal to two months' deliveries, based on the monthly average this year to end of October of about 5,060 cases, and short arrivals in sight, the market is not unlikely to show some resistance unless weak features become apparent in the Calcutta position. Prices there in August last were down at around 120 rupees when the London spot price of TN orange fluctuated down to about 260s. and forward positions stood at about 20s. discount, but Calcutta quotations recently oscillated in the neighbourhood of 150 rupees after touching 155 rupees. Within the last few weeks the spot value has varied between 320s. and 310s. per cwt., or 55s. to 65s. below the figure current at the beginning of this year, when the stocks were still very low and Calcutta quotations much higher than they are now. The statistics given below are very striking, not only in regard to the increased supplies over a period of ten months during more recent years, but also in respect of the progressive rate of the deliveries from year to year, as we already pointed out above:—

	1920	1921	1922	1923
	In cases	In cases	In cases	In cases
Landings—Jan.-Oct. ..	42,719	43,001	45,786	56,218
Deliveries—Jan.-Oct. ..	39,044	44,579	48,771	50,589
Incr. or decr. in stocks in ten months	+3,655	-1,578	-2,985	+5,629
Stocks on Oct. 31	13,882	10,645	8,064	9,895

As seen above, each ten months' period since 1920 shows an increase against the previous one, both in the landings and deliveries, while the latter have kept pace with the former, on the whole, which is indicative of the very satisfactory progress of consumption. The total landings this year to the end of October were comparatively heavy at 56,218 cases, thus denoting an excess of 5,629 cases over the deliveries in contrast to decreases for the same period of the two previous years. The stocks on October 31 last were a little larger than a year ago, but less than they were two and three years ago. The monthly average of the deliveries for the last ten months of 5,058 cases compares with 4,769, 4,450 and 4,190 cases respectively for the whole of the three previous years. The development of the world's consumption since the end of the war has certainly made rapid strides, and so long as current supplies are so well absorbed and do not increase to any material extent, the market value of shellac will probably continue at inflated figures chiefly as the outcome of supply and demand.

An Italian Compliment

SIGNOR MUSSOLINI is apparently fully alive to the value of education as an economic as well as political factor, and with his customary boldness has taken a new step in national propaganda. By virtue of a Royal Decree, in future all foreigners inscribed as students in Italian higher educational institutes, including the universities, will be exempted from the payment of all fees and surcharges. In circulating this decision to all the Italian diplomatic and consular representatives abroad with a request to use all means to make it widely known, Signor Mussolini expresses the opinion "that this concession will undoubtedly attract foreign students in progressively increasing numbers to our universities, which combine the most glorious traditions with an equipment satisfying in every respect the requirements of modern knowledge, and which, together with Italy herself, exalt science and civilisation."

Timing Insurance Prescriptions

The following is a selection from the prescriptions chosen by the Departmental Committee of 1915 (to which frequent reference has been made in our present series of editorial articles on Insurance Dispensing terms) and dispensed in the laboratories of the Pharmaceutical Society of Great Britain with a view of establishing the average time required for dispensing each class of medicament. In order to save space, we have deleted directions for use; it must be remembered, however, that labelling was part of the test. Brief notes are added where required.

Dental Board of the United Kingdom

THE Dental Board of the United Kingdom opened its fifth (and penultimate) session at 44 Hallam Street, London, W., on November 13, the chairman (the Rt. Hon. F. D. Ackland) presiding. The first business was the

CHAIRMAN'S ADDRESS.

which was to a considerable extent an expansion of that delivered by him at the previous session (*C. & D.*, I, 1923, p. 740). The chairman, after a few general remarks, said that an opportunity would be taken to amend the table of fees, and to obtain authority for their remission in certain cases, in order to carry out the wishes of the Board and prevent hardship for those who would have qualified prior to the passing of the Dentists Act, 1921, had it not been for the war. The reduction of the fee payable for retention of names on the Register could not be dealt with during the present session. A claim for income-tax, both large and unexpected, has been recently made upon the funds, and, if it is sustained, the Board's difficulties in meeting the wishes of those who desire a reduction in the fee referred to will become still greater. The chairman held that it was of the utmost importance, if sufficient dentists are to be obtained, that the number of students should be increased, and added that the Board had already taken steps to that end. The question of dental propaganda was referred to in the following passage :—

A notice of motion also appears upon the programme in connection with propaganda for instructing the public in the great importance of having their teeth properly attended to at regular intervals, and of taking care to prevent decay. From the point of view of the health of the nation this matter is one which requires earnest consideration, and if the Board can take steps to carry out some of the suggestions made in the report of the Departmental Committee,

of which I had the honour to be chairman, I feel sure that it will be to the public advantage.

The chairman announced that arrangements have been made for an extension of the series of lectures on the higher scientific branches of dentistry. The agreement arrived at between the British Dental Association and representatives of co-operative societies, referred to at the May session of the Board, has been solved so far as they are concerned. The question has been raised, however, as to whether the arrangement come to constitutes the carrying on of the business of dentistry by the societies, and the Board will have to consider this. In his concluding paragraphs the chairman said that there had of late been "a noticeable improvement in regard to advertisements, signs, and other matters which, from a professional point of view, are not desirable." He added a warning in general terms to the effect that all dentists might by now be expected to know the views of the Board on the subject, and remarked that for an unregistered person to see a patient in any way at all, even in connection with the fitting of artificial teeth, was a breach of the law. The Board then proceeded to deal with complaints against dentists.

NOT UNDER THE D.D.A.—The principal cartoon (by Bernard Partridge) in "Punch" of November 7, is entitled "An Heroic Remedy," and represents the Premier as a medical man, in a dispensary, in the act of pouring a dose from a bottle labelled "Protection" into a wineglass (on which no graduations are visible), while a working man watches him. The accompanying dialogue is as follows:—

Dr. Baldwin (to patient suffering from acute unemployment): "Now some doctors call this a very dangerous drug; but yours is an extreme case and calls for extreme measures."

Patient : " I don't care what it is, Guv'nor, so long as it cures me."

Pharmaceutical Society of Ireland

Council-meeting

The monthly meeting of the Council of the Pharmaceutical Society of Ireland was held on November 13 at 67 Lower Mount Street, Dublin, Dr. A. J. Barnes (President) in the chair. The following members of the Council were also present: Mr. R. Blair (Vice-President), Mr. D. M. Watson (Treasurer), Dr. J. A. Walsh, Dr. J. A. Mitchell, Messrs. J. E. Connor, J.P., John Smith, G. A. McLean Lee, J. A. Doyle, Fred Storey, John A. Bingham, and John Adams. Messrs. Andrew Wilson, D. J. Nugent, and V. E. Hanna sent apologies for non-attendance.

EXAMINATION REGULATION

The REGISTRAR (Mr. A. T. Ferrall) read a letter from the Ministry of Home Affairs transmitting copy of an order approving of the amendment of the Pharmaceutical Licence Examination Regulation VII. The Regulation as amended is as follows:—

The minimum pass percentage in each sub-division of pharmacy shall be 50, and in botany, *materia medica*, and chemistry, 40 each, and the candidates, in order to pass, must make a total of 55 per cent.

In dividing the subjects for examination, the examiner shall maintain, in each division, the minimum percentage adopted by this Council for the subject of which it is a division.

The above system of marking has been adopted by the Council for the guidance of the examiners; but it is clearly understood that they shall have, in conference and jointly, a discretionary power to pass a candidate whose general information and intelligence appear to justify such a course, though he may not, in some one subject, have attained to the standard laid down; provided it be distinctly understood that no candidate shall be passed who has failed to obtain the minimum number of marks in each sub-division of pharmacy.

A candidate who obtains 70 per cent. of the total marks and not less than 50 per cent. in each subject shall be awarded a pass with honours.

GOVERNMENT VISITOR'S REPORT

The REGISTRAR submitted a letter from the Ministry of Home Affairs transmitting a copy of the report of Sir John Wm. Moore, M.D., Government visitor. The report was referred to the Law Committee.

CHEMISTS IN THE FREE STATE ARMY

Mr. STOREY said he had noticed that the Irish Free State had conferred commissioned rank on pharmaceutical chemists in the Army, and he thought there should be some expression of appreciation from the Society to the Free State Government for their action. He considered their action an example that should be followed by other Armies. He had always thought it an extraordinary thing that pharmaceutical chemists who joined the Army simply got the rank of private. He thought the Council should recognise in some way the action of the Free State Government. As one from the North he certainly appreciated it very much. He believed the pharmaceutical chemists would not have the same facilities in the Six Counties. They had no control of the Army there. They in the South were coming to a time when they would be in touch with the Government on pharmaceutical affairs; and it would be no harm to send a letter of appreciation, acknowledging what the Government had done.

The PRESIDENT suggested that it would be better to address a letter to the Government in the first instance, asking for particulars of the matter, and on getting the statement verified to thank them then. The Council, he said, had not yet learned of it officially.

Mr. BLAIR agreed that it would be well to have the statement officially confirmed.

Mr. WATSON suggested that a communication be sent to the Government, asking for full particulars of the Army arrangements for pharmaceutical chemists, with a view to inserting them in the calendar. It was decided to adopt this course.

A SUGGESTED REFERENDUM

A communication was read from A. & J. Robinson, solicitors to the Society, in reference to the suggested referendum for ascertaining the opinion of all pharmaceutical chemists, chemists and druggists, and registered druggists on the Register on the question as to whether the Registered Druggist examination should be discontinued. Messrs. Robinson wrote:—

In our opinion the suggested referendum would be of no value whatever, and would have no binding effect on any person. It is wholly illegal, and the Society has no power whatever to apply any portion of its fund for such a purpose.

Mr. STOREY said that, in the present state of pharmacy, they had better let the matter drop. It would have been very useful to see whether the members throughout the country thought that they should continue or discontinue the Registered Druggist examination. If the Society had been going on as usual they could have got over the difficulty of the cost. But under the circumstances it was better to let the matter drop now.

The suggestion was agreed to.

LETTER FROM MR. JAMES TATE

The REGISTRAR read a letter from Mr. James Tate, M.P.S.I., acknowledging the receipt of his replica of the Presidential badge. Mr. Tate wrote, referring to the replica:—

It is very neat and beautiful indeed, and I shall prize it as a charming souvenir of the very interesting and agreeable time spent under your shadow and surrounded with a phalanx of worthy councillors, whose motto, I trust, will long remain "Ich Dien." I think it a pity that our Society cannot still remain intact. Thanks for your punctuality in forwarding replica, and my thanks to the Society for granting a desire which I once expressed.

CHANGES OF ADDRESS

Mr. John Bourke, Ph.C., to the Medical Hall, Lucan; Mr. J. Reynolds, M.B., Ph. C., to 55 Elkington Road, Barry Port, Carm.; Mr. P. J. Killachy, Ph.C., to 7 Main Street, Dundrum co. Dublin; and Mr. P. J. Clasby Ph.C., to the Medical Hall, Stradbally, Leix.

REPORTS FROM EXAMINERS

The REGISTRAR submitted reports from the examiners upon the Preliminary, Pharmaceutical Licence, Pharmaceutical Assistant, and Registered Druggist examinations. For the Preliminary examination there were thirty-three candidates, of whom eighteen passed, seven of whom were women. There were no honours. For the Pharmaceutical Licence examination, there were eighteen candidates, seven of whom were women. Seven candidates passed, of whom three were women. The best total was received by Mary S. Mooney. There were no honours. Some of the totals were very low. For the Pharmaceutical Assistant examination there were three candidates, of whom only one, a woman, passed. For the Registered Druggist examination there were seven candidates, of whom five passed. There was no examination in Belfast.

REPORTS FROM COMMITTEES

Reports were received from the Law Committee, the House Committee, and the Special Law Committee, and adopted.

RE-ELECTION OF EXAMINERS

On the motion of Mr. STOREY, seconded by Mr. SMITH, the following were re-elected examiners: For the Preliminary examination, Mr. T. A. W. Hill, M.A.; for botany and *materia medica*, Mr. C. F. Digges, M.P.S.I.; for chemistry, Professor Hugh Ryan, D.Sc.; for the Pharmaceutical Assistant examination, Mr. James T. Dwyer, M.P.S.I.; and for the Registered Druggist examination, Dr. F. E. Preston, M.P.S.I.

SEALING OF PHARMACEUTICAL LICENCES

On the motion of Dr. MITCHELL, seconded by Mr. CONNOR, it was resolved that the pharmaceutical licences of the following be sealed:—

C. McKeown, D. Hartnett, Emma F. Greene, Ellen B. Young, Mary S. Mooney, V. G. Bowen, and J. J. Joyce.

Chapters in the Recent History of Quinine

By H. S. ABRAHAMSON

VIII. The Disintegration of the British Quinine Corporation

It is on record that there was much joy in every camp when the British Quinine Corporation was formed and the subsequent agreement with the Dutch combine concluded. There was a fly in the amber, however, from the first. Certain essential interests were hostile to the existence of the Corporation, and from the moment of its inception no opportunity was lost of inserting the thin edge of the wedge, a wedge that was finally driven home—an action which I still think was disastrous from every conceivable point of view. When it was discovered, after barely eighteen months of active operations, that quinine was figuratively as well as literally a "drug" on the market, I—(together with Sir Walter Townley, who afforded me so much valuable support)—tried every possible means to bring about the satisfaction of the reasonable demands of all parties. But so many advanced unreasonable arguments; so many were prepared to use any argument, fair or foul, in order to force the hands of the Dutch "combine," so that the agreement might be cancelled. High hopes had, indeed, been indulged in when the self-same agreement was signed in 1919. "You'll never get the British wholesale druggists to hang together" was a warning of which I took, perhaps, insufficient heed, addressed to me when the Corporation first took shape. Here was an agreement signed by a dozen prominent firms affecting three million ounces of quinine per annum, made for a period of five years (with an option on the Dutch side for extension for another five), whereby the total requirements of the British quinine trade were guaranteed. This, it was proposed on the British side to calmly tear up! It should be said that not all of the signatories to the agreement actually put forward such drastic demands, but it may be added that with the exception of possibly two or three firms, the remainder were only too glad to fall into line. The position was difficult to a degree. The fact that the Kinabureau had reduced the price from 4s. 1d. per oz. to 3s. 5d. per oz. at a period when many of them held considerable stocks may be held largely responsible for this. Yet no murmurs were heard, argued the "Combine" representative in London, logically enough, when the price was raised earlier in the life of the Corporation.

The few who stood for carrying out the contract in a modified form soon crossed over to the side of the great majority. It seemed that there was little to be done. Much contumely and reproach was cast on me about this time, as though I could be held liable for (a) trained men of business assuming well-defined responsibilities, (b) their estimates of requirements, (c) the Dutch policy in regard to the price, and for (d) the slump which had fastened its tentacles on trade. A whipping boy was required. I was paid presumably, in the opinion of some, to save a few tender and quivering hides. The wedge was being driven home. Finally they gave way.

Now it is not a matter of extreme difficulty to take a charitable view of the standpoint adopted by the disgruntled members of the Corporation. Here they were, saddled with prospective liabilities amounting jointly to about half a million sterling annually, whilst at the same time they could not foresee what prospect existed of disposing of their purchases at a profit. But they had assumed these liabilities with their eyes very wide open. On the other hand, the sudden curtailment of sales abroad as a result of the "slump" brought them into acute competition not only one with the other, but particularly with the Dutch manufacturers and Howards. Efforts were made—and many hours of weary labour were spent in the efforts—to stabilise prices in the various countries concerned. But a jumping franc, a mobile dollar and a runaway mark could not be brought into line. An offer of quinine

made in Paris one day might be even above the English ounce price: the next day without any alteration in the quotation, due to a movement in the value of the franc in London, the same offer might be many pence below the price at which members of the Corporation were by virtue of their agreement with the "Combine" permitted to sell. In fairness to them be it said, members of the Corporation certainly did not—no one could—anticipate this sort of thing when they entered into the arrangement. But what they could have anticipated when they entered into the agreements was, what their normal and proper requirements were. Which is what they were asked to do. Perhaps the fact that they had been cut off from all but essential supplies during the period of Government control had somewhat distorted their vision. Anyway, the fact remains that the root of the trouble may be largely sought in the unfortunate optimism which characterised the figures submitted of the quantities of quinine which many of the firms concerned thought they could dispose of annually. Indeed, the clamour when the negotiations with the "Combine" were being conducted was not for reduced quantities, but, like that of a certain sugary character in fiction, for "More!" In its infancy there was no satisfying the cry of members of the Corporation for quinine. If shipments from Java were a few days late, loud were the shrieks of protest. If an "outside" firm applied for membership the chance of admission was about as great as that of a Billingsgate fishporter becoming a member of the Carlton Club. But still, within two years a complete *volte face* had taken place. No man trusted his neighbour. The whole structure toppled over. Several forgot ordinary decencies in their haste to get out.

To say that I strained myself to the utmost so that the Corporation might be saved is putting the statement mildly. It is true that my own position was at stake, but I was, though concerned about this, far more perturbed at the prospective break-up of the Corporation. The success of German industry, often at the expense of British enterprise, before the war, was largely due to intensive organisation and understandings between manufacturers and merchants. It was surely not too much to hope that this could be repeated throughout the quinine industry, particularly as so much groundwork existed in the shape of the Cinchona Agreement, the Dutch manufacturers' combine, *et alia*. But it was not to last. My efforts were wasted labour. It was a case of myself *contra mundum*.

The Dutch manufacturers finally, after months of laborious attempts to find a *modus vivendi*, offered to concede the principal demand of the members of the Corporation: the agreement was cancelled. Howards followed the lead of the Dutch manufacturers. The "Combine" asked for a *quid pro quo*, and this was not withheld, to wit, separate agreements with the principal buyers in the United Kingdom for a period of years whereby the whilom members of the Corporation would be obliged to purchase their requirements from the "Combine."

There were, alas! few mourners when the Corporation expired. The "essential interests" which inserted the wedge, of which mention has been made in the early part of this chapter, had delivered their final sledge-hammer blow and retired satisfied from the fray. The "essential interests" were "bonnie fechters," and won the day. Yet it has been proved in other connections that it is far easier to destroy than to construct. Unmourned to-day, the premature demise of the Corporation may yet prove to be a calamity to dealers in quinine in this country. Quinine politics have been known to present an entirely changed front within a very limited space of time ere now. And history has a habit of repeating itself.

The British Quinine Corporation suffered an untimely death; cut off, as it was, in its prime. With but a modicum of goodwill on the part of a few the Corporation might still have been alive doing a useful work.

Trade Report

42 Cannon Street, E.C.4, November 22.

In spite of the unsettled political conditions at home and abroad, and the erratic movements in rates of exchange, there is a firm tone generally in the chemical and drug markets, and quite a number of items have advanced. Interest in crude drugs has centred in the auction this week. Privately slab dragon's blood has been in good demand for export, and the same applies to condurango; the cheaper c.i.f. offers of balsam tolu have been withdrawn; copaiba is in more inquiry. Senega is very dull, while cascara sagrada remains firm; new Spanish saffron is dearer; menthol and agar agar are easier; camphor is quiet. Among seeds and spices, hemp is dearer and cumin easier. Cloves, cinnamon, nutmegs and mace are all higher than last week; pepper is firm. Fixed oils have been in better demand, with a rise in castor, coconut, palm, palm-kernel, linseed and rape oils. Further advances have been made in a number of pharmaceutical chemicals imported from Germany, the position becoming more acute on account of the German Government having defaulted or refusing to meet the 26 per cent. reparations duty on imports to this country (see p. 712). The tone in industrial chemicals is firmer all round and higher prices in a number of items are noted.

Higher	Firmer	Easier	Lower
Cardamoms	Acetic acid	Agar-agar	Anise, star, oil
Castor oil	Albumen	Carbolic acid	(c.i.f.)
Cinnamon leaf oil (Cey.)	Cinnamom	crystals	Camphor oil
Cloves (Zan.)	Formaldehyde	Cassia oil (c.i.f.)	Geranium oil
Condurango	Lemon oil (c.i.f.)	Coconut (desic.)	(Bourb.)
Dragon's blood	Peppers	Cumin seed	Magnesium oxide
Hemp seed	I henacetin	Lime oil (hand-pressed)	Pitch
Honey	Potash carb.	Menthol	
Hydroquinone	Sodium acetate	Patchouli oil	
Linseed oil	Wax, veget. (Jp.)	Sarsaparilla (grey Jamaica)	
Lithopone			
Mace			
Nutmegs			
Orange oil			
Palm kernel oil			
Palm oil			
Paraldehyde			
Phenazone			
Salol			

Cablegram

NEW YORK, November 21.—Business is dull. Menthol is 50c. per lb. lower at \$14.50, and Mexican sarsaparilla is 2c. cheaper at 27c. per lb. Mercury has declined to \$60.00 per flask.

Exchange Rates on London

The following is a list of Continental and other exchange rates against the pound sterling on London prevailing at 4 p.m. on Wednesday :-

Place	Method of Quoting	Par of Exchange	November 14	November 21
Amsterdam	Fl. to £	12.10 $\frac{1}{2}$	11.57 $\frac{1}{2}$ —11.58	11.48 $\frac{1}{2}$ —11.48 $\frac{1}{2}$

* Nominal.

Crude Drugs, etc.

AGAR-AGAR is arriving a little more freely; spot price of No. 1 is slightly easier, Japanese No. 1 offering at 5s. 7 $\frac{1}{2}$ d. per lb. on the spot; to arrive 5s. c.i.f. is

quoted. No. 2 quality is 5s. 6d. spot and 4s. 10d. c.i.f. to arrive.

ALBUMEN is firmer at from 4s. to 4s. 1d. per lb. for prime Chinese egg, and for November-December shipment 4s. c.i.f. has been paid.

ANTIMONY.—There continues to be a strong feeling due to its marked scarcity. High-grade English regulus stands at £42 to £42 10s. a ton. Chinese refined on the spot is quoted £33 10s. to £34, and c.i.f. terms to arrive are about £31 10s. to £32, while the latter figure is asked for good-sized lots of best French antimony for prompt shipment. There is a keen demand for foreign regulus, and America is a steady buyer. Crude on the spot is quoted at £23, and for shipment at £21 per ton c.i.f.

BALSAM TOLU.—From a parcel now landing from the Continent 10s. per lb. is quoted for a limited quantity. The cheaper offers of goods to arrive have been withdrawn.

BISMUTH.—The "ring" price continues to be 10s. per lb., with a good steady sale thereat, the more liberal supplies being apparently well absorbed.

CAMPHOR (REFINED).—Japanese 2 $\frac{1}{2}$ lb. slabs are quiet, with spot sellers at 3s. 9d. per lb., and for November-December shipment 3s. 6d. c.i.f. is quoted; $\frac{1}{4}$ oz. tablets now landing can be had at 4s. 8d. per lb. White B.B. flowers is 4s. 4d., and to arrive 4s. 1d. c.i.f. has been paid. Crude is 3s. 1d. to 3s. 2d., and November-December shipment 3s. 10d. c.i.f.

CASSIA LIGNEA is quiet, with selected offering at 47s. 6d. per cwt., and broken at 32s. 6d. on the spot.

CHILLIES are quiet, with Zanzibar offering at from 50s. to 52s. 6d. per cwt. on the spot, and at 50s. c.i.f. to arrive. Japan on the spot is 160s., Sierra Leone 50s., and Mombasa 50s. CAPSICUMS are quoted at from 37s. 6d. to 40s. for inferior to fair.

CINNAMON is firmer, with sellers of Ceylon assortm: at 10 $\frac{1}{2}$ d. c.i.f. and chips at 2 $\frac{1}{2}$ d. c.i.f.; on spot, firsts is 11 $\frac{1}{2}$ d., seconds 10 $\frac{1}{2}$ d., thirds 10d., and chips 2 $\frac{1}{2}$ d. per lb.

CLOVES.—Zanzibar are dearer at from 1s. 4d. to 1s. 5 $\frac{1}{2}$ d. per lb. on the spot, according to quality. Arrival prices are higher, business including November-January shipment at from 1s. 4 $\frac{1}{2}$ d. to 1s. 4 $\frac{1}{2}$ d., December-February 1s. 4 $\frac{1}{2}$ d., and January-March at 1s. 4 $\frac{1}{2}$ d. to 1s. 5 $\frac{1}{2}$ d. c.i.f. The weekly wharf statistics show 1,140 bales landed and 114 delivered, leaving a stock of 20,944 bales, against 392 bales in 1922.

COCOA BUTTER.—Prime English is offered at 1s. 2d. per lb. on the spot, in not less than one-ton lots.

COCONUT (DESICCATED) is quiet, with fine Ceylon offering at 44s., and medium at 43s. 3d. per cwt. To arrive, sellers of September-October shipment quote 42s., and October-November shipment has been sold at 41s. 9d. to 41s. 6d. c.i.f.

COD LIVER OIL.—Our Bergen correspondent writes on November 19 :—Market continues quiet at 102s. to 104s. per barrel c.i.f. London for finest non-freezing steam-refined quality. Up to November 3, 2,385,629 hectolitres were exported from Norway. The production in 1923 was 85,073 hect.

CONDURANGO.—A fair amount of business has been done lately for the Continent, and only limited supplies are now offered at from 6 $\frac{1}{2}$ d. to 7d. per lb.

COPAIBA has shown more inquiry. Maracaibo can be had on the spot at from 1s. 6d. to 1s. 8d. per lb., according to sample.

ELM BARK.—Grinding quality for forward shipment is quoted at 11d. per lb., c.i.f., there being nothing on the spot. Slabs can be had at 1s. 2d. on spot, supplies are scarce and difficult to get.

GINGER is steady, fair washed rough Cochin selling at from 82s. 6d. to 85s. per cwt., and for January-March shipment 70s. c.i.f. is quoted. Ordinary to fair Calicut is 80s. to 87s. 6d.; Cochin B cut, 130s.; and C cut 107s. 6d. Prime bold Jamaica is 180s., and small 150s. Japan is 72s. 6d., and Sierra Leone 67s. 6d. per cwt.

JALAP is firm and scarce, Vera Cruz on the spot offering at 1s. 8d. per lb. for 10.4, and 2s. 2d. for 15.8 per cent.

LEMON JUICE.—New season's Sicilian raw, lemon juice is offered according to quality, at from 1s. 4d. to 1s. 5d. per gallon c.i.f. for January-March shipment.

MENTHOL met with a very slow demand, with spot sellers of Kobayashi-Suzuki at 65s. per lb. January-March shipment is quoted at 43s. per lb. c.i.f.

MERCURY.—A moderate business has been done at about £9 17s. 6d. to £9 15s. per bottle, which figures are about representative of the market at time of writing, but demand latterly is again very quiet. The recent stiff quotations at around £10 per bottle, at which figure very little business was done, were apparently chiefly the result of small arrivals, but there seems about enough to go round. The undertone is certainly easier, and the fact has aroused attention that Italian producers have been trying to sell forward this week for early or December shipment. Should competition from that quarter become more pronounced, there is not much doubt that prices will give way to some extent. Some dealers are looking for a weaker market, and in the meantime inquiries are mostly confined to small lots. Arrivals this week amount to 1,344 lb. from France.

NUTMEGS are dearer. Singapore 110's are 1s. 2d.; 80's, 1s. 3½d.; 65's, 1s. 9d.; and West Indian 100's, 1s. 1d. per lb. MACE is also higher; fair Singapore, 2s. 4d.; ordinary, 2s. 2d.; and pickings, 2s.; fair to good West Indian is 2s. 3d. to 2s. 6d. per lb.

OPIUM.—Market in Constantinople continues very firm, although there is not much doing; sellers quote from about 29s. 6d. to 30s. per lb. c.i.f. for 11½ per cent. Spot price is nominal and a matter of negotiation.

CONSTANTINOPLE, November 13.—"During the period October 30 to date, arrivals were as follows: Druggists', 1,212; 'softs' 77; and Malatia, 87 cases. The stocks consisted of: Druggists', 343; 'softs', 55; and Malatia, 16 cases. Sales during the past fortnight amounted to 105 cases, of which 84 cases of druggists' fetched 3,000 to 3,225 piastres, 14 cases of 'softs', 3,400 to 3,500 piastres; and 7 cases of Malatia, 2,800 to 3,000 piastres per oke. The large purchases made daily on behalf of important European firms, and the presence of the buyer for Japan, who so far has only succeeded in securing 100 cases on his order for 300 cases, tend to harden the prices day by day. In view of the very small amount of total stocks available in Constantinople and in the interior, which aggregate at the outside 700 cases, and taking into consideration the rumours current to the effect that Japan proposes to purchase further supplies amounting to some hundreds of cases, it is evident that the present quotations are by no means exaggerated, and that very much higher prices may be expected. Another reason which has induced holders of opium to keep back their stocks is the fact that the absence of rain has prevented the October sowings. The sowings cannot take place, weather permitting, before February or March, and they will certainly prove neither so advantageous nor so productive as the October sowings. Sales in Smyrna during the past few days amounted to about 50 cases, at practically the same prices as ruling here. Stocks in Smyrna consist of 40 cases, and the small parcels which arrive daily are immediately taken up at good prices."

It is notified that in the calendar year 1924, not more than 3,000 chests of Benares opium will be offered for sale by public auction at Calcutta. The Indian Government reserve to themselves the right, at any time, without previous notice, to reduce the quantity or alter the class of opium to be offered for sale.

PIMENTO is still firm at 2½d. per lb., and on arrival terms 21s. c.i.f. is quoted for November-December shipment; 340 bags were delivered last week, there being no landings; the London stock is 4,000 bags, against 8,000 bags at this time last year.

RUBBER is again dearer, and on the week has advanced a further ½d. per lb. The steady improvement which has been the feature during the past few weeks has been fully maintained, and at the close there was a firmer undertone. The spot demand has been slower, but the direct business from Singapore has greatly improved. New York is closely following this market, and the Americans are "nibbling" at anything cheap. Furthermore, in view of the recent decline in sterling the American price of standard grades is fully ½d. per lb. higher than the London quotation. For the first time for many weeks deliveries exceeded arrivals, and last week arrivals amounted to 1,090 tons, whilst deliveries totalled 1,538 tons, showing a decline of 448 tons in the stocks. Quotations (Wednesday, 5 p.m.):—No. 1 standard crépe and ribbed smoked sheet, spot and November, 1s. 2½d.; December, 1s. 2½d.; January-

March, 1s. 3½d.; April-June, 1s. 3½d. Hard fine Para is steady, 1s. 0½d. per lb.

SAFFRON.—A substantial rise in Valentia saffron has taken place at the source, the highest prices of last year having, it is stated, been passed. Difficulty is being experienced in obtaining supplies; so far, the exchange movements have favoured the English buyer. Fine-grade new crop will probably be worth 145s. to 147s. 6d. per lb. On the spot the present quotations range from 132s. 6d. to 145s. as to quality.

SEEDS.—The market is very quiet with the following spot quotations current on Wednesday: Spanish ANISE, 77s. 6d. to 80s. per cwt., and Russian, 60s. per cwt. CANARY SEED.—Mazagan is firm on spot at 20s. per cwt.; Larache is unobtainable on spot. CARAWAY SEED.—Dutch is at 122s. 6d. per cwt.; Morocco, 84s. CORIANDER SEED.—Sound, 42s. 6d., and wormy, 32s. 6d. to 35s. per cwt. CUMIN SEED.—Morocco, 115s. per cwt.; Malta, 115s. DILL SEED is scarce at 21s. 6d. per cwt. FENNEL SEED.—Indian, 35s. to 45s. HEMP SEED.—Manchurian is scarce and dearer at 19s. 3d. FENUGREEK SEED.—Morocco, 25s.; Indian, 24s. 6d. LINSEED.—Morocco, 22s. 6d. per cwt. MUSTARD.—English is scarce at 35s. per cwt.

SENEGA meets with little demand at 3s. to 3s. 1d. per lb. on the spot. The primary markets continue very firm.

SHELLAC.—The spot market has been quiet, and usual standard TN orange is a trifle easier at 310s. per cwt.; AC cake is 300s., and GAL 270s. For delivery the sales include TN for December at from 307s. 6d. to 312s. 6d., and March at from 307s. 6d. to 312s. 6d. To arrive, TN for November-December shipment has sellers at 310s. c.i.f.

STARCH PRODUCTS.—Dutch farina remains firm at 21s. per cwt. on the spot, and at 20s. per cwt. f.o.b. for November-December shipment. American maize starch powder is unchanged at 16s. 9d. per cwt. on the spot, and dextrin is unaltered at 27s. per cwt. for superior Dutch and 26s. for No. 2 on the spot. Best rice starch crystals offer at 40s. for English and 33s. 6d. per cwt. for Continental.

TONKA BEANS.—Angostura continue scarce on the spot owing to American buying at the source; fine frosted beans are worth about 10s. 6d. per lb. Paras are plentiful and in small demand.

VANILLA.—Business has been brisk lately, and prices are steadily rising owing to the dearth of spot goods and insufficiency of the crop. Important sales have been made for Bourbon vanilla, first quality, average 15 cm. at 175 to 180 fr. per kilo, and prices are expected to rise further. For Tahiti, yellow label, the price is now 155 fr. per kilo.

WAX (VEGETABLE) is firmer, with sales afloat at 87s. 6d. per cwt., and sellers of November-December at 82s. c.i.f.; spot is 100s.

Essential Oils

ALTHOUGH there has been only a quiet demand this week, one or two important price changes are recorded. Ceylon cinnamon-leaf oil is short on the spot, and no c.i.f. offers are obtainable. Prices are accordingly dearer. Sicilian orange oil is dearer. Lemon oil has also a firmer tendency. American wormseed is also a shade firmer. The c.i.f. prices of cassia and star anise oils have dropped sharply. Patchouli is cheaper. Hand-pressed lime is weaker, but distilled oil is very firm. Bourbon geranium is cheaper.

The following are the quantities and values of the essential oils (other than turpentine) imported into and re-exported from Great Britain for October 1923, compared with the same month in 1921 and in 1922, also for the ten months ended October 31, 1921-1923:

		1921	1922	1923
October imports (other than turpentine)	lb.	232,700	265,173	442,010
	value	£108,899	£68,036	£104,584
Jan.-Oct. imports	do.	1,478,451	2,631,593	3,222,344
	value	£445,094	£675,550	£803,899
October re-exports	do.	68,069	71,370	102,676
	value	£40,485	£26,505	£48,140
Jan.-Oct. re-exports	do.	527,366	677,652	723,852
	value	£253,305	£296,043	£312,623

ANISE (STAR).—"Red Ship" on the spot is steady at 1s. 9½d. to 1s. 10d. per lb. The c.i.f. price to arrive is lower at 1s. 7½d.

BERGAMOT.—Spot quotations for 37 to 39 l.a. range from 12s. 6d. to 13s. per lb., according to brand. The c.i.f. price is firm at 12s. 6d. to 13s. 3d.

BOIS DE ROSE (FEMELLE) is very firm and scarce at 13s. 6d. to 15s. 9d. per lb.

CAJUPUT is obtainable on the spot at from 3s. 1d. to 3s. 3d. per lb. An arrival from Macassar of 50 cases in London by the s.s. "Blitar" has taken place.

CASSIA on the spot is steady at 10s. 9d. per lb. for 80 to 85 c.a. The price quoted for shipment is cheaper at 8s. 6d. c.i.f. Bids a shade less might be considered.

CEDARWOOD.—American is firm for drums at 1s. 4½d. per lb., and cases at 1s. 6d.

CINNAMON.—Ceylon leaf has been in fair demand. It appears that no c.i.f. offers are obtainable and spot is dearer. Offers of 5½d. per oz. have been refused in some directions, but limited supplies may still be obtained at 5d. Mysore distillate is dearer at 8s. 9d. per lb.

CITRONELLA.—Ceylon on the spot is steady at 4s. 3d. per lb.; a shipment in course of landing (free from alcohol) is offered at 4s. Java oil is firm at 4s. 7d. on the spot, and 4s. 3½d. to 4s. 5d., c.i.f., to arrive as to position. Advices from Java report that at Semarang some producers were recently compelled to buy at fl.5, inclusive drum, in order to be able to compete contracts, and even higher prices are expected. January/February delivery was quoted fl.4.45 nominal. In Soerabaya Chinese sellers offered citronella oil for prompt delivery at fl.4.60, without finding buyers.

CLOVE.—English distilled is selling at 9s. 3d. per lb. on the spot. Mysore is offered at 9s.

GERANIUM.—Bourbon has declined, and there are now spot sellers at from 34s. to 36s. per lb. The price quoted for next crop (due in London in about four months) is 240 fr. per kilo c.i.f. (= 28s. per lb. approx.). Algerian is obtainable at from 32s. to 33s.

JUNIPER BERRY.—Spot holders are quoting 4s. 6d. per lb., which is unchanged.

LAVENDER.—French oil continues to be in fair demand, but spot prices are very irregular. From 26s. and upwards is quoted in some directions for 38 to 40 per cent. esters, but while stocks last good quality oil (natural esters) is obtainable in quantity at from 24s. to 25s. per lb., which is below replacement value. It has been estimated that the stocks in France amount only to about 10 tons in the hands of strong holders, and the price of 200 fr. mentioned some time ago will likely be exceeded in the spring.

LEMON.—The c.i.f. prices for new crop range higher from 2s. 7d. to 2s. 10d. per lb. Spot holders quote about 2s. 9d. to 2s. 10d.

LEMONGRASS.—Cochin on the spot is quiet at 2½d. per oz., which might be shaded. Up to 2½d. c.i.f. is wanted.

LIME.—West Indian distilled is obtainable on the spot at 4s. per lb. No further offers are being made from the source. Hand-pressed is easier at from 6s. 6d. to 7s.

MINT.—Japanese dementhrolised Kobayashi-Suzuki is steady at 12s. 3d. per lb., and November-December shipment is 11s. 6d. c.i.f. to arrive.

ORANGE.—Earlier in the week c.i.f. offers were made below 10s. per lb., but the price has since been advanced from 10s. 6d. to 11s., being now general, and in some directions 11s. 6d. c.i.f. Spot is quoted at 11s. to 11s. 6d. West Indian sweet ranges from 8s. to 9s. per lb. spot, and from 7s. 6d. to 8s. c.i.f.

PATCHOULI.—Usual Penang quality is cheaper at 23s. 6d. per lb. and below 20s. c.i.f. to arrive, selected grades being correspondingly higher.

PENNYROYAL.—Small lots of Spanish on the spot are obtainable at 8s. per lb.

PEPPERMINT.—American is as last quoted, natural tin oil being obtainable at from 15s. to 15s. 6d. per lb. Dutch B.P. blended oil is offered at 11s.

PETITGRAIN.—Paraguayan to arrive is firm at from 8s. 6d. to 9s. per lb., c.i.f. On the spot there are sellers at these prices.

ROSEMARY.—Spanish on the spot is unchanged at from 1s. 8d. to 1s. 9d. per lb.

SANDALWOOD.—The price of Mysore Government B.P. East Indian oil is 25s. per lb. There are other holders quoting 24s. 6d. for quantity.

SASSAFRAS.—Some holders have sold out and say there is no immediate prospect of replacement.

SPIKE.—Spanish on the spot is steady at from 3s. 2d. to 3s. 3d. per lb. French is quoted at 6s. per lb. At the source 45 fr. per kilo in ton lots is quoted.

THYME.—Spanish red, 28 to 30 per cent. phenols, is steady at 4s. 9d. per lb.

WORMSEED.—American has improved, and 24s. per lb. is now quoted on the spot for quantity.

Pharmaceutical Chemicals, etc.

THE default of the German Government in refusing to meet the 26 per cent. Reparation duty on imports into this country is likely to have the effect of still further advances in spot prices in this market. We refer to this matter in detail on another page. The spot position as regards prices is fully maintained, and some further advances are recorded. Spot holders are undoubtedly in a very strong position, and buyers look like having to pay almost any prices that are asked for some products. Reports from Paris state that supplies are also running short there, and high prices are ruling.

ACETANILIDE.—The spot position is now firm, and little is offering below 2s. 6d. to 2s. 9d. per lb.; business has again been brisk for both home and export. Supplies are limited, and still higher prices are looked for.

ASPIRIN.—Buying has been very brisk here, and high prices have been the feature, with nothing available under 3s. 6d. to 3s. 9d. per lb. Any movement is likely to be to higher prices, and most makers are fully sold ahead.

BABBITONE has shown little life: dealers holding spot supplies are asking between 17s. to 18s. per lb.

BENZALDEHYDE (.03) is a firm market, with dealers' prices steady at 3s. per lb.; a fair business has been done.

BENZOIC ACID.—Dealers are now quoting at 3s. 6d. to 3s. 9d. per lb. for B.P. Import licences have been granted for very limited quantities only and will not meet the present demand. This attitude on the part of the Dyestuffs Licensing Committee is difficult to understand, as it is forcing the spot price up to consumers who require the material to make sodium benzoate.

BROMIDES.—Considerable business has been done for both home and export—some of it resales to the Continent. Prices are firm, and tend to move to still higher levels. Ammonium, fully 8d. per lb. Potassium, crystals and granular, 7½d. to 7¾d. per lb. Sodium, crystals and granular, fully 8d. per lb. All B.P.

CALCIUM LACTATE might still be obtained to-day at about 2s. per lb., but it looks as though 2s. 3d. per lb. will be the ruling price by the end of the week. Best English make is 2s. 9d.

CHLORAL HYDRATE is very firm, and duty paid is fully 4s. 3d. per lb., with some good business being done. The cheaper lots at about 4s. per lb. have been taken off the market.

CITRIC ACID (B.P. crystals).—Business has not been sustained here after the improvement reported last week. The spot value is somewhere in the region of 1s. 4½d. to 1s. 5d. per lb., less 5 per cent. These prices might be shaded in some quarters.

CREOSOTE B.P. is well maintained on spot, as quoted by dealers at 2s. 6d. per lb.

CREOSOTE CARBONATE is neglected: makers quote in the region of 7s. 6d. per lb.

GUAIACOL CARBONATE is firmly held, with dealers holding spot supplies not accepting less than about 13s. per lb. Continental prices are dearer, and offerings are limited.

HEXAMINE.—The spot price is well maintained at 4s. 3d. to 4s. 6d. per lb., and business has been quite brisk.

HYDROQUINONE is dearer, with nothing now offering on spot below 4s. 2d. to 4s. 3d. per lb. Last week's cheaper offers at about 4s. are now off the market.

HYPOPHOSPHITES.—British makers quote as follows for 28lb. lots:—Ammonium 7s. 2d., calcium 3s. 6d., iron 6s. 8d., magnesium 7s. 2d., sodium 4s., and potassium 4s. 1d. per lb.

METHYL SALICYLATE is firm as quoted by dealers at 2s. 10d. to 3s. per lb. on spot, and these prices are likely to hold. Any movement will be to higher rates.

METHYL SULPHONAL.—It seems that any material now arriving will only be sold at about 23s. to 25s. per lb., or perhaps a shade under that rate.

PARAFORMALDEHYDE is firm as offered by spot holders at 3s. 9d. per lb., and some fair business has been done.

PARALDEHYDE.—Dealers on spot are not accepting less than 1s. 6d. per lb., for spot stocks, and in at least one quarter 1s. 8d. per lb. is asked for small quantities.

PHENACETIN.—This market is firmer at the higher price quoted last week of 7s. 6d. per lb., and this is about the basis for most business done.

PHENAZONE.—The tendency for this article to move up to 8s. 9d. per lb. has materialised, and to-day little is offered on spot below that figure. The position is considered firm.

PHENOLPHTHALEIN.—The little available on spot is quoted firmly at 8s. 3d. to 8s. 6d. per lb., and about the same levels are mentioned for some material to arrive.

POTASSIUM PERMANGANATE.—B.P. is steady at 9½d. per lb., but business has been slow and small this week.

POTASSIUM SULPHOGUAIACOLATE remains dull, with dealers still offering at about 7s. per lb.

RESORCIN continues firm as quoted on spot at 6s. per lb. There has been a fair volume of business done.

SALICYLIC ACID B.P.—This article is very firm on spot as quoted at 2s. 4d. for large quantities and 2s. 6d. for smaller lots. Prices seem likely to go a shade higher before long.

SALOL is dearer on spot, and it is difficult to locate any supplies offering here below 4s. to 4s. 3d. per lb. These prices are likely to hold good.

SODIUM BENZOATE is firmly held at 2s. 9d. per lb. and some opinions favour higher prices in the region of 3s. per lb. before long. While the demand is good supplies are short.

SODIUM DIETHYLBARBITURATE remains slow in demand, with dealers quoting unchanged at about 18s. per lb.

SODIUM SALICYLATE.—Spot prices are very firm, with crystals at 2s. 11d. to 3s. and powder at 2s. 10d. per lb. Dealers have received largo enquiry and have done good business. Supplies here and on the Continent are now limited. Higher prices are quoted.

SULPHONAL.—As we suggested last week when it was quoted at 25s., was likely to settle down at a lower level, is now quoted at 17s. 6d. to 20s. per lb. At this range the market is firm.

TARTARIC ACID.—B.P. continues dull with spot supplies available. The quoted rate is about 1s. 1½d. per lb., less 5 per cent., but at this rate the market is weak.

TERPIN HYDRATE is steady, but in little demand with dealers quoting unchanged at 1s. 9d. per lb.

The following prices are quoted by British makers:—Gallie acid, pure crystals, 3s.; pyrogallic acid, 6s. per lb. for 28-lb. lots; tannic acid B.P., 3s.; amidol, 9s. per lb.; atropine sulphate, 12s. 6d. per oz.; bismuth salts are steady; carbonate, 12s. 8d. to 14s. 9d. per lb., according to quantity; salicylate, 10s. 2d. to 12s. 2d.; citrate, 11s. 4d. to 13s. 4d.; subnitrate, 10s. 9d. to 12s. 9d.; chloral hydrate, 4s. 3d. per lb. Chloroform, 2s. per lb. for cwt. lots; sodium sulphite anhydrous, £25 to £26 per ton, as to quantity, in one-cwt. drums, f.o.b., London; magnesium carbonate, light commercial, £36 per ton net; magnesium oxide (light commercial) has been reduced by £5 per ton to £72 10s. per ton, less 2½ per cent.

PERFUMERY CHEMICALS.—The following are current prices (per lb.).—Aeetophenone, 11s. 6d.; Aubepine, 14s.; Amyl acetate, 3s.; Amyl butyrate, 7s. 3d.; Amyl salicylate, 3s. 6d.; Anethol (M.P. 21/22° C.), 3s. 9d.; Benzyl acetate from chlorine-free benzyl alcohol, 2s. 9d. to 3s. 3d.; Benzyl alcohol, free from chlorine, 3s. 3d.; Benzyl benzoate, 3s. 6d.; Cinnamic aldehyde, natural, 22s. 6d.; Coumarin, 20s.; Citronellol, 19s. 6d.; Citral, 9s. 6d.; Ethyl cinnamate, 10s.; Ethyl phthalate, 3s. 9d.; Engehol, 11s.; Geranil (palma-rosa), 37s. 6d.; Geraniol, 6s. 9d. to 13s. 6d.; Heliotropine, 8s.; Isoeugenol, 15s. 9d.; Linalyl ex Bois de rose, 18s. to 20s.; Linalyl acetate, 20s.; Methyl anthranilate, 8s. 6d.; Methyl benzoate, 6s.; Musk ketone, 47s. 6d.; Musk xylol, 12s. to 18s. 6d.; Nerolin, 4s.; Phenyl ethyl acetate, 10s.; Phenyl ethyl alcohol, 16s.; Rhodinol, 60s.; Safrol, 1s. 10d.; Terpineol, 2s. 6d. to 3s.; Vanillin, 23s. to 24s.

ARRIVALS OF CHEMICALS dutiable under the Safeguarding of Industries Act and with the following values have been taken place during the past week: Acetyl chloride, £346; acetyl salicylic acid, £693; butyl alcohol, £1,358; butyric acid, £169; cellulose acetate, £843; diacetyl morphine hyd., £1,044; hexamine, £377; isopropyl alcohol, £123; lithium carbonate, £376; morphine hydrochlor £821; novocaine, £229; oxalic acid, £523; quinine ethyl carb., £322; paraformaldehyde, £124; paraldehyde, £103; phenazone, £434; potassium bromide, £330; soda peroxide, £159; soda sulphite, £101; thymol, £738; chemical products undescribed, £1,846.

Industrial Chemicals, etc.

London, November 21.

ALTHOUGH business shows but little material improvement, the tone is already considerably firmer, and evidence is not lacking that higher prices may soon be expected in many directions. This movement, following the pharmaceutical market, is due almost entirely to the state of affairs in Germany, which has now been aggravated by the German Government defaulting in respect of the 26 per cent. Reparation levy. By the time this report is published higher prices than those quoted here may obtain in some items.

ACETIC ACID, although in no great demand during the past week, is firmer, and few spot holders are now quoting below the following advanced rates: 80 per cent. technical, £47; 80 per cent. pure, £48 to £49; 98 per cent. glacial, about £60, in casks, and about £73 in glass demijohns, ex wharf, London.

ACETONE is as firm on spot and may quite well advance from to-day's price of £124 per ton, in drums, for B.G.S.

ARSENIC.—The American demand is not so lively as it was recently, but the market continues firm under the influence of the marked scarcity. Grecian producers are not making any attempts at further business at present, being well booked up, and hardly any offers are heard of from other foreign sources at the moment. Only small lots of Cornish could be got for prompt or December delivery at about £65 to £66 per ton f.o.r., while some sellers are asking £68 to £69, delivered London.

BARIUM CHLORIDE is offering by dealers at about £14 15s. to £15 per ton for 98 to 100 per cent., but the demand is small.

BLEACHING POWDER is slow of sale, with dealers offering Continental at about £10 5s. per ton for 35 to 37 per cent. chlorino.

COPPER-SULPHATE.—There has been very little movement and the export demand is very sluggish, but as makers' prices do not apparently leave them any really adequate margin of profit, further concessions are considered rather unlikely, while the metal is expected to fluctuate upward rather than downward, due to the price being comparatively low. F.o.b. terms for sulphate stand at £25 to £25 5s. for casks.

CREAM OF TARTAR, B.P., is steady, although meeting with only a limited demand; quoted round about 85s. per cwt., according to quantity.

FORMALDEHYDE is firmer on spot. The lower value of sterling on the American Exchange affecting the price: 40 per cent. volume is about £65 per ton.

LEAD ACETATE is scarce on spot and holding firm at high rates: Brown, £42 to £42 10s.; white, £43 10s. per ton. Continental offerings are dearer.

LITHOPONE is dearer on the Continent and on spot: 30 per cent. Continental red seal is now firm on spot at £23 to £24 per ton, with a rising tendency still in evidence.

OXALIC ACID finds little business; the quoted price on a weak market is round about 5½d. per lb.

POTASH CAUSTIC.—The spot position is certainly firmer, although the price has not so far advanced from the level of £31 per ton for 88 to 92 per cent. solid in drums; but higher rates are expected.

POTASSIUM BICHROMATE is steady, with British makers' quoting unchanged in the region of 6½d. per lb.; dealers' prices are perhaps a little lower.

POTASSIUM CARBONATE is firmer on spot, with dealers now asking about £26 for 90 to 92 per cent., and from £28 to £29 for 96 to 98 per cent. It seems likely that prices will move to still higher levels.

POTASSIUM CHLORATE remains dull, so far as dealers are concerned. Their prices are rather easy as quoted at 2½d. to 3d. per lb.

POTASSIUM PERNIANGANATE continues to be offered by dealers close up to 9d. per lb. for commercial quality, and the position seems steadier this week.

POTASSIUM PRUSSIATE.—British is offering by dealers at about 10d. per lb., but business remains slow and very limited. A little export has been done.

SALTCAKE from home makers is steady for home trade at 4½s. per ton, and is likely to stay at this figure to the end of the year.

SODIUM ACETATE is firmer, with dealers quoting in the region of £24 10s. per ton for spot.

SODIUM BICHROMATE.—British makers' prices for home trade only is maintained on a steady market at 4½d. per lb.

SODIUM CARBONATE (washing crystals) for home trade only is offered by British makers at £5 5s. per ton, in bags, carriage paid to destination.

SODIUM CHLORATE is still dull, with dealers receiving hardly any inquiry. Quoted in the region of 2½d. per lb.

SODIUM HYPOSULPHITE.—It is evident from the wide margin in prices being quoted that importers are expecting higher rates. To-day's quotations range from £14 15s. up to £15 10s. for pea crystals, and it seems that the market might settle down at about £15 per ton. Commercial quality is about £10 to £10 10s. per ton.

SODIUM PRUSSIATE remains in poor demand, with dealers offering British at the low figure of 5½d. per lb.; market unsteady.

SODIUM SULPHIDE.—Spot prices of 60 to 62 per cent. solid are unchanged at £14; for broken, about £15 is asked. These prices may harden in the near future. Business has again been slow.

SULPHUR.—The market shows no special feature, but rules very steady, the position being under control. Raw sulphur stands at £5 7s. 6d. per ton, delivered Manchester, and quotation for Sicilian flowers is at £9 15s., while roll is quoted £8 c.i.f. to arrive.

ZINC PRODUCTS.—The demand for zinc-oxide has been restricted, but in spite of the setback in the price of zinc metal, makers have made very little alteration in their terms, which range from about £37 to £45 per ton, according to quality, delivered free on trucks.

COAL-TAR PRODUCTS, ETC.—Pitch is again at cheaper rates with the market dull. Other products show but little change in price, and business is still rather quiet. ANILINE OIL continues to be quoted at 9d. to 10d. per lb., naked, ex works; the demand is still small. ANILINE SALT remains at the quoted rates of 9½d. to 10d. per lb., naked, ex works, with the market steady. BETANAPHTHOL is steady and tends to harden from 1s. 1d. to 1s. 2d. per lb. CARBOLIC ACID crystals continue dull and rather weak as quoted at 1s. to 1s. 1d. per lb., f.o.b., in large bulk packing. CRESYLIC ACID is unchanged on quotation at 2s. to 2s. 3d. per gallon for 97 to 99 per cent., with the demand small. Crude, 60's, 3s. to 3s. 3d. per gallon for spot delivery, with a small business. BENZOL.—The following are British makers' prices: crude 65's, 8d. to 10d.; standard motor, 1s. 1d. to 1s. 4d.; pure, 1s. 6½d. to 1s. 8d. per gallon, ex works in tank wagon. TOLUOL is still quiet in demand, with quoted rates the same at 1s. 8d. to 1s. 9d. per gallon f.o.r. makers' works, in buyers' packages. XYLOL, pure, 2s. 3d.; commercial, 1s. 6d. per gallon, drums extra, shows no change on the week. CREOSOTE OIL remains dull, but the market keeps steady in the region of 9½d. per gallon, f.o.b. NAPHTHA (crude) is seldom called for; quoted at about 8½d. per gallon. Solvent naphthas are at last week's reduced price of about 1s. 2d. per gallon for 90 to 160, and heavy 90 to 190. NAPHTHALENE is steadier and tends to harden from to-day's price of £19 per ton. Crude, £5 to £11; crystals, £23; powder, £17; balls, £24; candles and tablets, £28 per ton. HEXAMETHYLENE is rather firmer, with the price likely to move up from 3s. 9d. to 4s. per gallon, on spot. PYRIDINE is exceedingly firm as quoted on spot at 21s. to 23s. per gallon. PITCH is again at cheaper figures, with the demand still far from satisfactory; quoted to-day at about 130s. per ton, f.o.b. East Coast, with the position none too steady.

Fixed Oils, etc.

IN most directions business has been much better this week, and as a result the tone generally is healthier, with higher prices prevailing. Castor, palm, coconut and rape oils are bright features. Linseed is also a good market. ACID OILS.—Supplies on spot are scarce and prices are firmer; coconuts-palm kernel, 40s.; groundnut, 38s. 6d.; soya, 36s. 6d., all spot. CASTOR.—Further considerable jumps in values are recorded here and the market is very firm; pharmaceutical, 60s.; first pressings, 55s.; second pressings, 54s., all spot in not less than one ton lots. COCONUT.—A good improvement is recorded both in the volume of business and prices current; deodorised, 51s. spot; Ceylon, c.i.f. 46s. 3d.; Cochin, c.i.f. 50s. 3d. COTTON.—With prices hardening early in the week this market closed steady at the advanced prices quoted; deodorised, 48s. 6d.; common edible, 47s.; soapmaking, 44s. 6d.; crude, 40s. 6d., all spot. GROUND-NUT.—Higher prices are ruling here and the market is quite steady; deodorised, 57s spot; crude Oriental, 51s. c.i.f. LINSEED (raw, naked).—A week of good business is recorded here, with prices tending to move up all the time. At the close all positions show a good advance on the week with the tone quite firm. On spot, 42s. 9d. to 43s.; November, 42s. (paid); November-December, 41s. 10½d.; January-April, 38s. 6d.; May-August, 35s. 10½d. Hull, on spot, 41s. 9d.; November-December, 41s.; January-April, 38s. 6d.; May-August, 35s. 9d. PALM KERNEL.—A sharp advance is recorded here and the market holds firm at the close—business good; deodorised, 48s.; crude, 42s., all spot. PALM.—Following on the advances recorded during the past two weeks, further appreciations in spot values are recorded. Business has been brisk and the market closes very firm; Lagos, 38s. 3d.; softs, 37s. 9d.; mediums, 37s. 6d.; hards, 37s. 9d.; bleached, 40s. 6d., all spot. RAPE.—The market has lived up and prices at the close had advanced and stand firm; refined, 44s. 9d.; crude, 41s. 9d., all spot. SOYA.—This market is steady and about level on the week—business quiet. Deodorised, 45s. 6d.; crude, 41s. all spot. TURPENTINE.—The market has kept fairly steady. There was a fair demand late last week in a generally firmer market, but the demand seems quieter again, buyers being shy, but holders appear fairly confident and do not press offers since the recent good rally in the American market. Deliveries of American were not so extensive last week, but the stocks were reduced to about 23,400 barrels apart from French spirit. Spot closed at 73s. 3d.; December, 73s. 9d.; January-April, 74s. 9d. WOOD.—Hankow in barrels is nominal on spot at 92s. 6d.; no demand.

London Drug Auctions

Commercial Sale Rooms,
Mincing Lane, E.C.3. November 22.

A MODERATE quantity of crude drugs offered at the final auction of the year, but the demand was about on a level with previous sales held this year, although it improved slightly towards the end, and the twelve catalogues were concluded by 1 p.m. Cape aloes was steady for the small quantity sold. Annatto seed being scarce realised high prices. Sumatra benzoin was flat, and buchu was in more demand at steady rates; Balsam tolu was held for high rates. Cardamoms opened flat, but the demand substantially improved and very firm prices were paid. Gamboge is plentiful and slightly easier. Honey was in better demand, and prices advanced 5s. to 10s. per cwt. Ipecacuanha was slow, but steady. Kola met a fair demand at previous low prices. Myrrh was easy, but good Aden is scarce. Rhubarb was extremely slow and unchanged. Tinnevelly senna had a firmer tendency, buyers having to pay valuations. Grey Jamaica sarsaparilla was 1d. per lb. easier but quality was mostly coarse; native Jamaica was slow and unchanged. Beeswax met a small demand at unchanged rates. The following table shows the quantities of goods offered and sold:—

	Offered	Sold	Offered	Sold

* Sold privately.

ALOES.—Of Cape 22 cases offered and 5 sold at 42s. 6d. per cwt. for dull hard seconds, and of Curacao 67 boxes offered and 5 sold at 80s. for capay mixed. Good liver was

held at 90s. (a bid of 82s. 6d. being refused); dull liver (8 cases) realised 75s. to 80s. per cwt.

The exports from the Union of South Africa during July amounted to 104,943 lb. (£752), against 123,265 lb. (£897) in July 1922. During the seven months ended July 31 the exports amounted to 347,268 lb. (£2,351), against 322,495 lb. (£2,155) for the corresponding period of 1922.

AMMONIACUM.—Small sales of fair drop have been made at 1s. 3d. lb.

ANNATTO SEED.—Eight bags of good bright Jamaica sold at 1s. 5d. per lb., and 14 bags fair were retired at 1s. 8d., a bid of 1s. 4d. being refused.

BALM FRUIT.—Eleven bags of fair broken from Cocanada were offered without reserve, but no bid was made.

BALSAM TOOT.—In auction 10 cases were catalogued, but were not in time for the sale. They are offered by private treaty, the idea of value being 12s. per lb.

BENZOIN.—All the offerings passed the hammer unsold. A single case of dark Saigon almonds, slightly woody, had been sold privately at £10 per cwt.; for small to bold free pale Siam almonds £33 per cwt. was wanted.

BUCHU.—A string of 16 bales fair greenish round, slightly stalky, were held at 3s. per lb. Later, 41 packages offered and 9 sold, including good green round, slightly stalky, at 3s.; long greens, slightly stalky, at 2s. 9d., and long ovals at 2s. 9d. per lb.

The exports from the Union of South Africa during July amounted to 4,458 lb. (£518), against 24,971 lb. (£3,188) in July 1922. During the seven months ended July 31 the exports amounted to 139,182 lb. (£17,475), against 100,831 lb. (£12,617) for the corresponding period of 1922.

CALUMBA.—The offerings included 100 bags of small to bold fair natural clean sorts at 7s. per cwt.

CAMPHOR OIL.—Fifty cases white were bought in at 75s. per cwt., and a further 50 cases sold without reserve at 60s. per cwt.

CANNABIS INDICA.—For two cases fair Bombay tops 17s. 6d. per lb. was wanted, and nineteen bags African siftings were bought in at 4s. per lb., as also were ten bags in another interest.

CARDAMOMS.—Privately business has been done in green Alleppy at 4s. 9d. In auction the demand opened quiet, but improved towards the end. The sales included: Ceylon-Mysore, bold long pale, few split, 6s. 2d.; medium to bold pale, 5s. 8d. to 5s. 9d.; medium ditto, 5s. 2d. to 5s. 6d.; small and medium pale, 4s. 8d. to 5s. 1d.; medium split, 4s. 4d.; small mixed sizes, 4s.; yellowish specky, 3s. 10d. fair to pale split seed, 4s. 4d.

CASCARILLA.—Three bags siftings sold at 10d. per lb.

CASHEW NUTS.—Forty cases sea-damaged sold with all faults for account of whom it may concern at 10s. 6d. to 14s. One badly sea-damaged at 5s. per cwt. Six cases were disposed of at 54s. per cwt.

CASSIA OIL.—Two cases, 80 to 85 c.a., sold cheaply at 9s. 6d. per lb.

CHAULMOOGRA OIL.—Four cases Taraktogenos Kurzii were limited at 3s. 3d., and five cases Hydnocarpus Wightiana at 2s. 4d. per lb.

CHIRETTA is selling privately at 5d. per lb., with nothing disposed of in auction.

COCHINEAL.—Four bags of silvers were bought in at 1s. 8d. per lb.

GURJUN OIL.—Twenty drums were bought in at 11d. per lb.

DRAGON'S BLOOD.—Privately there has been a good export demand of late, and supplies have much diminished, with up to £20 per cwt. paid for Singapore slab; dull slab is obtainable at about £17. No reboiled or any good quality is unobtainable. Fifteen cases of dragon's blood have arrived from Aden, and fifteen cases from Singapore. In auction £20 was wanted for ten cases of dullish lump, and £5 per cwt. for ordinary Zanzibar drop.

GAMBoge.—Two cases of fair Siam pipe slightly blocky sold at £19 5s. per cwt.

HONEY met with a better demand, prices being from 5s. to 10s. per cwt. higher compared with the previous public sale. The chief demand was for Jamaica, the following showing the business done: Good white set, 60s. per cwt., ordinary to good pale set, 45s. to 57s. 6d.; light amber setting, 47s. to 47s. 6d.; dark set, 30s.; dark to light amber liquid, 32s. 6d. to 55s.; fermenting, 30s. to 32s. 6d. Of Cuban, white set sold at 50s. to 52s. 6d.; pale set, but sugary, 40s. to 45s. San Domingo, pale set, 37s. 6d. to 45s.; fermenting, 35s.; flavoured with paraffin, 25s.; St. Lucia, amber set, 38s.; New Zealand, white set, 65s.; light amber (24 cases), sold privately; Guatemala (36 cases), brown set, sold privately. Honduras, 36 cases, pale set, sold at 50s. per cwt.

IFPECACUANHA.—Matto Grosso, the only description offered, was extremely dull, but steady. Five bales of fair bright,

but slightly water-damaged, sold at 6s. 7d. to 7s. per lb., and for fair bright sound the limit was 7s. 3d. per lb.

KOLA steady. Several lots were disposed of, including three bags of small to medium dark Dominica halves at 2½d. per lb. subject; 2 bags fair West Indian halves at 2½d. per lb.; also five bags fair St. Lucia at 2¼d., and dark at 1¼d. to 2d. per lb.

MENTHOL.—In auction a single case (N. & Co. in diamond) was held at 70s. per lb.

MUSK SEED.—For four cases of fair Seychelles 1s. per lb. was wanted.

MYRRH.—A single case of good picked, slightly blocky Aden gum sold at £6 17s. 6d. per cwt.; fair bright siftings from this parcel were held at 80s., and dark pickings at 65s. per cwt. Common quality is plentiful and slow of sale. Four bales of dusty siftings towards the end of the sale sold at 65s., and 35 bags inferior woody at 15s. per cwt., both without reserve.

NUX VOMICA.—Privately the market is talked firmer, and there seems to have been more inquiry. Madras is quoted at 15s. 6d. to 16s. 6d., c.i.f. Twenty bags good pale Calicut were held at 22s. 6d., and twenty bags fair Madras at 15s. per cwt.

ORANGE PEEL.—Four cases dark, partly burnt strip, sold at 3d. per lb., and two cases fair strip, good colour, realised 8d. per lb. Quarters, out of condition, sold at 5s. per cwt. if pay charges. Privately, new crop Tripoli strip is realising 8d. to 10d. per lb., and quarters 25s. per cwt.

OTTO OF ROSE.—Four vases sold at 11s. per oz.

QUINCE SEED being scarce, three bags rather shelly Cape sold at 3s. 7d. per lb.

RHUBARB met a slow sale. Three cases sold without reserve at 2s. 8d. to 2s. 9d. for medium, round and flat Shensi, with three-quarters fair pinky fracture, and 2s. for trimming root. Three cases small to medium round wild Shensi, part stalky and of poor fracture, sold without reserve at 1s. 4d. to 1s. 6d. A further three cases of small and medium, part stalky, of poor fracture, sold at 1s. 4d. to 1s. 6d. without reserve. Good medium to bold Shensi, with three-quarters good pinky fracture, was held at 3s. 9d.; medium to bold, flat, High-dried, at 2s. 6d., and rough, round, horny, High-dried at 1s. 6d. to 1s. 9d. per lb.

SARSAPARILLA was slightly easier for grey Jamaica, thirteen bales of which were disposed of at 2s. 3d. per lb. for mostly fair, and 2s. 2d. for coarses; two bales ordinary part wormy sold at 1s. 11d. Of native Jamaica, ten bales sold, comprising very dull, no colour, at 1s. 3d., and dull to good red, 1s. 6d. to 1s. 8d. Four bales Lima sold at 1s. 9d. per lb.

SENNA.—Tinnevelly was in rather better demand at prices tending firmer. Ordinary small to medium yellowish Tinnevelly sold at from 3d. to 3½d. per lb.; ordinary small yellowish, 2½d. Ten bales good green medium to bold leaf realised 7½d. Fair pale Alexandrian pods were held at 10d. per lb.

Soy.—Seven casks Chinese (Manloong) were limited at 2s. 10d. per gallon, duty paid.

SQUILL.—A bid of 20s. per cwt. is to be submitted for 5 bags good pale, and 15s. for yellowish.

WAX BEES met a small demand. Madagascar (3 mats) sold at 90s. per cwt. for dark brown block, and 21 bags fair bright yellow Zanzibar block realised 97s. 6d.; a bid of 92s. 6d. is to be submitted for 26 bags fair brown, 95s. being the limit. Three barrels and two oases, mostly dark to fair brown Jamaica, sold at £7 2s. 6d. per cwt. Dull bleached Calcutta was held at £8, and unbleached at 90s. Abyssinian is selling privately at 97s. 6d. per fair block.

Bengal Ipecacuanha

ABOUT 60,000 ipecacuanha plants were raised from seed at the Bengal Government Cinchona plantations during 1922-23. Two-thirds of these were planted out in nurseries, the remaining third being grown on indoors till fresh nursery beds could be prepared. Four hundred pounds of dried root were obtained by clearing plants in the older lines and sent to the factory for extraction. The cost of growing this crop which includes the cost of much experimental work is about Rs. 4,750. Even if the finished product brings in too small a return to call the cultivation of Ipecacuanha on Mungpoo a profitable concern, the plants and seed now available there (says the annual report of the Government Cinchona Plantations) will form a useful source of supply for Ipecacuanha cultivation in the new plantations in Burma, where seedlings give every promise of ultimate success. The cultivation of Digitalis is being continued and a supply ample for both official and unofficial demand is assured.

Insulin

SIR.—Statements have appeared recently in the Press to the effect that Insulin is unstable in the tropics, and that when Insulin has arrived in India it has been found, on re-testing, to have retained only one-fiftieth of its original activity. In view of the fact that such reports, if allowed to pass uncontroverted, are likely to cause a considerable amount of unnecessary suffering to diabetics in the tropics, we should like to make publication of the following facts:—

Although we consider that, as a measure of prudence, Insulin should be stored at as low a temperature as possible, we believe the statement appearing in the Indian journals to the effect that English and American Insulin is not resistant to tropical climatic conditions to be untrue so far as the English "A.B." brand Insulin is concerned. In justification of our confidence, we would mention that at the National Institute for Medical Research a sample from a batch of "A.B." brand Insulin was heated to a temperature of 95° F. for a month, the activity of the Insulin being accurately determined both before and after the treatment. The result of this careful test showed that "A.B." brand Insulin had retained its activity without any detectable loss. In the course of its manufacture, "A.B." brand Insulin is put through long and elaborate processes of purification, and this accounts for its stability. We know full well that without such careful purification Insulin does lose its activity very rapidly under tropical conditions. Ample evidence that "A.B." Insulin retains its activity in tropical countries is afforded by the clinical reports of the numerous diabetic patients who have gained great advantage by its use.

Yours faithfully,

THE BRITISH DRUG HOUSES, LTD.,
ALLEN & HANBURY'S LTD.

Purchasing Drugs for China

SIR.—We have read with interest the further letter from Mr. Cameron on this subject, and are glad to see that, in effect, he withdraws his statement that the packing of English houses is inferior to that of American or German firms. We should like to say, however, that our experience is that shipments reach not only Shanghai but all other parts of China in reasonably good condition. The figures in the so-called comparative list now submitted by Mr. Cameron are fantastic, and we do not think need further comment from us than that the English houses which were able to obtain the alleged English prices are to be envied, and that we ourselves should welcome orders for substantial quantities of any of the articles named at the prices given in either the U.S.A. or Germany column. We note Mr. Cameron states his bismuth subgallate costs him more than the subnitrate. The reverse should be the case, as the selling price for the former is, of course, very much less. He further states that quinine bisulphate costs him about 4d. per oz. more than the sulphate. The selling prices are the same. May we in conclusion reiterate that, in our opinion, English houses, given a fair field and no favour, have nothing to fear from American, German, or any other competitors, either in the way of price, packing or delivery, and we are quite willing to give a practical demonstration of the truth of this statement. It is well known that the Peking Union Medical College (of which Mr. Cameron is the pharmacist), being a Rockefeller Institution, is controlled by American interests; but we do not think that fact justifies Mr. Cameron in apparently going out of his way to make statements that are not only mischievous but actually incorrect.

Yours obediently,
MAY & BAKER, LTD.

Battersea, London, S.W.

Sicilian Lemon Juice

SIR.—In the Trade Report of your issue of November 17 you say in regard to lemon juice:—

"Since the announcement of the proposed duty of 6d. per gallon on foreign fruit juices, a fair number of orders have been placed for prompt shipment from Sicily, as most of the bottled juice is imported from that country."

We beg to point out that the pressing of the new season's juice does not commence until the end of December at the very earliest, and the juice will not be ready for shipment before January next. If, therefore, any juice is to be shipped from Sicily "promptly" it can only be juice of last season's squeezing, the manufacture of which stopped about June last.—Yours faithfully,

WILSON & MANSFIELD.

41 Eastcheap, E.C.3.

Anthelmintics

SIR.—After many futile offers of their agency to the well-known English fine-chemical firms, it now appears that Orbis-Werke, Braunschweig, Germany, have at last succeeded in obtaining sole agents for their Santoperonin. We note the remarks of their agents on the "reliability" and "efficacy" of santolin in the circular which they are now issuing. As santolin has had wholehearted medical approval for over seventy years, their references can be accepted without hesitation. However, when it comes to Santoperonin—"the highly intricate benzole derivative"—which is being offered as a substitute for santolin, as no medical or scientific authorities are cited to support its mysterious properties, we must rely on its chemical composition to suggest its value:—

In the "Chemiker-Zeitung" (No. 143, p. 1081), Dr. Herman states that a sample of "Santoperonin" examined by him yielded 37 per cent. of copper oxide, that the ash contained in addition iron alkalis, and sulphur, but no aluminium, whilst by heating the drug under reduced pressure a sublimate of salicylate acid was obtained. The copper was easily extracted by 3 per cent. hydrochloric acid. It is difficult to reconcile these results with the vague synthetical picture of "Santoperonin" drawn by the inventor, and it is hoped that the medical profession in this country will steer clear of "Santoperonin" until the discrepancies are cleared up and the inventor has fully disclosed its composition in a patent specification or otherwise.—"Chemistry and Industry," Vol. 42, No. 3. (Italics ours.)

Santoperonin and its precursor Santoveronin have been adversely criticised by the German scientists since they were first introduced a short time ago; in the meantime, Santoveronin has already disappeared from the market, which is not surprising, seeing its high copper content. It is therefore only natural that the manufacturers should now seek fresh fields for their propaganda. Gratuitous statements claiming for it the virtues of all the well-known anthelmintics without any disadvantage or danger must be regarded with grave suspicion as long as medical opinions are withheld from the trade.

THE EASTERN & RUSSIAN TRADING CO., LTD.

The Will to Work

SIR.—The election addresses of the three large political parties have now been submitted, and it seems to me that none of them touched upon the cancer that is industrially our weakness. Had I written the addresses, they would have been short, but not too sweet. No. 1 address would have been "Work"; No. 2, "Work harder"; No. 3, "Work hardest." To my mind, for the past fifteen years we have been accepting and taking from industry that which we have not earned. Money, leisure, and pleasure. There is too much golf on the upper deck and bridge, and too much football on the lower deck. I enjoy sport myself, but leisure and pleasure should be worked for and earned before taking them. It is a most difficult matter to complete a contract in London (the greatest business centre in the world) on a Saturday morning, because "the gentleman who deals with that is not up this morning." The people should be told that our salvation is in Work, work, work; away with ca' canny altogether and away with leisure and pleasure until they have been earned.—Yours faithfully,

H. LATTIMER.

Trade Terms on Postcards

SIR.—In the Subscribers' Symposium in your issue of November 17, "P. G. M." complains that prices are sometimes printed on the order postcards which various firms supply for the convenience of their customers, and urges the undesirability of this practice. Writing as one who is an occasional delinquent (?) in this respect, may I suggest that it would be very interesting and helpful to advertising managers generally if other pharmacists would express their views in your columns? From the manufacturers' point of view, the issue of order postcards is a somewhat expensive form of business courtesy, as there is a high percentage of wastage; and it seems a little ungenerous for "P. G. M." to refuse business to the firms which have tried to save him trouble, and transfer it to those who have not had that consideration for his convenience, especially as the contents of such cards can be hidden from prying eyes by the simple expedient of enclosing them in ordinary envelopes (unsealed postage ½d., sealed 1½d.).

Yours truly,
THOMAS KERFOOT & CO., LTD.,
J. K. CLAYTON, Advertising Manager.

Dispensing Difficulties and Notes

An Unsatisfactory Application

SIR.—The following prescription is for a paint, to be applied high up inside the nose. Can you suggest a method of dispensing it, and how much should be charged?

Adrenal. chlor.	5ij.
Cocain. hyd.	gr. vj.
Menthol	gr. v.
Paraf. liq.	5j.

Yours truly,
J. G. (29/9).

[Compounded as written this prescription does not provide a satisfactory paint for application high up inside the nose. Separation of constituents would occur before the liquid could be introduced to the affected area. It seems permissible to prepare a homogeneous liquid. This can be produced by employing dry adrenalin (gr. $\frac{1}{8}$) and cocaine alkaloid (gr. $\frac{5}{8}$) dissolved in two fluid drachms of pure oleic acid and mixed with the liquid paraffin, in which the menthol has been dissolved. The charge would be, according to the C. & D. system, 3s. 6d.]

An Acetylsalicylic Acid Mixture.

SIR.—Would you kindly state the most convenient method of dispensing the following:

Pulv. acid. acetylsal.	...	5iss.
Spt. ammon. arom.	...	3j.
Syr. aurant.	...	5ss.
Aq.	...	ad. 5vj.

Yours truly,
ASPIRIN (6/11).

[Place the acetylsalicylic acid in a mortar, add to it 15 gr. of powdered tragacanth and triturate well together; then pour on the aromatic spirit of ammonia and rub down until the mixed powders are uniformly damped, add all at once about two fluid ounces of the syrup of orange and water mixed together, stir quickly and complete by addition of the remainder of the water and syrup. This procedure produces a nice mixture. Acetylsalicylic acid, when once it is suspended, being very light, remains a long time uniformly diffused throughout the mixture.]

Appreciations

I have not always the leisure to give the C. & D. the full attention it deserves, but I'd be lost without it.—C. S. C. (2/11).

Thanks to your journal, I am able to keep "up-to-date" in many ways. In these times of rapidly changing prices it is worth 20s. to know when the changes take place.—L. B. B. (261/39).

Legal Queries

F. P. (13/11) asks whether a girl apprentice, aged sixteen, must be insured under the Unemployment Insurance scheme. [If the girl receives any money payment she must be insured.]

J. B. & S. (19/11).—"Antiseptic Throat Pastilles" is a title which renders the article to which it is affixed liable to medicine-stamp duty. In your case the use of the name in the possessive case is an additional ground for liability.

H. G. & Co. (17/11).—The labels you send do not render the preparations to which they are affixed liable to medicine-stamp duty as the requirements of the regulations regarding "known, admitted and approved" remedies have been fulfilled. The eye-lotion label is not liable to duty.

J. C. (17/11) has a pupil, aged twenty, whom he provides with board and lodging and a small sum as pocket money. Is it necessary for the pupil to be insured under the National Health and Unemployment Insurance schemes? [As the pupil receives a money payment, he must be insured under both schemes.]

X. Y. Z. (19/11).—The wholesale drug houses are interpreting the *obiter dictum* of the Home Office regarding the supply of Part I poisons (C. & D., June 2, p. 766) as being the legal position. This disregards the fact that the Pharmacy Act makes no provision for the supply of poisons by wholesale houses except to retail chemists. We had not heard before that wholesale houses are supplying Part I poisons on written orders to non-chemists, but limit the supply to certain drugs and chemicals.

G. (13/11) bought his business three years ago and is tenant of the premises where it is carried on. He resides on the premises. The landlord now intends to sell the premises. Is he entitled to give "G" notice to quit, and, if so, what length of notice is necessary? The rent is paid quarterly. ["G" is probably a yearly tenant, in which case he is subject to six months' notice to quit expiring upon an anniversary of the commencement of the tenancy. However, even if notice to quit is given, neither the landlord nor a purchaser of the premises will be given possession except upon one of the grounds specified in the Rent Restriction Acts, if the rent is below the statutory limit.]

H. G. (16/11) recently had sent to him, unasked, goods invoiced at 3s. 6d. He does not want the goods and is now being threatened with legal proceedings for the recovery of the amount. Is the recipient of goods, in such circumstances, bound to return them at his own expense? [If goods are sent "on approval" or on "sale or return" the recipient is not bound to return them; but he must intimate to the sender within a reasonable time that he rejects the goods if he does not want them. If "H. G." failed to give notice of rejection within the prescribed period, or within a reasonable time if no time was prescribed, he will be deemed to have accepted the goods and have to pay for them.]

Optician (12/11) sends us a copy of his will for our opinion as to its validity. [It is probable that the will would be admitted to probate without objection, as "Optician's" intention is sufficiently clear; but, owing to the wording of the attestation clause, evidence of the due execution of the will might be required. The attestation clause should state that the will was signed by the testator in the presence of the two witnesses who, in his presence and in the presence of each other, signed the document. Moreover, as there may be a trust during the infancy of "Optician's" children it would have been better to appoint trustees. We urge "Optician" to have a fresh will made by a solicitor, so as to avoid the possibility of trouble after his death. The cost of having a simple will prepared is small; but the expense and difficulty of proving a will which is not in proper form may be considerable. The addresses and descriptions of the witnesses should always be given, in case it is afterwards necessary to trace them.]

Miscellaneous Inquiries

When samples are sent particulars should be supplied to us as to their origin, what they are, what they are used for and how. We do not undertake to analyse and report upon proprietary articles nor to publish supposed formulas for them.

T. W. (10/10).—The iron of the metal bath in which the sloe wine was prepared will be acted upon by the tannin of the sloes and will form a black tannate. This is not poisonous, but if any zinc has been dissolved the wine may be dangerous to health. The presence of zinc can be settled by analytical tests.

Push (17/10).—POWDER FOR DESTROYING WORMS ON LAWNS.—This is a light-brownish vegetable powder, possessing no very characteristic odour or taste; it is only slightly bitterish. It yields 6.5 per cent. of ash, about 25 per cent. of aqueous extract, and about 11 per cent. of alcoholic extractive; the odour of the latter recalls that of opium. On general and microscopic examination it reveals characters which are in conformity with the powder being obtained by grinding a mixture of acorns and horse chestnuts. It contains some form of saponin as indicated by its frothing; and this is contained in horse chestnuts. Fragments of husk, which are apparently from acorns, are also present. We think the properties are due to the presence of the saponin.

Zero (31/10).—The following are the formulas for which you inquire:—

Pine Inhalant

Ol. cajuputi	3j.
Ætheris	3j.
Menthol	3j.
Ol. eucalypt.	3j.
Ol. pini	3j.
Terebeni	3j.
Camphor.	gr. xl.	

Influenza Mixture

Potass. citr.	5ss
Vin. ipecac.	3ijss.
Liq. amm. acet.	5iss.
Spt. æther. nit.	5iss.
Tr. aconiti.	xxiv.
Aq. camph.	ad	...	3vj.

Bullock (5/11).—SNORING IN BULLOCK.—Snoring is seldom met with; it is symptomatic of brain disease, or the formation of growths in the nasal cavities, such as polypi. To procure temporary relief depletives, such as antimony, belladonna, or elaterium, should be given. It is desirable to obtain the advice of a veterinary surgeon.

H. J. H. (19/11).—The formulas for which you inquire are as follows:—

Indigestion Mixture

Ammon. carb.	gr. xvij.
Sodii. bicarb.	gr. lxxx.
Tr. rhei. co.	3iv.
Tr. zingib. (85)	mxlv.
Ag. menth. pip. s. ad.	3iv.

Balsam of Linseed, Honey and Horehound

Oxy. scillæ	3ij.
Ext. glycyrrh.	3ss.
Chloroformi	mxviii.
Vin. ipecac.	3ij.
Ol. menth. pip.	mv.
Ol. anisi.	mv.
Theriacaæ	3ss.
Sacch. ust.	q.s.
Muc. lini. ad.	3vj.

F. J. P. (14/11).—Potassium cyanide and its preparations are poisons within Part I of the Poisons Schedule. Such preparations cannot legally be sold by unqualified persons.

M. A. T. (12/11).—Cocaine eye-drops can only be supplied to factory owners for use in the factory. If it were not for the permission given by the Home Office the factory owner would not be an "authorised" person to have the cocaine preparation in his possession.

The permission does not apply to any other person or to any other strength than that specified in the Order. An ambulance supply company cannot possess the liquid or sell it with their first-aid sets.

O. G. (13/11).—PRELIMINARY EXAMINATION.—The subjects you have passed in at your recent examination scarcely entitle you to registration as a student of the Pharmaceutical Society, at least, not without submission of covering certificates to the Council. The Registrar (Sir William Glyn-Jones, 17 Bloomsbury Square, London, W.C.1) is strictly limited by the regulations, but the Council has power to consider cases on their merits which must fall within the limits laid down.

H. S. (9/11).—PAINT FOR GLASS.—The paint used for glass requires thinning with a varnish or a solution of resin in oil of turpentine. Generally two or three coats of paint are required to obtain complete opacity.

W. H. B. (8/11).—NON-INFLAMMABLE PAINT.—The simplest covering for wood that is exposed intermittently to the action of a flame is a distemper mixed with solution of silicate of soda. Infusorial earth or kaolin is best as the basis for the distemper, tints being introduced by means of the coloured ochres or boles.

Midland (30/10).—LUMINOUS PAINT.—The self-luminous paint such as is used for watch faces and for compasses is zinc sulphide activated by radium bromide. It is necessarily expensive, and hence probably prohibitive for sign-board work such as you mention. Mr. F. Harrison Glew, 156 Clapham Road, London, S.E., specialises in radium paints.

Inker (14/11).—TYPEWRITER INK.—These consist of an oil-soluble aniline dye incorporated in one of the following bases: (1) Glycerin, 2 parts; castor oil, 1 part; oleic acid, 1 part. (2) Heavy petroleum, 1 gall.; petroleum jelly, 2 lb. (3) Glycerin, 4 parts; castor oil, 4 parts; carbolic acid, 1 part; cassia oil, 1 part. (4) Soft soap, 1 part; glycerin, 4 parts; water, 12 parts; alcohol (90 per cent.), 24 parts.

S. O. (16/11).—COUGH ELIXIR.—The following is the formula for which you inquire:—

Morph. acet.	gr. lxxij.
Tr. scillæ	3xvij.
Tr. aurantii	3xvij.
Ac. nitrici	3j.
Syr. rhodados	3xc.
Oxy. scillæ	3xc.

A. H. G. C. (16/11).—BEAD FROM OLD NECKLACE.—The sample you send is selenite, a fibrous gypsum, the chief source of which in this country is Nottinghamshire. Beads of this substance were very popular years ago, and are, we believe, still procurable.

Retrospect of Fifty Years Ago

Reprinted from

"The Chemist and Druggist," November 15, 1873

Citrate of Magnesia

Herring & Co. write: "On account of the recent prosecution of a retail chemist for the sale of the so-called "citrate of magnesia" as we have determined, as manufacturers, to label all such effervescent salt, when sent out in bulk, as "Sodaæ citro-tart. efferves. (Brit. Pharm., 1867), with magnesia, sugar, and lemon flavour, known by the public as citrate of magnesia." As it is undoubtedly advisable that the label to which the public has for so many years been accustomed, upon the usual retail bottle, be altered (as little as possible, we would suggest that the name (for retail) be modified as follows:—"Granular effervescent citrate, known by the public as citrate of magnesia." and possibly in addition, in order more strictly to comply with the requirements of the Act, and that the public may be educated as to its true composition, it would be expedient to affix a small label to the bottle indicating that citro-tartarate of soda, sugar, and magnesia are the component parts of the salt."

Nobody can afford to be ill these days..

Perhaps you are one of those to whom Winter means a period of lowered vitality and actual ill-health through colds, influenza, indigestion, rheumatism, and other ailments. The matter is serious and calls for common-sense action, because nobody can afford to be ill these days.

Gone are the fresh fruits—the "green things"—the light diet of Summer. Only too easy is it for the digestive organs to be over-taxed. Only too easy for one to relax in the easy chair and forget the need of fresh air and exercise. The ill-effects of Winter habits have to be counteracted, by a honest and effective way to do this is

a drink a glass of water dash of ENO

When the fire marks Winters

How cheery that fire seems—indoors—to be slack and lazy—has right, too, in the colder weather. It puts an extra strain on Nature. Which greater need for the regular morning "dash" of "Fruit Salt."

ENO helps to right matters—to maintain chills, colds and other winter ailments.

Here's the simple rule that millions—literally—follow with advantage the year around.

First thing every morning drink a glass of water (warm or cold) sparkling with a "dash" of

ENO'S
FRUIT SALT

Our ENO's Fruit Salt comes in three sizes—Handy Size—obliging for pocket, Household Size—convenient for home use, and Large Size—more economical for shop use. Ask for the size best suited to your needs.

Our ENO today. Try it at the chemist's or druggist's. The words "Fruit Salt" and ENO are registered Trade Marks of J. C. Eno Ltd., London S.E.

OPOIDINE

REGD

The Total Alkaloids of Opium in soluble form; one part of Opoide being equivalent to five parts of Opium.

HYPNOTIC
SEDATIVE
ANALGESIC
HÆMOSTATIC
and
ANTISPASMODIC

Its instant solubility in water ensures immediate action, whether administered per os, per rectum or hypodermically.

Opoide produces the full effects of Opium, with the advantage that it contains the mixed active principles in uniform ratio, whilst in Opium the proportion varies greatly.

The British Pharmacopœia standardises Opium for its Morphine content only.

Opoide, being subject to the Dangerous Drugs Acts, is offered by us in strict accordance with the regulations under those Acts.

Free Samples to the Medical Profession on application to—

Miss Courvoisier

Do you Value this assistance?

YOU want more than merely attractive lines for a really profitable Christmas trade; you want lines of quality for which a *real demand* exists. Then you will sell quickly, and get your profits quickly.

Bronnley's have booked large and important advertisements in the following papers to help you sell their lines.

Daily Mail
Daily Mirror
Observer
Sunday Times
Tatler

Bystander
Sketch
Vogue
Eve
London Mail

Strand Magazine
Windsor Magazine
Gentlewoman
Nash's Magazine
Weldon's Ladies' Journal

These advertisements will send customers into your shop asking for Bronnley's lines.

BRONNLEY'S have a number of special Christmas lines, for desirable Christmas presents, such as :—

ESS VIOITTO for the Hands and the Complexion.

Presentation cases of OMAR KHAYYAM, SOAP, PERFUME, POWDER and CREAM, LILY OF THE VALLEY MARGAUX PERFUME, LILAC MARGAUX PERFUME, COURVOISIER'S C.C. PERFUMES concentrated without spirit.

SOAP and PERFUME SETS.

Crystal Cut Glass bottles of perfume in silk-lined cases.

Fancy cases of perfume and soap.

Write at once for Special Christmas Catalogue of a selection of attractive and profitable lines for the Christmas trade—and remember Bronnley's quality and advertising make their goods quick sellers.

ROBOLEINE

THE ONLY TRUE BODY-BUILDER

Take it now and REGULARLY. The DANGER MONTHS are here. ROBOLEINE has been highly recommended by consultants and medical men as the premier reconstructive food not merely for one year or two years but for over twenty years. It is made by one of the leading manufacturers of CHEMISTS in the country, and consists

HERE IS THE FORMULA

Red Marrow from the Long Bone and Jelly from the Liver, both of prime origin. "Crescent" Egg Yolk and Neutralised Lemon Juice.

Do not be persuaded by ANY arguments to buy any tonic food UNLESS the sales manufacturer will give you a COPY of the CONVINCING TESTIMONY FROM THE HOUSE GOVERNOR OF THE LONDON HOSPITAL.

"The effect on some of our anaemic and rachitic children has been most gratifying. Is there but one making progress however? Ask your doctor and he will tell you that ROBOLEINE is a grand preparation."

2/-, 3/- and 6/- AT ALL CHEMISTS.

5 GOOD REASONS FOR STOCKING

IODISED THROAT TABLETS—M. & J.

- The influenza and "sore throat" season calls for Throat Tablets!
- Iodised Tablets are popular, and the M. & J. Brand guarantees quality!
- Each Tablet contains an effective dose of non-irritant iodine.
- They are attractively presented, and are palatable and efficacious—containing benzoic acid, cinnamon, aniseed, etc.
- They show a wide margin of profit—gross lots at 6/- per doz.—own name, if preferred. Single dozens at 7/-.

Telephone: Regent 5621.

Telegraphic Address : "Methcolim, Phone, London."

Above is a facsimile of one of our new cards (actual size 12 x 18). The lower part is of wood, veneer polished to resemble flooring. Altogether this card is distinctly novel, and creates immediate attention.

We send one of these cards with each display parcel, and include a full range of smaller cards and other show material.

The advantages of a display are obvious and encouraging. *One chemist wrote last season:*

"The photo does not do justice to the window-show, which was a good one, and further, the goods are selling."

A chemist writes already this season:

"Send six dozen 1/6 Slipperine earliest. Having another window-show."

To create sales for dance polish, a display is not merely helpful, but is an essential. Only by this means can the public be brought to the chemist for supplies. "SLIPPERINE" is advertised in the "Ball Room" and other dance journals, and business is sent, wherever possible, to the chemist.

Miniature samples and descriptive leaflets for your distribution to likely users are available.

THERE is a large and increasing demand for a really good dance polish. "SLIPPERINE" fills that demand, and shows a remarkably good protected profit.

1/6 size P.A.T.A. .. 12/- per dozen.

A SATISFIED CUSTOMER IS THE CHEMIST'S BEST ADVERTISEMENT

The Marvel Whirling Spray Syringe

Gold Medal Awarded, Paris, 1902,
by the Société d'Hygiène of France

as the latest and best improvement in Vaginal Syringes. Particular mention is called to the fact that by reason of its peculiar construction the Marvel Syringe dilates and flushes the vagina with a volume of whirling spray, which smooths out the folds and permits the injection to come into contact with and cleansing the entire surface.

Fully Protected by Patents,

You can safely recommend it.

Has no rival on the market, is well advertised, pays a good profit, quality guaranteed. The MARVEL is returnable for exchange if found defective and reported promptly.

Trade price, 125/- per doz.

Retail price, 15/- each.

THE CHEMIST AND DRUGGIST

SUPPLEMENT

42 CANNON ST.
LONDON E.C.4

NOVEMBER 24, 1923

This Supplement is inserted in every copy of The Chemist & Druggist.

THE SUPPLY OF SUPPLEMENTS.

The clerical work in connection with the posting of spare copies of the Coloured Supplement week by week has increased to such an extent that we have been compelled to reorganise our system of distribution. Our readers will please note, therefore, that, in future, instructions can be accepted for not more than six successive issues of the Supplement at a time, and that in every case

Addressed Wrappers Stamped One Penny

must be sent. Loose stamps will not be accepted.

CLOSING FOR PRESS.

ALL ADVERTISEMENTS INTENDED FOR
INSERTION IN THIS SUPPLEMENT
FIRST POST THURSDAY MORNING.

CHEMISTS' TRANSFERS.

Messrs. Orridge & Co., 56 Ludgate Hill, E.C.

Telephone No.: CITY 2283.

1.—SURREY (Main Road Position).—Modern Cash Retail and Dispensing Business; returns, present rate, £30 weekly; full profits; several proprietaries are included; comfortable flat; rent moderate; opposition not important; price about £1,000.

2.—HIGHGATE.—Old-established Business, present hands upwards of 25 years; returns average £1,032, yielding a net profit of about £300; double-fronted shop, with residence; 21 years' lease, or property may be purchased; price for business, £450 plus value of stock; and property, £790; for the latter easy terms could be arranged.

3.—LONDON, N.W.—General Retail Business, with Developing and Printing; no N.H.I.; returns, present rate, £10 per week; scope for increase with additional capital; single-fronted shop, 3 store rooms; held on long lease; terms, valuation of stock and fixtures, about £360.

4.—HOLLOWAY.—Neglected Business, General Retail and N.H.I. Dispensing; returns, £2,500; net profit, £700; the concern offers scope in the hands of a principal; house sublet to show profit rental; held on long lease; price £1,600.

5.—LONDON (Northern Suburb).—Cash Retail Business; double-fronted shop, corner position; returns, about £40 weekly; estimated value of stock and fixtures, about £1,400; moderate rental; new lease; further details on application.

6.—WANDSWORTH.—Cash Retail Business, with N.H.I. Dispensing; returns, about £16 weekly, with scope for development; lock-up shop; rent, 35s. weekly; yearly tenancy; price £550, about the value of stock and fixtures.

7.—LONDON, N. (Main Shopping Thoroughfare).—Cash Retail Business; returns average £70 weekly; gross profit, 40 per cent.; modern double-fronted shop, with new window; good working stock; held on lease at low rental; further details to bona-fide applicants.

8.—NORTHANTS. (Market Town).—Ready-money Business, capable of extension under the supervision of a principal; returns, between £1,400 and £1,500 per annum; small residence; rent, £45; 21 years' lease, with option of purchase; no near opposition; price £800.

9.—MIDLANDS (Large Town).—Ready-money Business; capital situation; returns, nearly £900; scope for development under qualified management and the addition of N.H.I.; lock-up shop; rent, £45; held on long lease; price £450, about the value of stock and fixtures.

10.—SALISBURY (Near).—Good-class Retail and Dispensing Business, with excellent sale for own proprietaries; returns, approximately £3,000, at top prices; double-fronted shop, fitted in mahogany and fully stocked; held on lease; price to be arranged equitably.

11.—LANC.—Cash Retail Business, with Kodak Agency; returns, about £1,600 per annum, under management; net profit, 25 per cent.; low rent and rates; small living accommodation; terms, goodwill £100, stock and fixtures at valuation.

12.—SOUTH DEVON.—Retail and Dispensing Business, with opening for Photographic and Optics; well-appointed shop and residence; returns, between £1,700 and £1,800; net profit, £550; price £1,600.

13.—NORTH WALES (Health Resort).—Mixed Business; returns, under management, exceed £1,000 per annum; small residence; rent, £25; held on lease; price £750.

14.—CORNWALL (Market Town).—Retail and Dispensing Business, situate in good position; returns, about £1,500, at good prices; lock-up shop; new lease will be granted at a rental of £60 per annum; value of stock and fixtures will be accepted to effect an immediate transfer.

VALUATIONS FOR STOCKTAKING

Messrs. O. & Co. desire to emphasize the necessity of a periodical Statement of Account by which means alone PROFIT, THE VALUE OF BUSINESS, &c., can be determined. Involving as this does the labour of Stocktaking and Valuation, it is often omitted and eventually becomes the cause of confusion and loss.

Messrs. O. & Co. are prepared to undertake these essential duties and make SPECIAL TERMS for such services.

ORRIDGE & CO., 56 LUDGATE HILL, LONDON, E.C.4

BERDOE & FISH

WILLIAM S. FISH.

VALUERS AND TRANSFER AGENTS,

41 Argyle Square, KING'S CROSS, W.C.1

(One minute from St. Pancras and King's Cross Stations.)
1.—HAMPSHIRE.—Old-established Cash Drug Stores; in splendid position; present returns, £2,000; gross profits, 40 per cent.; fine opening for N.H.I. and Photo; large shop, with house attached; heavily stocked; low rent; long, valuable lease; owner retiring; price, £2,000; excellent opportunity for qualified man.

2.—LIVERPOOL.—Quick Cash Retail, with Kodak Agency; returns, £1,676, under manager; rent, £40; small house; corner shop; well stocked; price, £750, or offer.

3.—GLOUCS.—Light Cash Drug Store, in large town, same hands many years; retiring; returns, nearly £1,000; plenty of scope; house available; own property; price, £650, or £1,350 with freehold; mortgage arranged.

4.—CORNWALL.—Light Family Retail, with Kodak Agency, in prominent position, good market town; returns, £1,500; plenty of scope; corner lock-up pharmacy; rent, £60; lease granted; valuation, about £850; no goodwill.

5.—SHROPSHIRE (Busy Market Town).—Light Cash Retail, in good position; returns, £500, under unqualified; low rent; modern-fitted shop and fairly stocked; price valuation, about £285; qualified man with some spare capital would do well.

6.—YORKS.—Bargain at £400; Light General Retail; returns, £2,000; no Photo; corner shop, with house; price for quick sale, £400.

7.—LONDON, W.—Good-class Retail; returns, £1,800, under manager; increasing profits above average; corner pharmacy; well stocked; price, £1,250.

8.—LONDON, N.—Light Cash Retail and Prescribing Business, in densely populated district; not on panel; returns, over £1,000; plenty of scope; same hands 23 years; retiring; house available; price, about £700, or offer.

BUSINESSES WANTED,

We are particularly in want of good Businesses in the following districts: Southern Counties, S. or W. Midlands, and Liverpool or Manchester; clients waiting with £3,000 to £4,000 capital; correspondence cordially invited.

STOCKTAKING VALUATIONS,

We are now booking dates for December and the New Year at special reduced terms and invite early applications. Our Mr. Fish may be consulted daily on all questions relative to sale, purchase and valuation.

AGENCIES.

6s. for 50 words or less; 6d. for every additional 10 words or less, prepaid.

The ADVERTISER may if preferred have replies addressed to this Office, and forwarded on payment of an additional charge of 1/-.

BRITISH COLUMBIAN IMPORTERS AND EXPORTERS.

Vancouver, B.C., has all the year round direct water communication with British and European ports, and is the natural gateway into Western Canada, whence the Canadian Pacific Railway and the Canadian National Railway distribute economically as far as Winnipeg, where freight rate equalises with that from the St. Lawrence and Lake ports, which are closed many months of the year.

A responsible firm in this city of Vancouver, already representing a world-wide known line of disinfectants, and amalgamated with an offshoot of an old English firm of Manufacturing Chemists and Wholesale Druggists, is desirous of handling Agencies over this territory, including, as it does, Vancouver Island, Greater Vancouver, British Columbia Mainland, Alberta, Saskatchewan and part of Manitoba; and gives opportunities for re-export to the adjacent States and Pacific ports and to Japan, China, the Straits Settlements and Australia.

The suggested lines which this firm is desirous of distributing:—

GALENICALS,	SERICES,
PHARMACEUTICAL PREP.	GLUES & GELATINES,
CHEMICALS,	BOTTLES,
DRUGS,	SPONGES,
OILS,	CREPE BANDAGES.

Bankers: The Bank of Montreal, London and Vancouver.

The Natural Products of British Columbia, notably, Cascara Bark and Extract, could be reciprocally exported, and inquiries are solicited for next year's crop of Cascara Bark.

Communication to 34/83, Office of this Paper.

COLONIAL Merchant (Englishman), returning to Europe February-March next, wishes to enter into correspondence with Manufacturer or Mercantile House desiring intelligent Representation (not travelling); preferably, but not necessarily, in France or Northern Africa; accustomed to native trade; salaried position not required; for an established house or house with established agencies in commodities of premier necessity would be willing to represent on an expenses and commission basis; retail business not objected to if of sufficient importance. Write full "Africa," Box No. 698, Sells Advertising Offices, Fleet Street, E.C.4.

FIRM of Manufacturers' Representative in Sydney, Australia, would like to get in touch with Manufacturers or Exporters for Chemicals, Patent Medicines, Drugs, Fancy Goods, etc., etc. Write, Green, P.O. Box 1023, Sydney, Australia.

FORMER Manager to large Proprietary and Marketing House is open to undertake personal independent development of a few non-competing lines additional to those already in hand; finest facilities and connections for economical buying, manufacturing, and complete sales organisation, both U.K. and abroad; also expert advertising service if required; excellent opportunity for retailers or others anxious to develop own formulae at minimum expense under expert guidance; offices; business address for registration, etc., etc.; commission, 10 per cent. on sales, with minimum of £50 p.a., payable monthly, as subsidy towards organization expenses; advice without obligation. Write, "Proprietary," 22 Crown Chambers, Lower Regent Street, London S.W.1.

SMALL Manufacturer of Medicated Lozenges and Floral Cachous desires to get in touch with Buying Agents; small quantities supplied. 275/15, Office of this Paper.

BUSINESSES FOR DISPOSAL.

6s. for 50 words or less; 6d. for every additional 10 words or less, prepaid.

The ADVERTISER may if preferred have replies addressed to this Office, and forwarded on payment of an additional charge of 1/-.

BERKS.—Country Business, with Beer off-licence; returns, £1,500; lock-up shop; rent, £25 clear; easily worked and capable of big increase; net profit, £350; price, £700. "Chemist," 9 Mill Lane, Lambourn, Berks.

BRECONSHIRE.—For Sale, good Chemist's Business; no goodwill; well stocked; small rent. R. Wood & Co., 45 Broad Street, Hereford.

LEEDS.—Good Business for Sale in a rising district; Dispensing and Panel; no opposition; reason for leaving, ill-health; rental £40; rates £28 for house and shop; returns £1,500, and Panel £240 yearly; this is a genuine business; price £1,200; stock, fixtures, in good condition. Apply, "S. W. J.", 274/38, Office of this Paper.

MANCHESTER.—A sound established Drug Store, now doing good turnover, and capable of great expansion under qualified; nicely fitted and well stocked, with convenient house attached, bath, etc.; very low rent; lease granted; immediate possession; price £550; must sell quickly. Further particulars (letters only), "Presto," 11 Tiverton Place, Ardwick, Manchester.

MANCHESTER DISTRICT.—Old-established Limited Company, supplying Surgical and all Chemists' Requisites; capital required about £5,000; well equipped; stock and fixtures to value of purchase price; this is a sound concern, and open to any investigation. For further particulars and appointment apply to Messrs. Rothwell, Auctioneers, Y.M.C.A. Buildings, Oldham.

OLDHAM.—An excellent opportunity occurs to acquire a really genuine Chemist's Business on main road; splendid stand; handsomely fitted; well stocked; good living accommodation; electric light throughout; large N.H.L; good turnover; rent about £58 per annum; cash price £1,500. Apply 275/12, Office of this Paper.

PORT TALBOT (near), Glamorganshire.—Old-established Cash, Counter, Family, Prescribing, N.H.L; Wine Licence; Gilbey's Agency; central corner shop, with dwelling-house; population 8,000; two miles nearest chemist; returns about £50 weekly; price £1,200, or valuation; possession on completion. Penrose Kenrick, Chemists' Valuer, Moira Buildings, Cardiff.

ROCHDALE.—To Let, in main street, Chemist and Drysalter Business; established over 70 years; stock and fixtures at valuation; owner retiring. Address, 33 Drake Street.

SOUTHAMPTON (near).—£450 cash secures a sound, profitable Business; practically unopposed; present returns £15 weekly, increasing under unqualified; fine opening for N.H.L and Photo; rent, £40; long lease; good house, garden and stabling; well fitted and stocked; owner's serious ill-health necessitates a quick sale; splendid chance for a qualified man; strongly recommended. Apply, Berdoe & Fish, Chemists' Valuers, 41 Argyle Square, King's Cross, W.C.1.

SOUTH COAST.—Good-class Business in excellent position; 14 years' lease to run; stock and fixtures valued at £1,500; good Kodak connection; lock-up shop; returns £2,600 for 1922 under indifferent management; scope for great increase; price £1,850, or offer; cash buyers only. 274/18, Office of this Paper.

SOUTH DEVON.—£600 will buy well-established Business in main thoroughfare of large town; returns £1,200; profit £350; well fitted; house has side entrance, seven good rooms, bath and w.c.; all fitted electric light; low rent; long lease; sound reasons for disposal. 274/20, Office of this Paper.

SOUTH WALES.—Chemist's Business, with Wine Licence and Rexall Agency, for disposal owing to continued illness of proprietor these last four years; returns, £3,000 per annum; good profits; good house and shop; mahogany fitted and recess labelled rounds and well stocked; rent, £80 per annum, of lease 12 years to elapse. Apply 275/38, Office of this Paper.

SURREY BORDER.—Unopposed Country Drug Store, with freehold; good situation; growing district; scope in Dispensing and Photographic; returns about £10 weekly. Fullest particulars on application. 271/37, Office of this Paper.

WEST RIDING Village, Yorks.—Easily-worked Pharmacy for disposal; main road; Kodak Agency; nicely stocked; mahogany fixtures; living accommodation; low rental; turnover £1,150; owner must sell on account of wife's health; will accept £550 for quick sale. 272/5, Office of this Paper.

YORKS (South).—Colliery district, which is being considerably developed; small Cash Retail, Dispensing and Prescribing Business; also N.H.I.; turnover, £70 per month, and increasing; rent, £8s., with house, which can be let off; stock valued at £400; price, £500. Chas. C. Marsden, Chemists' Valuer, 44 Sholebroke View, Leeds.

CASH Store.—Pharmacy for Sale in popular S.W. district; returns about £900 per annum; has done over £1,000; unusually profitable lines; absolutely genuine; well fitted and stocked; house attached, no N.H.I. or Optics; big scope; moderate rental; first with £750 gets it; a bargain; only wants seeing; owner giving up retail. "Veritas," 274/21, Office of this Paper.

DRUG Stores; unopposed; very rising district; few miles from Southampton; rent £40; lease 20 years; mahogany fitted shop; 7 rooms; nice fruit, flower garden; trade £15; qualified Chemists could develop a large trade; exceptional opportunity; only £475, including valuable stock. Write, Durham, 177 Norbury Crescent, S.W.16.

DRUG Stores, 50 minutes from London; takings about £16; qualified man could double; house, shop well stocked; full investigation; £550, bargain. Reply P.C.B., 15/10, Office of this Paper.

ERNEST J. GEORGE offers Businesses, East Coast, £1,000; Lancashire, £1,100; Salop, £300; Oxon, £1,600; Yorkshire, £450; all propositions carefully investigated with view to mutual satisfaction and maintenance of reputation. Information invited from prospective sellers who hesitate for fear of their intentions being broadcasted. Privacy and straight dealing guaranteed. Ernest J. George, 3 St. Paul's Close, Walsall. Tel. 774.

FOR Sale, with immediate possession, a freehold, well-built Chemist's Shop; fittings equal to new; no opposition; situate midway on main road between two large towns; growing neighbourhood; house contains ample living accommodation, with roomy storage and garden. 272/8, Office of this Paper.

GENUINE Chemist's Business, West Riding, Yorkshire; population 13,000; returns about £900; progressive; living accommodation, or may be used lock-up place; N.H.I. and Prescribing; splendid opening for Optics and Dentistry; stock in good saleable condition, £400; established 5 years; price for quick sale, £500; good reason for disposal. 274/11, Office of this Paper.

PHARMACY, well situated, industrial district (County Durham); great scope for active man; cheap to quick buyer. 272/38, Office of this Paper.
